How to use light in a sentence. Synonym Discussion of Light. The Basics of Light - Johns Hopkins University Simply stated, light is nature's way of transferring energy through space. We can complicate it by talking about interacting electric and magnetic fields, quantum mechanics, and all of that, but just remember-- light is energy. Light travels very rapidly, but it does have a finite velocity. *Light - Learn Physics* What is Light? Light is a type of energy that enables us to see with our eyes. Light travels from a source, like the sun or a light bulb, to our eyes, and to the surroundings. That is the reason we can see objects during daytime with the sunlight, or with a light bulb in the night. **Light - Wikipedia** The main source of natural light on Earth is the Sun. Historically, another important source of light for humans has been fire, from ancient campfires to modern kerosene lamps. With the development of electric lights and power systems, electric lighting has effectively replaced firelight. *What is light? A guide to waves, particles, colour and more* Is light a wave or a particle? How is it created? And why can't humans see the whole spectrum of light? All your questions answered. *How Light Works - HowStuffWorks* But what exactly is light?
