**Anthony F. Rotatori, Jeffrey P. Bakken, Sandra Burkhardt, Festus E. Obiakor, Umesh Sharma**

*The World of the Autistic Child* Bryna Siegel, 1996 Presents guidance for parents of autistic children on understanding an autism diagnosis and deciding on the best course of action for treating and caring for a child with autism or PDD (pervasive developmental disorder).

Psychiatry of Intellectual Disability Across Cultures, 2023-10-18 Intellectual disability is a lifelong condition involving deficits in both intellectual and adaptive functioning. Individuals with intellectual disability experience a greater burden of co-occurring physical and mental illness compared to the general population, and often need a significant degree of support from healthcare professionals and carers, as well as family and friends. Additionally, their lives can be greatly influenced both positively and negatively by the cultures in which they exist, including societal attitudes, belief systems and norms. An insightful addition to the Oxford Cultural Psychiatry series, *Psychiatry of Intellectual Disability across Cultures* explores the health, support structures, and societal attitudes towards people with intellectual disabilities throughout the world. Written by international experts of intellectual disability and mental health, this comprehensive textbook covers broad topics such as anthropology, mental health, physical health, research, and sexuality. It also comprises chapters dedicated to specific geographic regions, such as Africa, America, Australasia, Europe, India, the Middle East, and the United Kingdom and Ireland.

Autism Spectrum Disorders Angi Stone-MacDonald, David F. Cihak, Dianne Zager, 2022-12-30 The fifth edition of *Autism Spectrum Disorders: Advancing Positive Practices in Education* provides readers with a comprehensive and accessible understanding of current research and evidence-based practices in autism spectrum disorders (ASD), linking research, theory, and practice. This new edition includes new chapters on trauma and co-morbidity, current trends in autism research, social media, neurodiversity, and aging in people with ASD. It also features updated content on international contexts and culturally sustaining and relevant practices. Aligned with DSM-5 diagnostic criteria, this text continues to be critical reading for students and researchers in special and inclusive education programs.

**My First Diagnose**, MY FIRST DIAGNOSE gives you a highlight on diagnosing and managing Autism Spectrum disorder and Attention deficit hyperactivity disorder. It focuses on these two because they commonly occur together. The term AuDHD is commonly used to refer to it. Navigating “My First Diagnosis provides an insightful and compassionate exploration

of the Autism diagnosis process starting with the individual then, the family and then the specialist. This book serves as a comprehensive guide for individuals, families, educators, schools and centres seeking to understand the complexities surrounding Autism Spectrum Disorder (ASD), it's diagnosis processes and management. Through a blend of research, expert insights, and research based information, the book demystifies the diagnostic journey of Autism and ADHD, addressing common misconceptions and highlighting the importance of early diagnosis and also proposes some early intervention strategies. This eBook emphasizes the significance of embracing neurodiversity and fostering environments that celebrate unique differences. Equipped with practical tips for navigating the diagnosis process, this resource aims to empower individuals, educators, schools, centres and families to advocate for diagnosis for themselves and their loved ones while promoting understanding and acceptance within their communities. Ultimately, "MY FIRST DIAGNOSE" seeks to illuminate the path toward recognising and embracing the gifts and challenges of Autistic individuals, ADHD and neurodiversity in general, paving the way for a more inclusive society.

**Cultural Anthropology** Serena Nanda,Richard L. Warms,2019-01-29 Now with SAGE Publishing! Cultural Anthropology integrates critical thinking, explores rich ethnographies, and prompts students to skillfully explore and study today's world. Readers will better understand social structures by examining themselves, their own cultures, and cultures from across the globe. Serena Nanda and Richard L. Warms show how historical studies and anthropological techniques can help students think about the nature, structure, and meaning of human societies. With a practical emphasis on areas such as medicine, forensics, and advocacy, this book takes an applied approach to anthropology. The authors cover a broad range of historical and contemporary theories and apply them to real-world global issues. The Twelfth Edition includes a wealth of new examples, along with updated statistical information and ethnographies that help students see the range of human possibilities. This title is accompanied by a complete teaching and learning package.

*Handbook of Neurodevelopmental and Genetic Disorders in Adults* Sam Goldstein,Cecil R. Reynolds,2005-08-24 While neurodevelopmental and genetic disorders are often diagnosed in childhood, understanding and managing the impact of these conditions is a lifelong challenge. This authoritative handbook presents cutting-edge knowledge to guide effective assessment and treatment throughout the adult years. Illuminated are the neurobiological bases and clinical characteristics of a broad range of conditions that affect learning and behavior as well as physical functioning and health. Following a consistent format, chapters comprehensively describe the developmental course of each disorder, the changing needs of adults, and ways to help them harness their strengths.

Being Twice Exceptional Melanie Hayes,2022-02-21 Twice exceptionality (2e) is not well understood. While many parents, educators, and professionals are working to bridge the knowledge gap and help 2e children, there is still a great deal we do not know about how life turns out for those children once they grow up. How do 2e adults deal with the complex

aspects of being an adult? What are your prospects if you are brilliant, but can't get into college? What if you fail at work because you don't know how to fit in socially? This book provides first-hand stories about the experiences of 2e adults, offering compassionate coping strategies for overcoming and rethinking the tough parts. It champions radical acceptance of 2e people and celebrates their unique outlook on the world.

**The Encultured Brain** Daniel H. Lende, Greg Downey, 2012-08-24 Basic concepts and case studies from an emerging field that investigates human capacities and pathologies at the intersection of brain and culture. The brain and the nervous system are our most cultural organs. Our nervous system is especially immature at birth, our brain disproportionately small in relation to its adult size and open to cultural sculpting at multiple levels. Recognizing this, the new field of neuroanthropology places the brain at the center of discussions about human nature and culture. Anthropology offers brain science more robust accounts of enculturation to explain observable difference in brain function; neuroscience offers anthropology evidence of neuroplasticity's role in social and cultural dynamics. This book provides a foundational text for neuroanthropology, offering basic concepts and case studies at the intersection of brain and culture. After an overview of the field and background information on recent research in biology, a series of case studies demonstrate neuroanthropology in practice. Contributors first focus on capabilities and skills—including memory in medical practice, skill acquisition in martial arts, and the role of humor in coping with breast cancer treatment and recovery—then report on problems and pathologies that range from post-traumatic stress disorder among veterans to smoking as a part of college social life. Contributors Mauro C. Balieiro, Kathryn Bouskill, Rachel S. Brezis, Benjamin Campbell, Greg Downey, José Ernesto dos Santos, William W. Dressler, Erin P. Finley, Agustín Fuentes, M. Cameron Hay, Daniel H. Lende, Katherine C. MacKinnon, Katja Pettinen, Peter G. Stromberg

**Social and Emotional Support for Autistic Students on Campus** Ken Gobbo, 2023-02-17 This book examines the social and emotional challenges faced by autistic students as they pursue their goals at colleges and universities. It explores the nature of autism, with its unique set of challenges and benefits. It views autism from the inside, through the lens of neurodiversity, a point of view from which autism and other conditions are seen as variations of a complex human nervous system, rather than disorders to be cured. Topics covered in this book include cognition and social interaction, identity development, gender, intersectionality, controversies, the challenges of living in a community, and the emergence of neurodiversity culture. The book focuses on the experience of autistic individuals during late adolescence and early adulthood. It also offers practical advice and information for those who work with autistic students.

**Understanding and Applying Medical Anthropology** Peter J. Brown, Svea Closser, 2016-07 The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students. The collection of 49 readings (17 of them new to this edition) offers extensive background

description and exposes students to the breadth of theoretical, methodological, and practical perspectives and issues in the field of medical anthropology. The text provides specific examples and case studies of research as it is applied to a range of health settings: from cross-cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings. The new edition features: • a major revision that eliminates many older readings in favor of more fresh, relevant selections; • a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health; • an updated and expanded section on “Conceptual Tools,” including new research and ideas that are currently driving the field of medical anthropology forward (such as epigenetics and syndemics); • new chapters on climate change, Ebola, PTSD among Iraq/Afghanistan veterans, eating disorders, and autism, among others; • recent articles from Margaret Mead Award winners Sera Young, Seth Holmes, and Erin Finley, along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer.

Encyclopedia of Social Deviance Craig J. Forsyth, Heith Copes, 2014-01-21 Social deviance—any behavior that violates a cultural norm—can involve something as major as crime or as minor as consistently and deliberately wearing lively mismatched socks. Whether a crime, a sin, or simply unique taste, what’s considered deviant at one time and place can change, as when extensive tattooing and body art evolved from a sideshow carnival spectacle to a nearly universal rite of passage within U.S. culture. Drawing contributions from across the social and behavioral sciences, including sociology, anthropology, criminology, politics, psychology, and religion, the Encyclopedia of Social Deviance introduces readers to the lively field of rule-making and rebellion that strikes at the core of what it means to be an individual living in a social world. Key Features: More than 300 articles authored by key figures in the field are organized A-to-Z in two volumes. Each article concludes with cross-references to related entries and further readings. A thematic Reader’s Guide groups related articles by broad areas (e.g., Concepts; Theories; Research Methodologies; Individual Deviance; Organizational Deviance; etc.) as one handy search feature on the e-Reference platform, which also includes a comprehensive index of search terms. Available in both electronic and print formats, this two-volume, A-to-Z encyclopedia set is a must-have resource for students and researchers who seek to understand social deviance. Key Themes: Crime, Property Crime, Sex Crime, Violent Crime, White-Collar/Corporate Defining Deviance Deviance in Social Institutions Deviant Subcultures Discrimination Drug Use and Abuse Marriage and Family Deviance Measuring Deviance Mental and Physical Disabilities Methodology for Studying Deviance Self-Destructive Deviance Sexual Deviance Social and Political Protest Social Control and Deviance Studying Deviant Subcultures Technology and Deviance Theories of Deviance, Macro Theories of Deviance, Micro Transitional Deviance

**Autistic Company** Ruud Hendriks, 2012 Social interactions of autistic and non-autistic persons are intriguing. In all sorts of situations people with autism are part of the daily life of those around them. Such interactions exist despite the lack of familiar ways of attuning to one another. In *Autistic Company*, the anthropologist and philosopher Ruud Hendriks—himself

trained as a care worker for young people with autism—investigates what alternative means are sometimes found by autistic and non-autistic people to establish a shared existence. Unprecedented in scholarly work on autism, the book also reflects on how to talk about these unusual ways of getting on together. Drawing on methods from both the arts and the social sciences, this study covers very diverse sources, ranging from literary works to factual writing on autism in science and advisory literature, and from autobiographical accounts to ethnographic observations in a home for autistic people. “Putting familiar concepts to a test, Autistic Company wrenches and fiddles with the very distinctions that constitute our sense of self. By doing so, Hendriks succeeds in getting closer both to autistic and non-autistic extremes, showing how thin the division between us and them really is.” -L.W. Nauta in Krisis

**The Disability Studies Reader** Lennard J. Davis, 2013 The Fourth Edition of the Disability Studies Reader breaks new ground by emphasizing the global, transgender, homonational, and posthuman conceptions of disability. Including physical disabilities, but exploring issues around pain, mental disability, and invisible disabilities, this edition explores more varieties of bodily and mental experience. New histories of the legal, social, and cultural give a broader picture of disability than ever before. Now available for the first time in eBook format 978-0-203-07788-7.

**Existential Philosophy and Disability**, 2025-05-29 This volume proposes a novel approach to engaging philosophically with disability studies. Taking as a starting point the fact that disability is an integral part of human existence, the chapters in this volume provide insight into situated, lived experiences of disability in articulation with prominent existential philosophers. Historical and theoretical perspectives bring the dominant models of understanding disability today (medical or biomedical and social) into dialogue with existential philosophical perspectives, and thematic contributions provide insight into specific disabled experiences which have historically been underrepresented in philosophy, including mental illness, addiction, severe cognitive/intellectual disability, ADHD, autism, and neurodivergent communication.

*A Formal Theory of Commonsense Psychology* Andrew S. Gordon, Jerry R. Hobbs, 2017-09-07 This book formalizes commonsense knowledge to enable artificial intelligence to understand and engage with the mental lives of people.

*Special Education International Perspectives* Anthony F. Rotatori, Jeffrey P. Bakken, Sandra Burkhardt, Festus E. Obiakor, Umesh Sharma, 2014-07-18 This volume provides an international perspective on special education issues. There is limited literature examining issues in special education from an international perspective, as such this volume will add considerably to the knowledge base across the globe.

*Nature Across Cultures* Helaine Selin, 2013-04-17 *Nature Across Cultures: Views of Nature and the Environment in Non-Western Cultures* consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Indian, Thai, and Andean views of nature and the environment, among others, the book includes essays on Environmentalism and

Images of the Other, Traditional Ecological Knowledge, Worldviews and Ecology, Rethinking the Western/non-Western Divide, and Landscape, Nature, and Culture. The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them. Each essay contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both environmental history and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

*Rethinking Sino-Japanese Alienation* Barry Buzan, Evelyn Goh, 2020-01-09 Bitterly contested memories of war, colonisation, and empire among Japan, China, and Korea have increasingly threatened regional order and security over the past three decades. In Sino-Japanese relations, identity, territory, and power pull together in a particularly lethal direction, generating dangerous tensions in both geopolitical and memory rivalries. Buzan and Goh explore a new approach to dealing with this history problem. First, they construct a more balanced and global view of China and Japan in modern world history. Second, building on this, they sketch out the possibilities for a 21st century great power bargain between them. Buzan puts Northeast Asia's history since 1840 into both a world historical and a systematic normative context, exposing the parochial nature of the China-Japan history debate in relation to what is a bigger shared story about their encounter with modernity and the West, within which their modern encounter with each other took place. Arguing that regional order will ultimately depend substantially on the relationship between these two East Asian great powers, Goh explores the conditions under which China and Japan have been able to reach strategic bargains in the course of their long historical relationship, and uses this to sketch out the main modes of agreement that might underpin a new contemporary great power bargain between them in a variety of future scenarios for the region. The frameworks adopted here consciously blend historical contextualisation, enduring concerns with wealth, power and interest, and the complex relationship between Northeast Asian states' evolving encounters with each other and with global international society.

International Review of Research in Mental Retardation, 2007-08-30 Autism Spectrum Disorder is one of the most researched and popular topics in the fields of psychology, psychiatry, and special education. In the last 30 years the amount

of new information on assessment and treatment has been astounding. The field has moved from a point where many considered the condition untreatable to the current position that it may be curable in some cases and that all persons with this condition can benefit from treatment. Intervening with school age children continues to be a major focus of assessment or intervention. However, expanding the ages of those receiving more attention from younger children to older adults, is becoming more prevalent. The consensus is that intensive treatment at the earliest recognized age is critical and that many adults evince symptoms of the disorder and warrant care. The field is full of many proposed treatments many of which offer promise but no data. Thus, a book on evidence-based assessments and interventions, across the life span should be of value in helping to sort out the more credible interventions as defined by the research and what methods have the best support. Given the popularity of the topic and the vast array of potential assessments and treatments available, this volume will be aimed at delineating what the researchers have shown has the best evidence to support particular methods. International Review of Research in Mental Retardation is now available online at ScienceDirect — full-text online of volumes 23 onwards. Elsevier book series on ScienceDirect gives multiple users throughout an institution simultaneous online access to an important compliment to primary research. Digital delivery ensures users reliable, 24-hour access to the latest peer-reviewed content. The Elsevier book series are compiled and written by the most highly regarded authors in their fields and are selected from across the globe using Elsevier's extensive researcher network.
