**Living Mantra** Mani Rao, 2018-09-15 Living Mantra is an anthropology of mantra-experience among Hindu-tantric practitioners. In ancient Indian doctrine and legends, mantras perceived by rishis (seers) invoke deities and have transformative powers. Adopting a methodology that combines scholarship and practice, Mani Rao discovers a continuing tradition of visionaries (rishis/seers) and revelations in south India’s Andhra-Telangana. Both deeply researched and replete

with fascinating narratives, the book reformulates the poetics of mantra-practice as it probes practical questions. Can one know if a vision is real or imagined? Is vision visual? Are deity-visions mediated by culture? If mantras are effective, what is the role of devotion? Are mantras language? Living Mantra interrogates not only theoretical questions, but also those a practitioner would ask: how does one choose a deity, for example, or what might bind one to a guru? Rao breaks fresh ground in redirecting attention to the moments that precede systematization and canon-formation, showing how authoritative sources are formed.

Sound and Communication Annette Wilke, Oliver Moebus, 2011-01-28 In Hindu India both orality and sonality have enjoyed great cultural significance since earliest times. They have a distinct influence on how people approach texts. The importance of sound and its perception has led to rites, models of cosmic order, and abstract formulas. Sound serves both to stimulate religious feelings and to give them a sensory form. Starting from the perception and interpretation of sound, the authors chart an unorthodox cultural history of India, turning their attention to an important, but often neglected aspect of daily religious life. They provide a stimulating contribution to the study of cultural systems of perception that also adds new aspects to the debate on orality and literality. The audio samples, originally included to the book as a music CD, can be downloaded from this website under Supplementary Materials.

**Essays** Rabindranath Tagore, 2007 Tagore's English Writings Originals And Translations Have Not Received The Attention That They Deserve. The Purpose Of This Edition Is To Make The English Writings Of Tagore Available To The Widest Possible Range Of Readers Interested In The Writings Of Tagore All Over The World, With Just The Bare, Minimum Information Necessary For Appreciating The Writings, And Leave The Critical Assessment To The Readers Themselves. There May Be Two Possible Reasons For The Neglect Of Tagore's English Writings. Firstly, Tagore's Prolific Output, Shakespearean Felicity And Protean Plasticity As A Bengali Poet, Who, Though Well-Versed In English, Chose To Write In The Medium Of His Mother Tongue For Nearly The First Fifty Years Of His Life, And There Is Hardly Any Literary Form That He Did Not Touch Upon And Turn Into Gold. His Creative Genius Found Expression In Poems, Plays, Novels, Essays, Short Stories, Satirical Pieces, Textbooks For Children, And Songs Of All Kinds. The Only Literary Form That He Did Not Try Is

Epic. But In His Long, Eventful And Creative Eighty Years Of Life He Virtually Lived An Epic. It Is Largely Due To His Mighty Stature As A Bengali Poet That Nobody Really Bothered About His English Writings And His Own Translations Of His Own Writings. Secondly, It Is Owing To The Supposedly Poor Quality Of His Translations Subsequent To The Translation Of Gitanjali. It Was Only After Tagore Received The Nobel Prize For Literature In 1913 That There Was A Growing Demand For His Writings In The West, And As Tagore Was Not Apparently Satisfied By The Translations That Others Mainly His Admirers Made, He Began To Translate His Writings Himself. But The Tremendous Haste With Which He Had To Translate, Possibly Affected The Quality Of Translations. Come What May, The Point Is Whether Tagore S English Translations Are Good Or Bad, Whether The Translation Furthered His Reputation Or Damaged It, Is Immaterial. The Fact Of The Matter Is That They Are His, And His Own Translation Of Whatever Quality It May Be Is More Valuable To A Tagore Lover Than The Best Translation Made By Somebody Else, As Van Gogh S One Original Single Scratch Is More Valuable Than The Best Possible Copy By Some Other Artist. The Value Of Tagore S English Writings Lies Here : They Constitute An Important Part Of His Total Oeuvre, Add A New Magnificent Dimension To It And Offer Us A Glimpse Into The Mystique Of The Creative Anxiety That Could Have Haunted Even The Greatest Writer Of The Twentieth Century, About His Possible Reception In An Alien Culture.

The Mighty Juggler Rita S Varma, 2015-11-25 How come he had landed at this tiny town? he wondered. It appeared to him a very odd choice. Then it occurred to him. He was merely being guided by some unseen force. Like when one drops a coin and cannot find it after frantically searching for it. In desperation one drops another coin of the same denominator in perhaps the identical manner to follow its trail as it rolls off. It is most likely that the second coin shall land up in close vicinity of the former. So in that sense the second inning is of commendable value for searching the first for some meaning worthy of assessment.

Apart from its literary merits, the book blazes a number of spiritual trails brimming with devotion. This English translation, along with some of the notes, are by Dr. B. Natarajan, a profound Tamil scholar. Sri M. Sundararaj has written a commentary incorporated in the introduction and some of the notes. Dr N. Mahalingam is the General Editor of the book. The Wishing Tree Subhash Kak, 2008 The past two decades have brought revolutionary changes in the understanding of the Indian civilization. This book, as an overview of this new understanding, is for the general reader. It is based on several

invited lectures at Stanford University, the Berkeley and Irvine campuses of the University of California, and an invited address at the OHM (Dutch Public TV) Congress in the Hague.

The algorithm of the universe Ancient Philosophy, 2021-11-18 There are many attempts to explain the existence of the universe. Even the observable universe around us is filled with unknowns and numerous unexplainable phenomena, let alone the unobservable universe. Each and every theory proposed is just trying to find an explanation for the existence of the observable universe around us, ignoring the fact that it is potentially possible there is an invisible universe which reveals itself as we find newer ways to observe it. We need to first and foremost be able to abstract this universe as we observe it to be just a representation of something else underneath that is projected as this world around us by our descriptive thoughts. Then and only then can we find an explanation that is inclusive of everything that the universe is. As far as we search for the origin of just these appearances of descriptive thoughts, we will only dabble with physics, chemistry, mathematics and computations. It should be recognised that Wolfram introduces a very good concept. Simple things recurse to form complex worlds. But this without the correct transformation remains simply a recognisable pattern. How does this recognisable pattern go on to become this complex appearance of reality that we observe around us is up in the air. The ancient Sanskrit literature has an in-depth explanation of how this reality around us works and how it has come to be this. It just needs the correct context around which to translate these texts to understand it. For a long time I wondered what would be the best way to explain the algorithm of the universe as seen by the ancients and explained in the Sanskrit literature. I could explain it by using translation of the Sanskrit verses in a certain order. But I find that they do not take the reader on the journey that is necessary to understand and form the correct thoughts to understand the working of and creation of this reality around us. I thought I would write it as a description of astrology i.e., jyotiSha which, if we look at from the ancient view, is actually a science that tells us how to control the distribution of seeking which drives the formation of this reality around us and hence control this reality itself. But, I find that the term has been highly mangled with all sorts of meaning associated with it. I find, even if there was a very beautiful science explained it becomes very difficult to break these pre-conceived perceptions to get the reader to read objectively and understand. Finally, I have decided the best way is to use the computers that we have created and the AI algorithms that we are trying to code as the best way to describe it, because this was my primary driver to want to understand the Sanskrit literature and to debug the working of the universe. The underlying curiosity to understand why and how the AI that we write does not even seem to be a “fake imitation” of the working of the universe around us. The underlying curiosity to understand how this reality around me is so completely immersive while the virtual reality that we create does not even come near this immersive experience that we have with reality. The curiosity to understand if it is possible for us to create a hardware and software that comes even a little bit close to the kind of intelligence, knowledge and beauty in the algorithm of this reality around us. This has been my driver to decode and understand the Sanskrit literature.

So, I find that is the best way to describe the algorithm. In this book I explain the algorithms proposed in the Sanskrit literatures for the working of this reality around us. I also compare these concepts to what we have currently present in computers and explain how they are different from what is explained in these books and why what we have in computers are not sufficient to create the AI that we want to create. Further, I try to put down my thoughts on how or what can be done to create a system that can be used to implement a AI system.

Sanathana Sarathi English Volume 04 (1990 to 1999) Sri Sathya Sai Media Centre,2022-11-10 Started in 1958, Sanathana Sarathi is a monthly magazine devoted to Sathya (Truth), Dharma (Righteousness), Shanti (Peace) and Prema (Love) - the four cardinal principles of Bhagawan Baba's philosophy. It is published from Prasanthi Nilayam (the Abode of Highest Peace) and acts as a mouthpiece of Baba's Ashram as it speaks of the important events that take place in His sacred Abode, besides carrying Divine Messages conveyed through Divine Discourses of Bhagawan Sri Sathya Sai Baba. The word meaning of Sanathana Sarathi is the 'Eternal Charioteer'. It signifies the presence of the Lord in every being as the atma guiding their lives like a charioteer.
