**Financial Services and Wealth Management in Singapore** Tan Chwee Huat, 2011-08-01 During the last decade, many changes have taken place in the Singapore financial marketplace. The Monetary Authority of Singapore has implemented numerous reforms to liberalize financial services sector. Since 2002, two new laws have come into effect. The Securities and Futures Act and the Financial Advisors Act have important impact on the financial community. Institutions must hold the Capital Market Services (CMS) licence and the Financial Advisors licence and their representatives must pass the CMFAS examinations. This book discusses the changes in detail. Part A provides details of the reforms and discusses the impact of the new laws and regulations. Part B highlights the wide range of financial services and products provided by the institutions. In this edition, two new chapters have been added. They focus on issues related to wealth management which has become the recent focus of many banks that provide services to high net worth individuals or HNWIs. This book should be of interest to all financial institutions and professionals. It is also a must-read for investors who have to choose from a wide range of financial products. It will be especially useful to students and professionals in banking and finance.

**Creating a New Management University** Howard Thomas, Alex Wilson, Michelle P. Lee, 2022-07-04 This book provides an in-depth exploration of one of the most significant success stories of the development of an entrepreneurial university in recent times as well as its role within society and the economy. Written by leading business school Dean and scholar, Howard Thomas, and Alex Wilson and Michelle Lee, the book tracks the genesis of the idea of a third local university in Singapore to its fruition as Singapore Management University (SMU). It provides important insight and lessons for senior university and business school leaders, as well as regional and national governments. The increasing emphasis on the importance of innovative, entrepreneurial universities for social and economic growth has prompted this review of the strategy and impact of SMU. The book addresses the strategic evolution of SMU itself, from its origins as a single business school, into a multi-school, social science-focused school of management. It examines whether it has fulfilled its promise as an entrepreneurial university and a change agent in the context of Singapore's strong economic growth and educational strategy. More broadly, it explores how investment in education, and entrepreneurial universities such as SMU, can facilitate and enhance economic

growth. University leadership teams, policy analysts, faculty and students of entrepreneurship education, education management and policy in general, and business education in particular, will find this book an invaluable insight into building a genuinely entrepreneurial university.

**Private Education In Singapore: Contemporary Issues And Challenges** Choon-yin Sam, 2017-05-23 Not much has been written about the private education sector in Singapore despite the fact that the sector houses about 300 private education institutions (PEIs) and enrolls about 150,000 students. *Private Education in Singapore: Contemporary Issues and Challenges* is an exciting book that aims to fill a gap in the literature. In the book, the author offers an extensive discussion on (i) the key elements of the sector — types and features of the PEIs, (ii) the regulatory framework for private education, (iii) students' aspiration and the impact of the ASPIRE report on PEIs, and (iv) the provision of external degree programme through transnational partnership. The book also tackles the hotly debated discussion in relation to academic quality and standard of PEI courses. The author identifies the reasons — some of them have more characteristics of a myth — and suggests a number of ways to overcome the issues and challenges.

**The Routledge Companion to International Management Education** Denise Tsang, Hamid H. Kazeroony, Guy Ellis, 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. *The Routledge Companion to International Management Education* gathers together contributors from academia, industry and university administration involved in IME, to: introduce the domain of IME; describe the emerging state in new geographical areas; discuss the major issues and debates revolving around IME; explore the linkage of technology and international management, and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo-American view, with up-to-date specific insights originating from their indigenous view points, which has often been neglected and inadequately covered. The volume answers important questions, such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought-provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside-out perspective.

The Governance and Management of Universities in Asia Chang Da Wan, Molly N.N. Lee, Hoe Yeong Loke, 2019-03-29 This volume seeks to identify and explore the dynamics of global forces on the development of higher education in Asia, in particular, how neoliberalism has affected reforms on university governance and management in the region. It includes a set of country-specific studies on how various countries have responded to the dominant neoliberal ideology at the systemic, institutional, and process levels. The focus is on the relationship between the state and the universities, which is usually reflected in the degree of autonomy and accountability allowed in a particular higher education system. The selected countries are Cambodia, China, Indonesia, India, Japan, Malaysia, Singapore, South Korea, and Thailand. Each case study examines the establishment of corporatised or autonomous universities in the country focusing on (i) the acts, reports, and/or policies that led to such a move as well as the rationales behind the move; (ii) the changes in the governance and organisational structure of the universities, highlighting the kinds of autonomy that the universities have; (iii) the new management strategies, techniques, and practices that have been introduced to the university including the internal and external quality assurance mechanisms, and (iv) some of the tensions, conflicts, and acts of resistance that may have emerged.

Singapore School Principals: Leadership Stories Zoe Suan Loy Boon, 2018-04-09 This book is undertaken by the author who has personally walked the journey of a classroom teacher, middle leader and school principal in the Singapore education system. It is a culmination of two research projects undertaken in two phases — the first is derived from the PhD Thesis entitled *The Making of School Principals in Singapore* and the second is based on interviews with school principals who have retired from the Singapore education system. Both research projects provide invaluable input to describe the four career phases of school leadership, that is, formation, accession, incumbency, and divestiture. This research describes how the formative years of a school principal have tremendous impact on who the principal is, and how the values and beliefs of an aspiring/potential school leader serve to guide him/her in taking on the principalship post. This well-structured book is both exploratory and descriptive. It provides the necessary background for anyone interested in understanding school leadership as a career. More specifically, it will be of value to educators and stakeholders interested in understanding the nature of school leadership in the Singapore education system.

**50 Years Of Technical Education In Singapore: How To Build A World Class Tvet System** Natarajan

Varaprasad,2016-03-23 This book describes in vivid detail how a newly independent nation with neither a history of technical education nor industry, developed in a short period of time a world-class system of technical and vocational education that helped it make rapid progress in its manufacturing and industrial sector. The economy and the education sector both developed in parallel, with each complementing the other, utilizing strategies and making the decisions that were to bring the country quickly to advanced status. Studies show that premature investment in higher education at the expense of technical and vocational education has created many leaders but few doers, leading to high unemployment. The Singapore Technical Vocational Education and Training (TVET) story demonstrates how governmental support helped changed the image of technical and vocational education to one equal with higher education, yet including bridges and ladders to allow everyone to maximize their potential.

**The Political Economy of Social Control in Singapore** C. Tremewan,2016-07-27 `The thesis presented here will not only change the way in which we understand contemporary Singaporean society and the relationship between the state and

its citizens, but will also provoke a debate about the social costs of economic development in other parts of the world, and the future security of the island republic - increasingly a Chinese enclave in a Malay sea - in the twenty-first century.' - Peter Carey, Trinity College, Oxford This study examines the development of Singapore's complex system of social regulation in relation to the phases of its economic strategy and political transition. It focuses on the way social control works through public housing and welfare, education, parliamentary politics and the law.
