*Saudade* Irenay Stevens, 2016-08-17 Have you ever felt at a loss for words? Like there wasn't a word invented for the situation or emotion you were experiencing? That was exactly how I felt. After you were gone there was nothing I could say to express the way I felt. Empty? Broken? Hollow? None of those words began to describe what was going on inside my heart. People say all wounds heal with time. That was not my experience, as time passed the longing for you became more intense. I was sure something was wrong with me. How could I love you when you were not even there? When I wasn't even sure of your existence? I stumbled on a word that I never heard of before. It was a silly article that popped up while I was doing research online. *Saudade: The Untranslatable Word Everyone Sings About*. I was intrigued by this and as a teacher of a language wanted to know more. It turned out it is a Portuguese word that is defined as a melancholy nostalgia. There are many different definitions for this word there was one that I thought was most appropriate. The love that remains.

*Making Changes in STEM Education* Julia M. Williams, 2023-06-02 Many science, engineering, technology, and math (STEM) faculty wish to make an academic change at the course, department, college, or university level, but they lack the specific tools and training that can help them achieve the changes they desire. *Making Changes in STEM Education: The Change Maker's Toolkit* is a practical guide based on academic change research and designed to equip STEM faculty and administrators with the skills necessary to accomplish their academic change goals. Each tool is categorized by a dominant theme in change work, such as opportunities for change, strategic vision, communication, teamwork, stakeholders, and partnerships, and is presented in context by the author, herself a change leader in STEM. In addition, the author provides interviews with STEM faculty and leaders who are engaged in their own change projects, offering additional insight into how the tools can be applied to a variety of educational contexts. The book is ideal for STEM faculty who are working to change their courses, curricula, departments, and campuses and STEM administrators who lead such change work to support their faculties, as well as graduate students in STEM who plan to enter an academic position upon graduation and expect to work on academic change projects.
