The Global Pigeon Colin Jerolmack, 2013-03-20 The pigeon is the quintessential city bird. Domesticated thousands of years ago as a messenger and a source of food, its presence on our sidewalks is so common that people consider the bird a nuisance—if they notice it at all. Yet pigeons are also kept for pleasure, sport, and profit by people all over the world, from the “pigeon wars” waged by breeding enthusiasts in the skies over Brooklyn to the Million Dollar Pigeon Race held every year in South Africa. Drawing on more than three years of fieldwork across three continents, Colin Jerolmack traces our complex and often contradictory relationship with these versatile animals in public spaces such as Venice’s Piazza San Marco and London’s Trafalgar Square and in working-class and immigrant communities of pigeon breeders in New York and Berlin. By exploring what he calls “the social experience of animals,” Jerolmack shows how our interactions with pigeons offer surprising insights into city life, community, culture, and politics. Theoretically understated and accessible to interested readers of all stripes, *The Global Pigeon* is one of the best and most original ethnographies to be published in decades.

The Red and the Real Jonathan Cohen, 2009-06-25 *The Red and the Real* offers a new approach to longstanding philosophical puzzles about what colors are and how they fit into the natural world. Jonathan Cohen argues for a role-functional treatment of color - a view according to which colors are identical to certain functional roles involving

perceptual effects on subjects. Cohen first argues (on broadly empirical grounds) for the more general relationalist view that colors are constituted in terms of relations between objects, perceivers, and viewing conditions. He responds to semantic, ontological, and phenomenological objections against this thesis, and argues that relationalism offers the best hope of respecting both empirical results and ordinary belief about color. He then defends the more specific role functionalist-account by contending that the latter is the most plausible form of color relationalism.

The Invisible Work of Nurses Davina Allen, 2014-08-27 Nursing is typically understood, and understands itself, as a care-giving occupation. It is through its relationships with patients – whether these are absent, present, good, bad or indifferent – that modern day nursing is defined. Yet nursing work extends far beyond direct patient care activities. Across the spectrum of locales in which they are employed, nurses, in numerous ways, support and sustain the delivery and organisation of health services. In recent history, however, this wider work has generally been regarded as at best an adjunct to the core nursing function, and at worse responsible for taking nurses away from their ‘real work’ with patients. Beyond its identity as the ‘other’ to care-giving, little is known about this element of nursing practice. Drawing on extensive observational research of the everyday work in a UK hospital, and insights from practice-based approaches and actor network theory, the aim of this book is to lay the empirical and theoretical foundations for a reappraisal of the nursing contribution to society by shining a light on this invisible aspect of nurses’ work. Nurses, it is argued, can be understood as focal actors in health systems and through myriad processes of ‘translational mobilisation’ sustain the networks through which care is organised. Not only is this work an essential driver of action, it also operates as a powerful countervailing force to the centrifugal tendencies inherent in healthcare organisations which, for all their gloss of order and rationality, are in reality very loose arrangements. *The Invisible Work of Nurses* will be of interest to academics and students across a number of fields, including nursing, medical sociology, organisational studies, health management, science and technology studies, and improvement science.

Pigeon Facts Amelia Khatri, AI, 2025-02-18 **Pigeon Facts** reveals the surprising story of pigeons, creatures often overlooked despite their significant role in both science and history. Delving into their remarkable navigational abilities, the book highlights how pigeons utilize magnetoreception, potentially using the Earth's magnetic field to find their way home. The book emphasizes that pigeons are not just urban dwellers but complex organisms with innate capabilities and historical contributions worthy of attention. The book explores pigeon biology, focusing on sensory systems and genetics, before examining the science of magnetoreception and various related theories. From their domestication to their use as messengers in wartime, and their contribution to early scientific experiments, the book emphasizes the pigeon's surprising impact on human affairs. The journey concludes by examining the pigeon's place in today's urban ecosystems. Drawing from diverse sources, including scientific studies and historical records, the book presents an interdisciplinary view of pigeons. This approach is designed to be accessible to a broad audience interested in science, biology, and history, providing a deeper appreciation for these birds' complexity and contributions. It is important to remember that the book also acknowledges controversies, such as the impact of pigeons on agriculture.

Fighting Against War Julie Kimber, Phillip Deery, Karen Agutter, Anne Beggs-Sunter, Robert Bollard, Verity Burgmann, Liam Byrne, Lachlan Clohesy, Rhys Cooper, Carolyn Holbrook, Nick Irving, Chris McConville, Douglas Newton, Bobbie Oliver, Carolyn Rasmussen, Phil Roberts, Kim Thoday, 2015-02-13 The extended commemorations to mark the 100th anniversary of the Great War have commenced in earnest. Over the next four years people around the world will struggle to avoid the politicised public narratives of these remembrances. Nationalistic sentiment is no less palpable today than imperial sentiment was a century ago. Its opponents are still there too. Among the countless commemorative activities that will occur, there are innumerable counter narratives. Although they are compelling in their telling of oppositional stories, they have yet to capture the imagination of the dominant storytellers of our generation. Mainstream media, governments, and politicians of all persuasions, remain a captive of “soft jingoism”, and the myth making of Geoffrey Serle’s “fire-eating generals”. In such a

view, war remains a lamentable, but necessary evil. The true costs of war are absorbed only partially. Given the destabilisation of much of the globe, and the increasing militarisation of domestic politics by Western governments, it is unsurprising that a widespread movement for peace is momentarily lost. But history provides hope. By looking back we can see the ebb and flow of peace movements, and the lessons here are instructive. The present commemorative phase provides historians with a license to tell the stories that underscore the feeble fabric of nationalistic hubris – ones that seek to analyse and understand the human condition rather than simply commemorate it. Tales of national re-birth are but one facet of war, complicated by a much richer, dirtier, and more nuanced reality. This reality challenges the necessity of war, and allows us to empathise with war's victims, elucidate oppositional tactics, and provide explanations for the difficulties in sustaining a pacifist approach in the midst of war. The chapters here deal with aspects of peace and anti-war, of memory, of forgetting, and of legacy. The majority – unsurprisingly, given the present historical moment – concentrate on the experience of the First World War. The shadows of that war are long, and the historiography they build on extensive. Contributors include Phillip Deery, Julie Kimber, Karen Agutter, Anne Beggs Sunter, Robert Bollard, Verity Burgmann, Liam Byrne, Lachlan Clohesy, Rhys Cooper, Carolyn Holbrook, Nick Irving, Chris McConville, Douglas Newton, Bobbie Oliver, Carolyn Rasmussen, Phil Roberts, and Kim Thoday.

How the Halakhah Unfolds Jacob Neusner, Tzvee Zahavy, 2006 In separate multi-volumed works, form-analytical English translations of the Mishnah, Tosefta, Yerushalmi, and Bavli have been set forth. Outlines of the Yerushalmi and the Bavli have been brought about, and those outlines of the two Talmuds have been compared. In addition, for each subject the main points of the Halakhah of the topical expositions or tractates of the Mishnah-Tosefta-Yerushalmi-Bavli have been set forth. The theological message of the respective tractates has been spelled out. Here, we follow a single tractate through the principal documents of formative Judaism as these have already presented them. How the academic commentaries, outlines and comparisons, and theological summaries yield a systematic account of the Halakhah in its documentary unfolding is thus fully exposed.

How the Halakhah Unfolds Tzvee Zahavy, Jacob Neusner, 2010-07-22 In separate multi-volume works, the project has presented form-analytical English translations of the Mishnah, Tosefta, Yerushalmi, and Bavli, outlined the Yerushalmi and the Bavli and compared these outlines. In this volume, the main points of the Halakhah of the topological expositions or tractates of the Mishnah-Tosefta-Bavli Hullin are set forth and the theological message of the tractate is laid out. The project yields a systematic account of the Halakhah in its documentary unfolding.

Becoming a Teacher of Writing in Elementary Classrooms Donna Kalmbach Phillips, Mindy Legard Larson, 2015-12-22 *Becoming a Teacher of Writing in Elementary Classrooms* nurtures teachers' identities as writers, connects to the realities of writing instruction in real and diverse classrooms, and encourages critical and creative thinking.

This text is about writing instruction as a journey teachers and students embark on together. The focus is on learning how to teach writing through specific teaching and learning structures found in the Writing Studio: mini-lessons; teacher and peer conferencing; guided writing; and sharing, celebrating, and broadcasting writing. Pedagogical features include teaching structures and strategies, Problematizing Practice classroom scenarios, assessment resources, and a Companion Website. Because a teacher who views him or herself as a writer is best positioned to implement the Writing Studio, a parallel text, Becoming-writer, give readers space to consider who they are as a writer, their personal process as a writer, and who they might become as a writer.
