*Ancestral Mindset* John Daniel, 2015-01-14 Ancestral Mindset by thought leader and human relations expert John Daniel offers deep insight into what motivates us and drives our actions and how we can use that information to better lead, influence, and collaborate at work and home. If human evolutionary history were compressed into a single calendar year with our earliest ancestor arriving on January 1, our transition from hunter-gatherers wouldn't occur until the end of December. We were hunter-gatherers for well over 90 percent of our collective history. The key to understanding us is understanding the hunter-gatherer neurocircuitry that crafted our human nature. In *Ancestral Mindset*, John Daniel traces the development of the human brain from the birth of our species and applies his insights to teach leadership and teamwork from an evolutionary-neurological perspective. Why is your fight-or-flight instinct on a hair trigger when the boss calls you in? Why does receiving advice from a colleague induce a threat state? Why does it feel so disproportionately risky to disagree with the team? The answers to those questions lie in our collective past. As a heart-transplant recipient with decades of executive HR experience, Daniel knows a thing or two about risk, survival, and human behavior from the operating room to the board room. His unique personal story and voracious appetite for research have led to a text as potentially transformative as it is bursting with information. If you are interested in upping your leadership game, improving your relationships, or just becoming more persuasive, *Ancestral Mindset* will help you adapt from the brain down. Access your inner hunter-gatherer and transform your take on what motivates, elevates, and convinces. It will make you a better leader, a better employee, and a better Homo sapiens to those around you.

**Mythos & Symbolic Humanity** Michael A. Susko, 2025-07-20 Mythos & Symbolic Humanity presents an integrated literary-scientific exploration of the emergence of symbolic behavior in the human lineage. Part I (Mythos) is a research-informed narrative following a small hominin family—Tod, Zoe, and child Toumai—across deep time nodes of tool innovation, fire use, and communicative complexity. Archetypal figures (e.g., Rock Man) embody material and cognitive thresholds familiar from paleoarchaeology. Part II (The Ten Nodes of Symbolic Humanity) provides the underlying scholarly synthesis: paleoanthropological evidence for tool traditions (Acheulean, proto-Levallois), early fire control and possible pyrite-based ignition, eco-stress drivers, developmental analogs for language emergence, and the conceptual framework of symbolic nodes. By pairing narrative embodiment with annotated scientific analysis, the volume invites interdisciplinary engagement from anthropologists, educators, and readers seeking empirically grounded prehistorical imagination.

**Ten Nodes of Symbolizing Humanity** Michael A. Susko, 2024-09-06 Ten Nodes of Symbolizing Humanity applies a scientific model of logarithmic time to human cultural evolution, charting how symbolic capacity unfolded in distinct, accelerating stages over the last 8 million years. Beginning with the first hominins and culminating near the rise of civilization, this work identifies ten major nodes of symbolic emergence—from habitual bipedalism and the earliest stone tools to abstract image-making and burial of the dead. Each node is supported by archaeological and paleontological evidence and interpreted through a framework of logarithmic halving, revealing a patterned pulse of cultural and cognitive breakthroughs. This study proposes that symbolic behavior evolved in tandem with biological change and was central to the human lineage. Bridging anthropology, evolutionary theory, and systems modeling, this work invites renewed scientific inquiry into the rhythmic structure of human evolution.

*The AI Commander* James Johnson, 2024 This book addresses the largely neglected question of how the fusion of machines into the war machine will affect the human condition of warfare. It emphasizes the mind and the mechanisms of thought (intelligence, consciousness, emotion, memory, experience, etc.) to consider the effects of AI and autonomy on the human condition of war.
