Critical Storytelling from behind Invisible Bars ,2020-08-17 Critical stories are narratives that recount the writer's experiences, situating those experiences in broader cultural contexts. In this volume of Critical Storytelling, marginalized, excluded, and oppressed peoples share insights from their liminality to help readers learn from their perspectives on living from behind invisible bars. Female inmates at Decatur's Correctional Center and the undergraduate Millikin University students who worked with them come together to give voice to their specific histories of living from behind invisible bars and pose important questions to the reader about inciting change for the future. Specifically, the voices in this volume seek to expose, analyze, and challenge deeply-entrenched narratives and characterizations of incarcerated women, whose histories are often marked by sexual abuse, domestic violence, poverty, PTSD, a lack of education, housing insecurity, mental illness, and substance addiction. These silenced female inmate voices need to be heard and contextualized within the larger metanarrative of prison literature. Through telling critical stories, these writers attempt to: sustain recovery from trauma, make positive changes and informed decisions, create a real sense of empowerment, strengthen their capacity to exercise personal agency, and inspire audiences to create change far outside the reaches of physical and metaphorical bars. Contributors are: Anonymous, Soren Belle, Megan Batty, Dwight G. Brown, Jr., Sandra Brown, Kathryn Coffey, Kelly Cunningham, Paiten Hamilton, Kathlyn J. Housh, Rebekah Icenese, Kala Keller, Jelisa Lovette, Bric Martin, Amanda Minetti, Laura Nearing, Angie Oaks, Claire Prendergast, Cara Quiett, J. M. Spence, Noah Villarreal and Alisha Walker.

Care, Power, Information Alexander Stigl, 2019-12-05 This book is a critique and provincialization of Western social science and Global Northern academia, by the author of *The Digital Coloniality of Power*. It exposes shared colonial and extractive rationalities and histories of research, higher education, digitalization, and bioeconomy while proposing in the idea of BluesCollarship, a sketch for an alternative culture of worlding and commoning knowledge work and for making care matter in research and higher education. In a discourse analysis and provincialization of research and higher education, a tradition of elitist White-Collaredness in academia and in the social sciences, in particular, is criticized, and an alternative attitude towards the production, transfer, and use of knowledge – BluesCollarship – is proposed. The latter is rooted in a different idea of what infrastructure is, and in practices of decoloniality. Noting the current political climate of propaganda and populism, the persistence of social inequalities as well as of racism and misogyny, it is proposed that how people give warrant for knowledge claims should be reviewed under different terms. A coherent theme is that there is a genealogical root for current neo-extractive and neo-colonial rationalities in the Athenian idea of *oikos*, which conflates family, household, and property. In taking a distinctly writerly approach – rather than giving ready-made answers – the book aims at permanently provoking readers at every turn to think further, as well as before-and-beyond what is written, but to do so in thinking together with Others. Thus the book addresses scholars and students from across the social sciences who seek challenges to established ways of thinking in academia without simply replacing one canon for another. This book is for those who think of themselves as knowledge and culture laborers in this age of precarization, who seek to replace the university and cognitive capitalism with a pluriversity and an infrastructure built on knowledge and culture as fundamental values.

Starry Messenger Neil deGrasse Tyson, 2022-09-20 NEW YORK TIMES BESTSELLER Bringing his cosmic perspective to civilization on Earth, Neil deGrasse Tyson shines new light on the crucial fault lines of our time—war, politics, religion, truth, beauty, gender, and race—in a way that stimulates a deeper sense of unity for us all. In a time when our political and cultural views feel more polarized than ever, Tyson provides a much-needed antidote to so much of what divides us, while making a passionate case for the twin chariots of enlightenment—a cosmic perspective and the rationality of science. After thinking

deeply about how science sees the world and about Earth as a planet, the human brain has the capacity to reset and recalibrates life's priorities, shaping the actions we might take in response. No outlook on culture, society, or civilization remains untouched. With crystalline prose, *Starry Messenger* walks us through the scientific palette that sees and paints the world differently. From insights on resolving global conflict to reminders of how precious it is to be alive, Tyson reveals, with warmth and eloquence, an array of brilliant and beautiful truths that apply to us all, informed and enlightened by knowledge of our place in the universe.

Starstruck Kathleen Krull, Paul Brewer, 2020-09-08 A picture-book biography about science superstar Neil deGrasse Tyson, the groundbreaking American astrophysicist whose work has inspired a generation of young scientists and astronomers to reach for the stars! Perfect for STEM curricula and readers of all ages. Young Neil deGrasse Tyson was starstruck when he first visited the sky theater at the Hayden Planetarium in New York City. He couldn't believe the crowded, glittering night sky at the planetarium was real--until a visit to the country years later revealed the impossible. That discovery was like rocket fuel for Neil's passion about space. His quest for knowledge took him from the roof of his apartment building to a science expedition in northwest Africa, to a summer astronomy camp beneath a desert sky, and finally back

home to become the director of the Hayden Planetarium, where it all began. Before long, Neil became America's favorite guide to the cosmos. This story of how one boy's quest for knowledge about space leads him to become a star astrophysicist is perfect for young readers who are fascinated by the universe, aspiring scientists, and the dreamer in all of us. It will ignite your own sense of wonder.

Richard Gott taught together at Princeton, this book covers it all—from planets, stars, and galaxies to black holes, wormholes, and time travel. Describing the latest discoveries in astrophysics, the informative and entertaining narrative propels you from our home solar system to the outermost frontiers of space. How do stars live and die? Why did Pluto lose its planetary status? What are the prospects of intelligent life elsewhere in the universe? How did the universe begin? Why is it expanding and why is its expansion accelerating? Is our universe alone or part of an infinite multiverse? Answering these and many other questions, the authors open your eyes to the wonders of the cosmos, sharing their knowledge of how the universe works. Breathtaking in scope and stunningly illustrated throughout, Welcome to the Universe is for those who hunger for insights into our evolving universe that only world-class astrophysicists can provide.

Vesmírný posel Neil deGrasse Tyson, 2023 Vesmírný posel je prozářen originální básnickou představivostí, ale zároveň nese nezaměnitelnou pečeť Tysonovy racionální mysli inspirované matematikou a vědou. Znáte ty knihy, které se snažíte číst co nejpomaleji, protože nechcete, aby někdy skončily? Vesmírný posel (Starry Messenger: Cosmic Perspectives on Civilization) je rozhodně jednou z nich. Aby Neil deGrasse Tyson ukázal absurditu stereotypizace, naplnil svou novou knihu myšlenkovými experimenty. Díky nim zjistíte, jak hloupé je dělení lidí podle barvy pleti, sexuality, politického názoru nebo nekonzumace masa. Ono je totiž strašně snadné nalepit na kohokoliiv neznámého nálepku jen proto, že jsme se rozhodli, že o něm vlastně víme všechno. Pojďme zkusit převrátit způsob, jakým přemýšlíme, a začít racionalizovat, než abychom informace jen emocionálně přijímali. V době, kdy se naše politické a kulturní názory zdají být polarizovanější než kdy jindy, nabízí Tyson ve své knize tolik potřebný protilek na mnohé z toho, co nás rozděluje. Zároveň vášnivě obhájí dvojí podstatu osvětlení – vesmírnou perspektivu a racionalitu vědy. Nejedná se ale o klasickou knihu o astrofyzice, jak bychom pravděpodobně od autora očekávali. Budete možná překvapeni, ale Tysonovy úvahy se pohybují spíše v oblasti filozofie. I když vědu zcela neopouští – ptá se, jak ve spolupráci s kosmickou perspektivou mění náš náhled na nás samé. Opravdu jsme „pány tvorstva“, jak si naše savčí mozky o sobě rády myslí? S kým by si raději promluvili hypotetičtí návštěvníci z vesmíru – s člověkem, rostlinou, nebo s kolonií mravenců? Odpověď vás možná překvapí... Vesmírný posel nás citlivě provází po vědecké paletě,

která svět vykresluje jinak, než jak jsme zvyklí jej vnímat. Tyson s vřelostí a výmluvností sobě vlastní odhaluje řadu překvapivých pravd, od postřehů o řešení globálních konfliktů až po připomenutí, jak vzácné je být naživu.
