The First Wave Gillian Dooley, Danielle Clode, 2019-06-20 The European maritime explorers who first visited the bays and

beaches of Australia brought with them diverse assumptions about the inhabitants of the country, most of them based on sketchy or non-existent knowledge, contemporary theories like the idea of the noble savage, and an automatic belief in the superiority of European civilisation. Mutual misunderstanding was almost universal, whether it resulted in violence or apparently friendly transactions. Written for a general audience, *The First Wave* brings together a variety of contributions from thought-provoking writers, including both original research and creative work. Our contributors explore the dynamics of these early encounters, from Indigenous cosmological perspectives and European history of ideas, from representations in art and literature to the role of animals, food and fire in mediating first contact encounters, and Indigenous agency in exploration and shipwrecks. *The First Wave* includes poetry by Yankunytjatjara Aboriginal poet Ali Cobby Eckermann, fiction by Miles Franklin award-winning Noongar author Kim Scott and Danielle Clode, and an account of the arrival of Christian missionaries in the Torres Strait Islands by Torres Strait political leader George Mye.

In the Herbarium Maura C. Flannery, 2023-01-01 How herbaria illuminate the past and future of plant science Collections of preserved plant specimens, known as herbaria, have existed for nearly five centuries. These pressed and labeled plants have been essential resources for scientists, allowing them to describe and differentiate species and to document and research plant changes and biodiversity over time--including changes related to climate. Maura C. Flannery

tells the history of herbaria, from the earliest collections belonging to such advocates of the technique as sixteenth-century botanist Luca Ghini, to the collections of poets, politicians, and painters, and to the digitization of these precious specimens today. She charts the growth of herbaria during the Age of Exploration, the development of classification systems to organize the collections, and herbaria's indispensable role in the tracking of climate change and molecular evolution. Herbaria also have historical, aesthetic, cultural, and ethnobotanical value--these preserved plants can be linked to the Indigenous peoples who used them, the collectors who sought them out, and the scientists who studied them. This book testifies to the central role of herbaria in the history of plant study and to their continued value, not only to biologists but to entirely new users as well: gardeners, artists, students, and citizen-scientists.

A Shot of History: Attack on Sydney Harbour Doctor Tom Lewis,2022-07-08 On the night of 31 May 1942, Sydney Harbour was attacked by midget submarines of the Imperial Japanese Navy. An accommodation vessel of the Royal Australian Navy was torpedoed, and 21 sailors died. The midget submarines were hunted down, and two sunk. War had already come to northern Australia, and now the southern cities were made bitterly aware that the world-wide conflict had reached them. The midget submarine attack was only the beginning: gun strikes were made against land targets, and more enemy submarines came south, attacking freighters up and down the continent's eastern coast. This new accounting of the

night Sydney Harbour was attacked reveals new details of the fight that ensued and sets some of the previous historical accounts right. The text is supported by numerous photos as well as extensive plans of the midget submarines, and details of the curious stories following the war, including the discovery of the third midget submarine, sunk off the New South Wales coast.

The Evolution of Social Institutions Dmitri M. Bondarenko,Stephen A. Kowalewski,David B. Small,2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World, from prehistory to the present. This approach is based on examining social evolution through the evolution of social institutions. Evolution is defined as the process of structural change. Within this framework the society, or culture, is seen as a system composed of a vast number of social institutions that are constantly interacting and changing. As a result, the structure of society as a whole is also evolving and changing. The authors posit that the combination of evolving social institutions explains the non-linear character of social evolution and that every society develops along its own pathway and pace. Within this framework, society should be seen as the result of the compound effect of the interactions of social institutions specific to it. Further, the transformation of social institutions and relations between them is taking place not only within individual societies but also globally, as institutions may be trans-societal, and even institutions that operate in one society can arise as a reaction to trans-societal trends and demands. The book argues that it may be more productive to look at institutions even within a given society as being parts of trans-societal systems of institutions since, despite their interconnectedness, societies still have boundaries, which their members usually know and respect. Accordingly, the book is a must-read for researchers and scholars in various disciplines who are interested in a better understanding of the origins, history, successes and failures of social institutions.

Pitcairn Island as a Port of Call Herbert Ford,2014-01-10 Pitcairn Island is arguably the most isolated inhabited spot on Earth. Yet despite tricky ocean currents, often lethal surf and sudden gales, the island's standing as the home of the descendants of Fletcher Christian and his mutineer cohorts from H.M.S. Bounty has drawn thousands of ships to its shores. This maritime history of the island chronicles every ship that has called at Pitcairn from the time of the arrival of the mutineers in 1790 to December 2010. The ship's log format lists the date of each call, the ship's name and particulars, and brief reports of activities during the call, which often include matters of love, murder, survival, intrigue, shipwreck, romance,

and much more. Since Pitcairn remains totally dependent on ships for its survival, this work offers the most thorough historical record of the island and its people.
