Nature(s) in Construction María Lelia Pochettino, Aylen Capparelli, Pablo C. Stampella, Diego Andreoni, 2024-09-14 This book provides the state of the art of ethnobiology in Argentina and related Latin American countries, highlighting timely trends and topics. It synthesizes studies resulting from the III Jornadas Argentinas de Etnobiología y Sociedad (III JAES—3rd Argentinian Meeting of Ethnobiology and Society), convened in La Plata in 2021. As a relatively new academic development, ethnobiology integrates approaches from different points of view, such as biology, anthropology, geography, history, linguistics, and, in a crucial recent advance, local perspectives. Consequently, this volume contains 33 contributions from 86 authors of different countries, orientations, and disciplines—but all related to interrelationships between people/s and the natural environment. Chapters cover a diverse array of topics, ranging from biocultural relationships and their historical construction through time to conservation of biocultural and agrobiodiversity, ethnomycology, ethnophycology, and meliponiculture and beyond. The volume's main goal is to propitiate the preservation of biocultural diversity through the application of ethnobiological wisdom in a global context characterized by the accelerated loss of traditional knowledge. The contributions aim to transcend the nature/culture dichotomy, emphasizing the inextricable relationship between communities and their environment and the importance of acting jointly in the construction of the inhabited landscape and local identity.

Guía Clínica SoHAH | anatomía quirúrgica para especialistas en pared abdominal atlas fotográfico de disección Alfredo Moreno Egea, 2021-02-26 La anatomía es de todo... menos simple. Los textos clásicos de anatomía estaban basados en una minuciosa descripción de cada estructura. No tenían limitaciones de tiempo ni de espacio. Si un autor precisaba de toda su vida o de realizar cientos de disecciones de cadáver para exponer sus observaciones, simplemente lo hacía. Muchas vidas fueron dadas al servicio de estos conocimientos. Pero la sociedad y la ciencia fueron cambiando. La búsqueda de la sencillez, de lo general, se fue imponiendo sobre el detalle y la precisión, en una economía que limitaba, además, el espacio, la calidad y el gasto. La ciencia se fue reduciendo a manuales pequeños, con dibujos solo esenciales y muchas veces deformados para expresar aquello que se buscaba en una pequeña frase o una flecha. Las universidades perdieron la esencialidad de los conocimientos anatómicos por unos textos elaborados por profesores únicamente clínicos o por comisiones, esquemas generales, clases tipo "PowerPoint" y resúmenes, donde se fue olvidando la enseñanza directa sobre el cadáver por unas clases masificadas (o vacías) sobre una mesa digital, en el mejor de los casos.
