

El Hombre Y Su Entorno

Jean Bélanger

El individuo y las organizaciones Alfonso Rincón Serrano,2006 El individuo y las organizaciones es un ensayo que reflexiona sobre la posición del ser humano en sus relaciones con el entorno. Se cuestiona el camino por donde discurre la vida más que las metas que se logran. Analiza las dos veredas por las que transitamos: una, la que busca nuestra propia individualidad; otra, construida por una maraña de instituciones en las que participamos y gobiernan nuestro mundo. Todo, confundido en una mezcla de ideologías, ciencia, racionalidad, emoción y bastante lirismo.

Psicología y medio ambiente Claude Lévy-Leboyer,1985 El tema analizado minuciosamente por LEVY-LEBOYER en esta obra despierta hoy día un interés general. El hombre se adapta de modo constante y activo al entorno donde vive, evolucionando él mismo o modificándolo. Así pues, la psicología del medio ambiente corresponde a una necesidad que en el momento actual se ha desarrollado rápida y anárquicamente, al hilo de requerimientos prácticos. La autora presenta una nueva y esclarecedora visión de la psicología ambiental, área todavía caracterizada por la dispersión de fundamentos teóricos y metodológicos. Sintetiza acertadamente el desarrollo de las recientes investigaciones sobre los grandes temas de la vida cotidiana en los entornos físicos de la sociedad actual: - Cómo percibe y evalúa el hombre el medio (natural o artificial) en que vive. - En qué forma los diversos medios afectan al comportamiento humano, generando tensiones. - Cómo se utiliza el espacio para fines sociales - Qué papel activo puede jugar el hombre en la planificación del medio ambiente.

Filosofía y tecnología Carl Mitcham,Robert Mackey,2004-09-21 Lewis Mumford, Nicolás Berdiaev, Hans Jonas, Ernst Jünger, Friedrich Dessauer, C.S. Lewis, Jacques Ellul o Linn White Jr., son sólo algunos de los grandes autores que nos ofrecen en esta obra lo esencial de su reflexión sobre la técnica. Las 21 contribuciones que componen el presente volumen se organizan de tal modo que permiten apreciar con claridad los principales dilemas a los que se enfrenta la reflexión sobre nuestra tecnología. Los elementos clave del actual debate filosófico, político o teológico sobre la tecnología contemporánea y sus implicaciones, pasan, ineludiblemente, por los argumentos centrales de esta compilación de verdaderos clásicos del siglo

XX. Una cuidadosa selección que pone al alcance del lector medio el núcleo de las grandes controversias que, desde la epistemología, la metafísica o la ética, han determinado la filosofía de la técnica contemporánea. El trabajo final de Javier Echevarría actualiza en esta línea de debate los últimos avances en las tecnologías de la información y la comunicación.

El Hombre ¿Azar o Diseño? José Francisco Martínez García, 2012-05
El hombre ¿azar o diseño? En esta obra se hace una exposición sucinta de fenómenos y elementos materiales que conforman el universo y, por tanto, también al ser humano, como un ser que tiene cuerpo y vida, y por ello sometido a leyes físicas y biológicas, pero que se desempeña trascendiendo esta clase de leyes. El hombre no puede tener su origen sólo en la materia bruta. Los acontecimientos del cosmos que le preceden, tampoco justifican suficientemente su existencia y su naturaleza, que desborda y trasciende la materia. Siendo el hombre un ser inteligente, su existencia demanda una causa inteligente, superior a él, causa que no se encuentra ni en el azar ni en la materia. En este entramado se conjugan la filosofía, la ciencia, el arte, la historia y la religión.

Imágenes y realidades del conductismo Jean Bélanger, 1999
El conductismo está cubierto de imágenes erróneas que la gente tiene de él y, sin embargo, constituye una de las realidades más importantes de la historia de la psicología durante el siglo XX. El presente libro se propone aclarar la naturaleza del conductismo frente a esa plaga de imágenes y sobre la base de sus realidades. En este sentido, se trata de un libro propedéutico, para preparar al estudiante cara a enfrentar con limpieza el conductismo, e higiénico, para aquellos que, por lo que sea, se formaron contra él. Jean Bélanger es catedrático de Psicología de la Universidad de Québec en Montreal.

El equipo reflexivo Tom Andersen, 2021-10-01
¿Qué pasa cuando caen las barreras entre terapeutas y pacientes, cuando todos participan en diálogo sobre el cambio y cuando incluso todos cambian de roles? Como dice Lynn Hoffman en el prólogo de este importante libro, se modifica de manera drástica la posición de los miembros de la familia con respecto a los profesionales que los atienden. El concepto del grupo reflexivo trabaja sobre la idea de que todos participan en un diálogo sobre el cambio. El equipo ya no le hace algo a la familia sino que hace algo con ella, y la terapia se convierte entonces en una empresa en colaboración. No se trata de un nuevo método ni de una nueva escuela de terapia familiar. Pertenece a un nivel de abstracción más general, un nivel de valores y posición terapéuticos. En el proceso se modifican los roles, las reglas y las expectativas de la terapia. En este libro se describe la evolución de esta nueva estrategia en Noruega, y su adaptación en Estados Unidos por diversos terapeutas de familia.

¿CÓMo Es Dios? y ¿QuÉ Es el Hombre? Jes Enr Quez Rubio,Jesús Humberto Enríquez Rubio,2012-10 El ser humano tiene tendencia natural hacia su creador, como la abeja al panal, la cual está más allá de la razón y de los instintos. Es la convicción no aprendida de que estamos unidos a Dios, cualquiera que sea la idea que de Él tengamos. Nos experimentamos pequeños y desvalidos frente a su infinitud y poder, y esto nos induce a depender y caer, aferrándonos a la idea de que El Señor está obligado a proporcionarnos todo lo que necesitamos. Pero, Dios nos creó a su imagen y semejanza, igualitos a Él en su substancia y cualidades y nos dio los elementos necesarios para poderlo todo; y los problemas de la vida están ahí para ponernos a prueba, para obligarnos a ejercitar nuestras capacidades y a base de eso crecer y crecer, hasta llegar a ser grandes y poderosos como lo es Él y entonces fundirnos en su divina persona siendo uno con Él para toda la eternidad.

Este libro, resultado de una investigación al interior del Semillero de filosofía política y del derecho, adscrito al grupo de investigación Politeia, de la Escuela de Filosofía, analiza desde diversos enfoques, especialmente desde el campo de la filosofía, la crisis ambiental y la sobre población. No es un secreto para nadie que estos dos temas son de vital importancia no solo por sus implicaciones socio-económicas, sino también para la supervivencia misma de lo humano en el planeta. Ahora bien, esta obra propone que la crisis ambiental exige un cambio de modelo político y económico, a la par de una revalorización del rol del sujeto en nuestro contexto. También señala que la sobre población, actualmente, no es el problema más acuciante, lo que no obstante para que se vuelva un problema mayor en algunas décadas, a menos de que se produzcan cambios estructurales en nuestra forma de relacionarnos con el entorno. Esperamos que este libro ponga el tema de la sobre población en especial y el de la crisis ambiental, animalista y ecológica en general, en el horizonte de sentido del lector, de forma tal que él pueda mejorar, cualitativamente, su comprensión de un fenómeno tan complejo, pero a la vez tan urgente.
