Gabriel Fauré: The Songs and their Poets Graham Johnson, 2017-07-05 The career of Gabriel Fauré's a composer of songs for voice and piano traverses six decades (1862-1921); almost the whole history of French music is contained within these parameters. In the 1860s Fauré the lifelong protégé of Camille Saint-Saëns was a suavely precocious student; he was part of Pauline Viardot's circle in the 1870s and he nearly married her daughter. Pointed in the direction of symbolist poetry by Robert de Montesquiou in 1886, Fauré as the favoured composer from the early 1890s of Winifred Singer, later Princesse de Polignac, and his songs were revered by Marcel Proust. In 1905 he became director of the Paris Conservatoire, and he composed his most profound music in old age. His existence, steadily productive and outwardly imperturbable, was undermined by self-doubt, an unhappy marriage and a tragic loss of hearing. In this detailed study Graham Johnson places the vocal music within twin contexts: Fauré's own life story, and the parallel lives of his many poets. We encounter such giants as Charles Baudelaire and Paul Verlaine, the patrician Leconte de Lisle, the forgotten Armand Silvestre and the Belgian symbolist Charles Van Lerberghe. The chronological range of the narrative encompasses Fauré's first poet, Victor Hugo, who rebelled against Napoleon III in the 1850s, and the last, Jean de La Ville de Mirmont, killed in action in the First World War. In this comprehensive and richly illustrated study each of Fauré's 109 songs receives a separate commentary. Additional chapters for the student singer and serious music lover discuss interpretation and performance in both aesthetical and practical terms. Richard Stokes provides parallel English translations of the original French texts. In the twenty-first century musical modernity is evaluated differently from the way it was assessed thirty years ago. Fauré's no longer merely a 'Master of Charms' circumscribed by the belle époque. His status as a great composer of timeless

**Gabriel Faure** Edward R. Phillips, 2021-10-28 First published in 2000. Gabriel Urbain Fauré was born 12 May 1845, in Pamiers in the south of France. Faure's compositional style has proven difficult to classify. Some music historians consider him a figure of the nineteenth century, a traditionalist, even a neo-romantic; others consider him part of the twentieth century—at the least, a predecessor of modern French music or, at the other extreme, a quiet revolutionary and a great

influence upon France's musical future. This research guide offers a selective, annotated list of writings, biographical information and lists of works and photographs.

**Gabriel Fauré** Jean-Michel Nectoux,2004-12-16 This book traces Fauré's life and the rich cultural milieu in which he lived and worked.

**Song** Carol Kimball,2006-12-01 (Book). Carol Kimball's comprehensive survey of art song literature has been the principal one-volume American source on the topic. Now back in print after an absence of several years, this newly revised edition includes biographies and discussions of the work of 150 composers of various nationalities, as well as articles on styles of various schools of composition.

Regarding Faure Tom Gordon,2013-12-19 Regarding Fauré , the result of a 1995 conference on Fauré's important contribution to classical music, was written by Tom Gordon, artistic director the Ensemble Musica Nova and a professor in the Department of music at Bishop's University in Quebec. Also included are contributions from some of the world's most renowned Fauré scholars including Jean-Michel Nectoux, Robert Orledge, Edward Phillips, and Steven Huebner. With a lifetime that spanned the developments of Chopin, Debussy, Schoenberg, and Stravinsky, the great French composer Gabriel-Urbain Fauré (1845-1924) lived during one of the most interesting periods in music history, yet steered a course uniquely his own. Exploring the composer's role as an educator, critic, composer, and advocate for French music, Regarding Fauré is critical, analytical, and interdisciplinary in its approach to understanding Fauré's prodigious works and life. Also includes musical examples. His numerous compositions include more than 100 songs (known as 'melodie', or French a

**The Faure Song Cycles** Stephen Rumph,2020-09-29 Gabriel Fauré's mélodies offer an inexhaustible variety of style and expression that have made them the foundation of the French art song repertoire. During the second half of his long career, Fauré composed all but a handful of his songs within six carefully integrated cycles. Fauré moved systematically through his poetic contemporaries, exhausting Baudelaire's Les fleurs du mal before immersing himself in the Parnassian poets. He would set nine poems by Armand Silvestre in swift succession (1878-84), seventeen by Paul Verlaine (1887-94), and eighteen by Charles Van Lerberghe (1906-14). As an artist deeply engaged with some of the most important cultural issues of the period, Fauré reimagined his musical idiom with each new poet and school, and his song cycles show the same sensitivity to the poetic material. Far more than Debussy, Ravel, or Poulenc, he crafted his song cycles as integrated works, reordering poems freely and using narratives, key schemes, and even leitmotifs to unify the individual songs. The Fauré Song Cycles explores the peculiar vision behind each synthesis of music and verse, revealing the astonishing imagination and insight of Fauré's musical readings. This book offers not only close readings of Fauré's musical works but an interdisciplinary study of how he responded to the changing schools and aesthetic currents of French poetry.

Phonetics and Diction in Sing Adler, 1967 Though it has often been passionately criticized--as fraudulent, exploitative, even pagan--the American funeral home has become nearly as inevitable as death itself, an institution firmly embedded in our culture. But how did the funeral home come to hold such a position? What is its history? And is it guilty of the charges sometimes leveled against it? In *Rest in Peace*, Gary Laderman traces the origins of American funeral rituals, from the evolution of embalming techniques during and after the Civil War and the shift from home funerals to funeral homes at the turn of the century, to the incre.
