**The Enigma of Piero** Carlo Ginzburg, 2002-08-17 Sifting the available evidence, Carlo Ginzburg builds up a vivid portrait of Piero della Francesca's patrons and convincingly explains the contemporary intrigues resonant in his painting. This new edition, extensively illustrated, includes additional material by Ginzburg dealing with the work of Roberto Longhi, the dating of the Arezzo Cycle, and the rediscovery of della Francesca in the twentieth century.

**Roma Felix - Formation and Reflections of Medieval Rome** Éamonn Ó Carragáin, Carol Neuman de Vegvar, 2016-12-05 After the Roman empire fell, medieval Europe continued to be fascinated by Rome itself, the 'chief of cities'. Once the hub of empire, in the early medieval period Rome became an important centre for western Christianity, first of all as the place where Peter, Paul and many other important early Christian saints were martyred: their deaths for the Christian faith gave the city the appellation 'Roma Felix', 'Happy Rome'. But in Rome the history of the faith, embodied in the shrines of the martyrs, coexisted with the living centre of the western Latin church. Because Peter had been recognised by Christ as chief among the apostles and was understood to have been the first bishop of Rome, his successors were acknowledged as patriarchs of the West and Rome became the focal point around which the western Latin church came to be organised. This book explores ways in which Rome itself was preserved, envisioned, and transformed by its residents, and also by the many pilgrims who flocked to the shrines of the martyrs. It considers how northern European cultures (in particular, the Irish and English) imagined and imitated the city as they understood it. The fourteen articles presented here range from the fourth to the twelfth century and span the fields of history, art history, urban topography, liturgical studies and numismatics. They provide an introduction to current thinking about the ways in which medieval people responded to the material remains of Rome's classical and early Christian past, and to the associations of centrality, spirituality, and authority which the city of Rome embodied for the earlier Middle Ages. *Medieval Rome* Chris Wickham, 2015 *Medieval Rome* analyses the history of the city of Rome between 900 and 1150, a period of major change in the city. This volume doesn't merely seek to tell the story of the city from the traditional Church standpoint; instead, it engages in studies of the city's processions, material culture, legal transformations, and sense of the

past, seeking to unravel the complexities of Roman cultural identity, including its urban economy, social history as seen across the different strata of society, and the articulation between the city's regions. This new approach serves to underpin a major reinterpretation of Rome's political history in the era of the reform papacy, one of the greatest crises in Rome's history, which had a resonance across the entire continent. Medieval Rome is the most systematic analysis ever made of two and a half centuries of Rome's history, one which saw centuries of stability undermined by external crisis and the long period of reconstruction which followed.

**The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum** Cristina González-Longo, 2020-12-29 This book examines the influence of architectural design in the conservation of historic buildings by discussing in detail an important building complex in Rome: the Temple of Venus and Rome, the monastery of Santa Maria Nova and the church of Santa Francesca Romana. As the most complete site in the Roman Forum that has reached our times with a rich architectural stratification almost intact, it is a clear product of continuous preservation and transformation and it has not been studied in its complexity until now. The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum unravels the original designs and the subsequent interventions, including Giacomo Boni's pioneering conservation of the monastery, carried out while excavating the Roman Forum in the early twentieth century. The projects are discussed in context to show their significance and the relationships between architects and patrons. Through its interdisciplinary focus on architectural design, conservation, archaeology, history and construction, this study is an ideal example for scholars, students and architects of how to carry out research in architectural conservation.

Rome, Ravenna, and Venice, 750-1000 Veronica West-Harling, 2020-08-20 The richest and most politically complex regions in Italy in the earliest middle ages were the Byzantine sections of the peninsula, thanks to their links with the most coherent early medieval state, the Byzantine empire. This comparative study of the histories of Rome, Ravenna, and Venice examines their common Byzantine past, since all three escaped incorporation into the Lombard kingdom in the late 7th and early 8th centuries. By 750, however, Rome and Ravenna's political links with the Byzantine Empire had been irrevocably severed. Thus, did these cities remain socially and culturally heirs of Byzantium? How did their political structures, social organisation, material culture, and identities change? Did they become part of the Western political and ideological framework of Italy? This study identifies and analyses the ways in which each of these cities preserved the structures of the Late Antique social and cultural world; or in which they adapted each and every element available to them to their own needs, at various times and in various ways, to create a new identity based partly on their Roman heritage and partly on their growing integration with the rest of medieval Italy. It tells a story which encompasses the main contemporary narratives, documentary evidence, recent archaeological discoveries, and discussions on art history; it follows the markers of status and identity through titles, names, ethnic groups, liturgy and ritual, foundation myths, representations, symbols, and

topographies of power to shed light on a relatively little known area of early medieval Italian history.

**Reclaiming Rome** Carol M. Richardson, 2009 The fifteenth century was a critical juncture for the College of Cardinals. They were accused of prolonging the exile in Avignon and causing the schism. At the councils at the beginning of the period their very existence was questioned. They rebuilt their relationship with the popes by playing a fundamental part in reclaiming Rome when the papacy returned to its city in 1420. Because their careers were usually much longer than that of an individual pope, the cardinals combined to form a much more effective force for restoring Rome. In this book, shifting focus from the popes to the cardinals sheds new light on a relatively unknown period for Renaissance art history and the history of Rome. Dr. Carol M. Richardson has been awarded the Philip Leverhulme Prize (2008) in the field of History of Arts.

**Rome** Paul Balchin, 2020-10-28 First published in 2017, *Rome: The Shaping of Three Capitals* explores the impact of political history on the built environment of the Eternal City. The book divides Rome's history into three main periods: the rulership of the early kings from the 8th to the 6th centuries BC; the period of Etruscan culture and architecture up to the end of the Roman Empire in 5th century AD; and, the 6th century to 1870, when Rome stood as the ecclesiastical capital of the Catholic Church and the temporal state of the Papal States. The final section of the book examines the Risorgimento, the unification of Italy, and the development of the fascist state; a time when Rome became the capital of Italy and endeavoured to establish a new empire. Exploring political instability and change, Balchin demonstrates the strong connection between politics and the physical shaping of the city through an examination of the successive styles of architecture, from Classical to Modernist.

*The Art of Discovery* Maren Elisabeth Schwab, Anthony Grafton, 2025-01-28 A panoramic history of the antiquarians whose discoveries transformed Renaissance culture and gave rise to new forms of art and knowledge. In the early fifteenth century, a casket containing the remains of the Roman historian Livy was unearthed at a Benedictine abbey in Padua. The find was greeted with the same enthusiasm as the bones of a Christian saint, and established a pattern that antiquarians would follow for centuries to come. *The Art of Discovery* tells the stories of the Renaissance antiquarians who turned material remains of the ancient world into sources for scholars and artists, inspirations for palaces and churches, and objects of pilgrimage and devotion. Maren Elisabeth Schwab and Anthony Grafton bring to life some of the most spectacular finds of the age, such as Nero's Golden House and the wooden placard that was supposedly nailed to the True Cross. They take readers into basements, caves, and cisterns, explaining how digs were undertaken and shedding light on the methods antiquarians—and the alchemists and craftspeople they consulted—used to interpret them. What emerges is not an origin story for modern archaeology or art history but rather an account of how early modern artisanal skills and technical expertise

were used to create new knowledge about the past and inspire new forms of art, scholarship, and devotion in the present. The Art of Discovery challenges the notion that Renaissance antiquarianism was strictly a secular enterprise, revealing how the rediscovery of Christian relics and the bones of martyrs helped give rise to highly interdisciplinary ways of examining and authenticating objects of all kinds.

**Death and the Emperor** Penelope J. E. Davies, 2010-06-28 The role of monuments in the Roman imperial cult. “Davies sets out to ask, How did the Romans bury Caesar? And with what monuments did they sing his praises? . . . The architectural elaboration of these structures, their siting in the capital, the lines of vision and approaches that exposed them to view, the paths their complex outworks formed for visitors to walk, are all picked out with skill and presented with care in *Death and the Emperor*.” Times Literary Supplement “This concise and lucidly written book is a very valuable new contribution to the studies of Roman imperial cult, political propaganda, and topography, and has the added benefit of discussing complex scholarly disputes in a manner that the non-specialist will probably follow with ease. . . . There is material in this volume that will be immensely useful to researchers in many areas: archaeology, history of architecture, iconography, history of religion, and Roman political propaganda, to name just a few. I strongly recommend it to scholars interested in any or all of the above topics.” Bryn Mawr Classical Review “Even though its focus is on only seven specimens of architecture, the book touches upon a broad array of aspects of Roman imperial culture. Elegantly written and generously illustrated . . . this book should be of great interest to the general public as well as to the scholarly community.” American Journal of Archaeology

*The Sacred Architecture of Byzantium* Nicholas N. Patricios, 2014-04-24 The churches of the Byzantine era were built to represent heaven on earth. Architecture, art and liturgy were intertwined in them to a degree that has never been replicated elsewhere, and the symbolism of this relationship had deep and profound meanings. Sacred buildings and their spiritual art underpinned the Eastern liturgical rites, which in turn influenced architectural design and the decoration which accompanied it. Nicholas N Patricios here offers a comprehensive survey, from the age of Constantine to the fall of Constantinople, of the nexus between buildings, worship and art. His identification of seven distinct Byzantine church types, based on a close analysis of 370 church building plans, will have considerable appeal to Byzantinists, lay and scholarly. Beyond categorizing and describing the churches themselves, which are richly illustrated with photographs, plans and diagrams, the author interprets the sacred liturgy that took place within these holy buildings, tracing the development of the worship in conjunction with architectural advances made up to the 15th century. Focusing on buildings located in twenty-two

different locations, this sumptuous book is an essential guide to individual features such as the synthronon, templon and ambo and also to the wider significance of Byzantine art and architecture.

**Rome's Holy Mountain** Jason Moralee, 2018 Rome's Holy Mountain is the first book to chart the history of the Capitoline Hill in Late Antiquity, from the third to the seventh centuries CE. It investigates both the lived-in and dreamed-of realities of the hill in an era of fundamental political, religious, and social change.

**Rome** Amanda Claridge, Judith Toms, Tony Cubberley, 2010 The ultimate guide to all the important archaeological sites in the city of Rome from the period 800 BC to AD 600, with over 200 site maps, plans, and photographs.

**Rome** Richard Krautheimer, 2000-04-09 Rome has long held an attraction as one of the world's great cultural, religious, and intellectual centers. In this classic study, surveying the city's life from Christian Antiquity through the Middle Ages, Richard Krautheimer focuses on monuments of art and architecture as they reflect the historical events, the ideological currents, and the meaning Rome held for its contemporaries. Lavishly illustrated, this book tells an intriguing story in which the heritage of antiquity intertwines with the living presence of Christianity. Written by one of the great art historians of our time, it offers a profile of the Eternal City unlike any drawn in the past or likely to be drawn in the future.
