Medicine at the Margins Christopher Prener,2022-12-06 Presents a unique view of social problems and conflicts over urban space from the cab of an ambulance. While we imagine ambulances as a site for critical care, the reality is far more complicated. Social problems, like homelessness, substance abuse, and the health consequences of poverty, are encountered every day by Emergency Medical Services (EMS) workers. Written from the lens of a sociologist who speaks with the fluency of a former Emergency Medical Technician (EMT), Medicine at the Margins delves deeply into the world of EMTs and paramedics in American cities, an understudied element of our health care system. Like the public hospital, the EMS system

is a key but misunderstood part of our system of last resort. *Medicine at the Margins* presents a unique prism through which urban social problems, the health care system, and the struggling social safety net refract and intersect in largely unseen ways. Author Christopher Prener examines the forms of marginality that capture the reality of urban EMS work and showcases the unique view EMS providers have of American urban life. The rise of neighborhood stigma and the consequences it holds for patients who are assumed by providers to be malingering is critical for understanding not just the phenomenon of non- or sub-acute patient calls but also why they matter for all patients. This sense of marginality is a defining feature of the experience of EMS work and is a statement about the patient population whom urban EMS providers care for daily. Prener argues that the pre-hospital health care system needs to embrace its role in the social safety net and how EMSs' future is in community practice of paramedicine, a part of a broader mandate of pre-hospital health care. By leaning into this work, EMS providers are uniquely positioned to deliver on the promise of community medicine. At a time when we are considering how to rely less on policing, the EMS system is already tasked with treating many of the social problems we think would benefit from less involvement with law involvement. *Medicine at the Margins* underscores why the EMS system is so necessary and the ways in which it can be expanded.

Untranslatability Duncan Large, Motoko Akashi, Wanda Józwickowska, Emily Rose, 2018-07-27 This volume is the first of its kind to explore the notion of untranslatability from a wide variety of interdisciplinary perspectives and its implications within the broader context of translation studies. Featuring contributions from both leading authorities and emerging scholars in the field, the book looks to go beyond traditional comparisons of target texts and their sources to more rigorously investigate the myriad ways in which the term untranslatability is both conceptualized and applied. The first half of the volume focuses on untranslatability as a theoretical or philosophical construct, both to ground and extend the term's conceptual remit, while the second half is composed of case studies in which the term is applied and contextualized in a diverse set of literary text types and genres, including poetry, philosophical works, song lyrics, memoir, and scripture. A final chapter examines untranslatability in the real world and the challenges it brings in practical contexts. Extending the conversation in this burgeoning contemporary debate, this volume is key reading for graduate students and researchers in translation studies, comparative literature, gender studies, and philosophy of language. The editors are grateful to the University of East Anglia

Faculty of Arts and Humanities, who supported the book with a publication grant.

Fear of Enemies and Collective Action Ioannis D. Evrigenis, 2007-12-03 What makes individuals with divergent and often conflicting interests join together and act in unison? By drawing on the fear of external threats, this book develops a theory of 'negative association' that examines the dynamics captured by the maxim 'The enemy of my enemy is my friend'. It then traces its role from Greek and Roman political thought, through Machiavelli and the reason of state thinkers, and Hobbes and his emulators and critics, to the realists of the twentieth century. By focusing on the role of fear and enmity in the formation of individual and group identity, this book reveals an important tradition in the history of political thought and offers insights into texts that are considered familiar. This book demonstrates that the fear of external threats is an essential element of the formation and preservation of political groups and that its absence renders political association unsustainable.

On Display Anna Smith, Lydia Wevers, 2004 A group of New Zealand's leading cultural studies scholars provide their perspectives on the politics of display in this thought-provoking collection of essays. Philip Armstrong, Roger Blackley, Kyla McFarlane, Annie Potts, and Paul Williams, among others, showcase their thinking about cultural activities--looking and showing, viewing and arranging--that are deeply embedded in ideology. From the antique plaster casts held by Auckland Museum to the wild foods on New Zealand's West Coast, the essays pursue a variety of trajectories on how New Zealanders display themselves and what they profess and contest in their collective representations.

Breaking the Rules Marcia Hill, Judith Harden, 2018-10-24 Breaking the Rules: Women in Prison and Feminist Therapy challenges therapists, public policymakers, voters, and those in the criminal justice system to find treatment options, empowerment strategies, viable resources, community support, and policies that can help women with problems such as drug abuse, domestic violence, poverty, and prostitution rather than perpetually punishing them. Breaking the Rules shows you how our society makes 'other' of those among us who are most vulnerable, injured, and without resources. It digs under your skin and forces you to look at: the histories of abuse among women who have murdered their partners the impact of race and ethnicity on patterns of mothering and caretaking of children of women prisoners the lack of treatment options for addicted women prisoners how prison reawakens the feelings of powerlessness in women who have suffered childhood physical and sexual abuse helping women inmates develop marketable educational and vocational skills, support systems, and positive perceptions of themselves collaborative strategies that challenge the status quo of programs and support available to female offenders and their families a relational model of treatment that is based on the integration of three

theoretical perspectives the strengths and limitations of twelve step programs for women Mapping the problems and offering solutions, *Breaking the Rules* walks you through treatment strategies and self-confirming experiences--such as feminist therapy, prisoner-led support groups, affirmative prison programming, and art therapy--that help women draw on their strengths, come to terms with their pasts, and meet future challenges head on.

Islam, Securitization, and US Foreign Policy Erdoan A. Shipoli, 2018-05-08 This book argues that Islam has been securitized in US foreign policy, especially during the W. Bush administration when it was increasingly portrayed as the ultimate “other.” This securitization was realized through the association of Islam with unique security threats in speeches of foreign policy and national security. By analyzing the four recent US presidents’ discourses on Islam, this work sheds light on how they viewed Islam and addresses the following questions: How do we talk about Islam, its place and relationship within the context of US security? How does the language we use to describe Islam influence the way we imagine it? How is Islam constructed as a security issue?
