Psychiatry and Neuroscience Update - Vol. V Pascual Ángel Gargiulo, Humberto Luis Mesones-Arroyo, 2024-12-28 This book offers a multidisciplinary approach to the phenomenon of addiction, including a discussion of its anthropological, neurological, psychiatric and social aspects. The editors have maintained this multidisciplinary criterion since the first volume of the Psychiatry and Neuroscience Update collection. Approaching a topic from multiple points of view guides the mentality to open to biological and psychological relationships and facilitates translational extrapolations. The ability to establish relationships, closer or more distant, but always binding, is thus stimulated, whether for study, research or the interpretation of clinical reality. As in previous volumes, the book opens with a part dedicated to anthropological and philosophical aspects, thus ensuring the validity of the humanistic aspect. Intersubjectivity, epistemological reflections, the meaning of ecstasy, and philosophical reflection leading to therapy are explored. Part 2—From Basic Neurosciences to Human Brain—presents a set of basic investigations with high translational content. This corresponds with the editors' intention to build bridges, here between the basic and the clinical, favoring the translational. Chapters present topics of interest to both fields, such as the neurobiology of addictions, cocaine, and benzodiazepines. Part 3 establishes links between neurosciences, learning, teaching, and the social environment. It begins with a chapter on executive functioning before

discussing excessive use of computer technology and educational interventions for patients with alcohol addiction. The fourth part of the book attempts to explain pathological human behavior. It is about establishing links between brain disorders and diseases in the strict sense. Among other topics, chapters deal with cognitive dysfunction in addiction, neuroimaging, and stigma around substance use disorders. Psychiatry and Neuroscience Update: Addiction: From Laboratory and Anthropology to Clinical Practice - Vol. V was edited and authored by a multidisciplinary group of authors and will be vital for an equally multidisciplinary group of readers: psychiatrists, psychologists, neuroscientists, and any other clinician or researcher that is interested in addictions. Those in the humanities, particularly anthropologists and philosophers, will find the first part of great interest.

La evaluación como proceso en la educación superior : una apuesta desde la sistematización de experiencias

significativas Emma Margarita Wong Fajardo, Luisa Fernanda Acuña Beltrán, Yasbley Segovia Cifuentes, Rosa Jeuna Diaz Manchay, Gerardo Chunga Chinguel, Lisseth Dolores Rodríguez Cruz, Luis Enrique Pérez Guevara, Elaine Lázaro Alcántara, Flor de María Mogollón Torres, Yrma Lily Campos Bravo, Juan Antonio Torres Benavides, Miriam de Jesús Arellanos Tafur, Maribel Díaz Vásquez, Julia Nureña Montenegro, Eda Yolanda Sánchez Oliva, María Teresa Sánchez Julca, Miguel Ángel Torres Rubio, 2020-10-22 Dado el lugar preponderante que ha ido ganando el desarrollo y fortalecimiento de competencias en los estudiantes que se preparan como futuros profesionales, así como la manera de evidenciar el avance de dichas competencias, la evaluación de los aprendizajes en la educación superior constituye un tema que reviste cada vez mayor relevancia. En este sentido, las nuevas tendencias y teorías sobre evaluación de los aprendizajes, abordan el rol central que esta tiene, como elemento constitutivo fundamental para la mejora de los procesos de enseñanza y aprendizaje, resignificando importantes interrogantes sobre el contexto y significado de la evaluación, como, por ejemplo, qué evaluar, cuál es su sentido real tanto para los estudiantes como para los docentes, para qué y por qué evaluar, cuándo evaluar, entre otros. Desde esta nueva mirada sobre la evaluación, la Universidad Católica Santo Toribio de Mogrovejo, usat, de Chiclayo, Perú, viene definiendo desde hace varios años su plan de formación docente, identificando para ello las necesidades de capacitación más relevantes, y encontrando la evaluación de los aprendizajes como una de las temáticas más pertinentes y necesarias de formación y actualización profesional de los profesores. En consecuencia, en el año 2019, en alianza con un equipo profesional de la Universidad de La Sabana de Colombia, en el marco del convenio entre las instituciones, fue diseñado un plan de capacitación para los profesores de la usat en evaluación por competencias, acompañado de un proceso de identificación y sistematización de experiencias significativas, orientadas a transformar procesos y prácticas evaluativas de profesores de la universidad. Así las cosas, se postularon catorce profesores quienes lideran ocho experiencias en evaluación, para sistematizar sus proyectos y visibilizar así el conocimiento pedagógico que se ha generado desde su práctica docente. Se llevó a cabo, entonces, un proceso de formación y acompañamiento, durante el año 2019, en la sistematización de experiencias como alternativa investigativa, que derivó en el presente libro.

El texto en psicología jurídica divide los procesos judiciales por procesos mentales y describe detalladamente cada uno de ellos brindándoles al estudiante y al psicólogo profesional la oportunidad de aproximarse a esta rama poco definida de la psicología actual. La obra aborda magistralmente desde el punto de vista psicológico al juez, al enjuiciado y al proceso del juicio describiendo las

estrategias y aproximaciones que el psicólogo debe afrontar al trabajar con cada uno de los componentes.
