The Essential Sternberg James C. Kaufman, 2008-12-11 I strongly recommend this book to people working in the area of intellectual disabilities...It may open new vistas that are not always available in the traditional disability literature. It will especially challenge psychologists working in this field.--Journal of Policy and Practice in Intellectual Disabilities For years, Robert Sternberg has produced renowned, groundbreaking work, and now some of it is captured in one volume: The Essential Sternberg...Established scholars and novices to the field will find this book a useful addition to their libraries.--Psychology of Aesthetics, Creativity, and the Arts [Sternberg] approaches the definition of intelligence from a very pragmatic perspective...Sternberg's focus on success in the real world is refreshing.--Teacher's College Record Any follower of Sternberg and theories of intelligence will need this collection on their bookshelf. Robert J. Sternberg has argued that the conventional idea of intelligence is, at best, incomplete. Therefore, he has redefined the core concept of intelligence: Sternberg's groundbreaking, triarchic theory proposes that intelligence is measured not just by factual knowledge or book smarts, but also by the integration of creative ability, practical know-how, and analytic reasoning. As the former President of the American Psychological Association, current Dean of Tufts University, and one of the top 100 psychologists of the 20th century, according to the APA Monitor on Psychology, Sternberg is listed as one of ISI's most highly cited authors (top .5%) in psychology. Sternberg has authored over 1,000 journal articles, book chapters, and books. This comprehensive collection compiles the best of Sternberg-his most influential, career-defining articles culled from over 30 years of research. Serving as an introduction to and summary of his most critical contributions to the field, this book: Presents articles that track the development and progression of Sternberg's theory of successful intelligence Includes his most influential articles, such as The nature of creativity and The Rainbow Project: Enhancing the SAT Features articles on educational policy and how Sternberg's intelligence models can be used to improve student performance and supplement traditional exams Contains new articles on Sternberg's most recent theory, the Wisdom, Intelligence, Creativity, Synthesized (WICS) model

Complex Problem Solving Robert J. Sternberg, Peter A. Frensch, 2014-01-14 Although complex problem solving has emerged as a field of psychology in its own right, the literature is, for the most part, widely scattered, and often so technical that it is inaccessible to non-experts. This unique book provides a comprehensive, in-depth, and accessible introduction to the field of complex problem solving. Chapter authors -- experts in their selected domains -- deliver systematic, thought-provoking analyses generally written from an information-processing point of view. Areas addressed include politics, electronics, and computers.

There are chapters by leading experts in this field, including

Miriam Bassok, Randall Engle, Anders Ericsson, Arthur Graesser, Keith Stanovich, Norbert Schwarz, and Barry Zimmerman, among others. The Psychology of Problem Solving is divided into four parts. Intelligence and Cognition: Contemporary Frames of Reference S.H Irvine, S.K. Newstead, 2012-12-06 In December, 1984 a NATO-sponsored Advanced Study Institute entitled Human Assessment: Cognition and Motivation took place in Athens. It succeeded in attracting a great many of the most eminent scholars and researchers in this area, both as lecturers and participants. The contributors to this book are mostly members of staff who taught at the Institute. The chapters they have written are designed to provide an introduction to the principal issues that arise in the study of the assessment of intelligence and cognition. Since most of the protagonists are represented in this book the student is provided with an excellent overview. Many different people are responsible for preparation of a book such as this. We would like to express particular thanks to Siobhan Breslin and Julie Coleman, who typed the text despite an unfriendly and unreliable word-processing system. Thanks are also due to Steve Gill who helped with the preparation of the figures. Handbook of Intelligence Sam Goldstein,Dana Princiotta,Jack A. Naglieri,2014-12-08 Numerous functions, cognitive skills, and behaviors are associated with intelligence, yet decades of research has yielded little consensus on its definition. Emerging from often conflicting studies is the provocative idea that intelligence evolved as an adaptation humans needed to keep up with – and survive in – challenging new environments. The Handbook of Intelligence addresses a broad range of issues relating to our cognitive and linguistic past. It is the first full-length volume to place intelligence in an evolutionary/cultural framework, tracing the development of the human mind, exploring differences between humans and other primates, and addressing human thinking and reasoning about its own intelligence and its uses. The works of pioneering thinkers – from Plato to Darwin, Binet to Piaget, Luria to Wechsler – are referenced to illustrate major events in the evolution of theories of intelligence, leading to the current era of multiple intelligences and special education programs. In addition, it examines evolutionary concepts in areas as diverse as creativity, culture, neurocognition, emotional intelligence, and assessment. Featured topics include: The evolution of the human brain from matter to mind Social competition and the evolution of fluid intelligence Multiple intelligences in the new age of thinking Intelligence as a malleable construct From traditional IQ to second-generation intelligence tests The evolution of intelligence, including implications for educational programming and policy. The Handbook of Intelligence is an essential resource for researchers, graduate students, clinicians, and professionals in developmental psychology; assessment, testing and evaluation; language philosophy; personality and social psychology; sociology; and developmental biology.
