Tratado de endocrinología pediátrica Manuel Pombo Arias,1997-04-21 El primer libro de Endocrinología Pediátrica en habla hispana fue publicado en 1.990 por el profesor Manuel Pombo Arias. Por ser un área de conocimiento relativamente creciente dentro de la Pediatría, esta obra resultó un acierto en cuanto que recopilaba por primera vez diferentes estudios y experiencias relativos a esta materia. Esta segunda edición, revisada y ampliada, es un auténtico tratado dividido en 12 secciones y 82 capítulos: conceptos generales, desarrollo endocrino del feto y del recién nacido, crecimiento, hipófisis, tiroides, paratiroides y metabolismo fosfocalcico, desarrollo sexual y pubertad, corteza suprarrenal, médula suprarrenal, metabolismo de los hidratos de carbono, nutrición y metabolismo de lípidos y miscelánea. Esta obra ha sido catalogada por miembros de la Comunidad Endocrinológica y Pediátrica como uno de los recopilatorios más serio y completo de los que se han publicado hasta la fecha a nivel internacional. En ella colaboran un total de 119 profesionales procedentes de España, Francia, Argentina, Chile, Estados Unidos, Portugal, Cuba y Venezuela.

Endocrinología clínica Luis Felipe Pallardo Sánchez,2009-12 En el momento presente, la aparición continua de nuevos avances en el ámbito científico en general y en el médico en particular, hace a veces difícil para el alumno de Medicina el poder establecer unas bases sólidas sobre las que poder edificar su conocimiento sobre tal o cual patología. En el presente libro, en cuya elaboración han participado profesores vinculados a la docencia de la Endocrinología en la Universidad Autónoma de Madrid (UAM), se han tratado de exponer de manera resumida, mediante esquemas, tablas y/o algoritmos, los aspectos fundamentales de las diferentes patologías tratados desde esa especialidad.Teniendo en cuenta lo anteriormente expresado, creemos que la obra que nos ocupa constituye una adecuada herramienta docente para la formación de los alumnos de Medicina y de los médicos residentes en Endocrinología, y de aquellas otras especialidades relacionadas en mayor o menor grado con la Endocrinología (Medicina Interna y Medicina de Familia). Índice resumido: Presentación. Síndromes hipotalámicos. Adenomas hipofisiarios funcionantes y no funcionantes. Hipopituitarismo. Diabetes insípida y síndrome de secreción inadecuada de ADH. Psychopathology Explains Endocrino-Immunological Responses Hajime Jozuka, M.D.,2017-01-03 Psychopathology Explains Endocrino-Immunological Responses by Hajime Jozuka, M.D. Author Hajime Jozuka, M.D. found the tumor protein. It had been thought that this protein is found in only malignant multiple myeloma in urine, in a Schizoaffective disorder at an acute phase for the first all over the world. From then on, the study on the relationship between brain phenomena, mental states and Immunology, especially malignant tumor immunology were begun by Jozuka in 1978. Jozuka continued many experiments and examinations to show the actual relationship between stress, including distress, and immune responses. On the one hand, Jozuka examined how to reduce immune responses against malignant tumors. On the other hand, he examined how to elevate immune response against malignant tumors, allergic dermatitis, and chronic fatigue syndrome. At last, he found that various immunological responses happen by various psychopathological problems. At the same time, SSRI and DHEA appeared in the world. Accompanied with this phenomenon, he found SSRI elevates Natural Killer cell activity (elevation of IL-2 and NK promotion) and DHEA elevates repair-ability of human. Furthermore, he found that the injection of

glycyrrhizinic acid showed serious effect against C-viral hepatitis and hepatoma. Accompanied with development of his treatment methods, 88% patients, who were informed from their doctor, "You will die within several months," have been living healthy after more than 15 years. Additionally, they received "Daseinsanalysis" as psychotherapy. Unfortunately, several patients, who received a surgical operation, passed away after 10 years. Jozuka found the most important phenomena of a human being as Psychoneuroimmunopathology.

Endocrinología Pedriátrica Hernán García,Alejandro Martínez,Francisca Grob,2023-07-20 Endocrinología pediátrica aparece en un momento de desarrollo sostenido de la especialidad. En la actualidad se han multiplicado las consultas de familias preocupadas por problemas de sus hijos tales como talla baja, pubertad precoz, obesidad o diabetes. Los métodos diagnósticos y terapéuticos han alcanzado niveles de excelencia y hoy son más accesibles, las determinaciones hormonales se han hecho más precisas, y novedosos estudios moleculares permiten realizar diagnósticos genéticos desde una muestra de saliva. Continuamente se descubren nuevos y efectivos fármacos. Esta primera edición del libro viene a llenar un vacío bibliográfico de más de veinte años en Chile e Iberoamérica. Con sus doce capítulos —escritos por autores chilenos y

extranjeros expertos en su área y provenientes de las más prestigiosas universidades—, que abarcan ciento veinte temas, Endocrinología pediátrica se hace cargo del estado actual de esta disciplina, recoge en forma didáctica y ordenada todos los últimos avances y pone al día sus conocimientos en cada una de las principales condiciones endocrinológicas. Además, esta publicación cuenta con capítulos editoriales en los que un experto entrega su visión personal acerca de aspectos controversiales o emergentes sobre un determinado tema. Se incluyen también los protocolos de estudio y tratamiento, y la descripción detallada de las pruebas funcionales de laboratorio habituales en endocrinología pediátrica, de manera que puedan ser utilizados como guías en los distintos hospitales de los países de la región.
