Strategy and Ethnocentrism (Routledge Revivals) Ken Booth, 2014-06-27 Ken Booth's study, first published in 1979, investigates the way in which cultural distortions have affected the theory and execution of strategy. Its aim is to illustrate the importance of ethnocentrism in all areas of the subject, to follow through its implications and to suggest approaches to

the different problems it poses. Insights are offered into the character of a number of important issues in Cold War international politics, including the superpower arms race, détente, the Middle Eastern crisis, the Soviet arms build-up and the SALT talks. In light of the cost of modern warfare, it is all the more important to avoid strategic failures in the future. Strategy and Ethnocentrism aims to alert students of military and strategic studies to some ways of minimising the risks of failure in an age when war is increasingly characterised by racial, cultural and religious conflict.

*Nation and Word, 1770-1850* Mary Anne Perkins,2016-12-05 The emergence of the modern nation state in Europe and the accompanying rise in national consciousness led to a heightened awareness of the close relationship between language and national identity. In this book the author shows that this relationship was expressed through the themes and figures of a 'language' of nationhood, drawn from a common European cultural heritage, particularly the Classical and Christian traditions. Despite its common roots, this language became the medium through which the diversity of national characters was expressed. The idea of the divine Word, for example, enabled the sacredness and power of national language to be celebrated. The identification of poet and prophet gave Romantic nationalists an authority to speak for and to the nation, and the theme of the Chosen People was often adopted to express the elect status of a writer's own nation. In conclusion, it is shown that this language of nationhood remains a powerful force at the end of the twentieth century.
