Physical Medicine and Rehabilitation Oral Board Review R. Samuel Mayer,2017-09-28 Physical Medicine and Rehabilitation Oral Board Review is the first publication devoted to preparing for the ABPMR Part II certification examination. This interactive workbook contains 68 cases drawn from all major topic areas identified on the oral exam outline. The vignettes set up common physiatric problems and are structured to walk you through the types of questions you will encounter and frame meaningful responses to real-life scenarios. Cases are formatted to simulate a discussion between an examiner and examinee, presenting a focused approach that directs the candidate to the most appropriate answers. Each case contains questions covering the five clinical skills measured on the oral boards: data acquisition, problem solving, patient management, systems-based practice, and interpersonal communication skills and professionalism. Using a question and response format that actively engages readers, the book is designed to foster a systematic approach to clinical questions that can be applied to any case so you can think on your feet, understand the goal of the prompts, and respond effectively--whether in an exam situation, or at the bedside. Key Features Structured to help build skills and confidence necessary for success on the PM&R oral board exam (Part II) Representative case scenarios cover all diagnostic categories; every case contains questions corresponding to the 5 clinical competencies measured on the exam Unique interactive format with conversational question and answer vignettes for individual or group study Expert authors from many of the leading national programs Includes downloadable ebook for anytime access on mobile devices

Geriatric Rehabilitation K. Rao Poduri, 2017-03-16 Geriatric Rehabilitation addresses the fact that this is an age in which individuals have increasing longevity, better health care, education and expectations of health care which present new, increasing and even radical challenges to health care providers. The care of our older patients in rehabilitation settings demands the broad understanding of the key differences in strategies to care for older adults. The combined skills embraced in rehabilitation and geriatrics are presenting unprecedented opportunities for both fields to make substantive and even ground-breaking improvements in the lives of millions of older adults who entrust their lives to us. Rarely in one's medical career are such opportunities so evident and achievable. Geriatric Rehabilitation edited by Dr. K. Rao Poduri, MD. FAAPMR draws on a distinguished group of authors who are the front-line providers of care to the older adults. This book presents the full spectrum of the unique care needs of older patients who need the combined skills of physical medicine and geriatrics. It provides an easily accessible means of acquiring and improving these new skills for all those involved in geriatric care.

Acquired Brain Injury Jean Elbaum, Deborah Benson, 2007-08-08 Regardless of etiology, such as accident, tumor, stroke or assault, acquired brain injury presents numerous challenges for survivors, caregivers and treating professionals. Interdisciplinary and integrated evaluations, treatment, and management can mean the difference between successful recovery and unfortunate outcomes. The first book to present a comprehensive team approach to rehabilitation of ABI survivors, Acquired Brain Injury gives medical and clinical specialists a deeper understanding of not only each other's roles, but also their complementary functions. -The medical management of ABI—neurosurgery, neurology, physiatry—and the medical specialties involved—neuropsychiatry, neurourology and neurooptometry -In-depth discussion of the roles of occupational, speech-language, and balance rehabilitation -Separate chapters on nursing, neuropsychology, and case management -Behavioral and emotional challenges common to individuals with ABI -The importance of addressing family needs -Long-term challenges -Case examples throughout illustrating a wide range of injuries, symptoms, and stages of recovery Based on the editors' combined experience of more than 40 years in the neuro-rehabilitation field, this comprehensive volume clarifies rehabilitation goals and processes for the physician, rehab specialist, the advanced student, and patients' advocates. With ABI so prevalent—roughly 1.5 million new cases per year—this book couldn't be more timely.
