**Eugénio, Teresa,Azevedo, Graça,Fialho, Ana**

*Back-Alley Banking* Kellee S. Tsai,2018-05-31 Chinese entrepreneurs have founded more than thirty million private businesses since Beijing instituted economic reforms in the late 1970s. Most of these private ventures, however, have been denied access to official sources of credit. State banks continue to serve state-owned enterprises, yet most private financing remains illegal. How have Chinese entrepreneurs managed to fund their operations? In defiance of the national banking laws, small business owners have created a dizzying variety of informal financing mechanisms, including rotating credit associations and private banks disguised as other types of organizations. Back-Alley Banking includes lively biographical sketches of individual entrepreneurs; telling quotations from official documents, policy statements, and newspaper accounts; and interviews with a wide variety of women and men who give vivid narratives of their daily struggles, accomplishments, and hopes for future prosperity. Kellee S. Tsai's book draws upon her unparalleled fieldwork in China's world of shadow finance to challenge conventional ideas about the political economy of development. Business owners in China, she shows, have mobilized local social and political resources in innovative ways despite the absence of state-directed credit or a well-defined system of private property rights. Entrepreneurs and local officials have been able to draw on the uncertainty of formal political and economic institutions to enhance local prosperity.

*Banks and Banking* John James MacLaren,1928

**Managerial Dilemmas in Developing Countries** Mohammed Aslam,Malcolm J.M. Cooper,Athula Gnanapala,2019-04-02 Since organizations and industries are the catalysts for sustainable development, managing organizations and industries along with resource protection dilemmas is critical for developing countries. This volume brings together contributions from experts and new researchers on managerial dilemmas in developing countries, and is divided into five parts: namely, organizational development; human resource management; consumer behaviour; finance; and tourism and hospitality. The chapters in the first section provide empirical insights into e-learning systems, information systems for decision-making processes, business reengineering, and performance efficiency. The second part explores the role of human resource, organization downsizing, work-life balance, fair treatment and a good working environment, job satisfaction and job stress, the big five personality traits, and psychological contract and employment. The next section investigates bank interest rates, insurance policies, organic foods in consumer behaviour, and a marketing value chain

analysis of cinnamon. Studies of the effect of financial development, foreign direct investment on economic and endogenous growth, and the effect of institutional excellence and information efficiency on stock market development make up the fourth part of the book. The fifth section then embraces studies of the impact of tourist guides on tourist satisfaction, the behavioural characteristics of solo female travellers, community participation in tourism, and the unplanned development of tourism.

**Bringing E-money to the Poor** Thyra A. Riley, Anoma Kulathunga, 2017-09-13 Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who are excluded. Bringing e-Money to the Poor: Successes and Failures examines the lessons of success from four country case studies of "gazelles"?Kenya, South Africa, Sri Lanka, and Thailand?that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need to be in place for a country to expand access to financial services through digital technology.

**Modern Regulations and Practices for Social and Environmental Accounting** Eugénio, Teresa,Azevedo, Graça,Fialho, Ana,2022-04-08 There has been an increased interest in social and environmental issues in recent years as more consideration is given to the idea of sustainability and social accounting. Social accounting can be considered a straightforward manifestation of corporate enforcement to legitimize, explain, and justify the organization's activities or an ethically desirable component of any well-functioning democracy. Social accounting can also include environmental accounting, which is focused on environmental issues. Additional study is required to better understand the relevancy of social and environmental accounting in today's modern business world. Modern Regulations and Practices for Social and Environmental Accounting discusses social and environmental accounting and considers regulations, norms, organizational practices, and the challenges of education. Covering a range of topics such as non-financial reporting and corporate social responsibility, this reference work is ideal for industry professionals, researchers, academicians, managers, practitioners, instructors, and students.

**Expanding Housing Finance to the Underserved in South Asia** Tatiana Nenova,2010-06-22 Rapid economic growth in South Asia, urbanization, and a rising middle class have created considerable pent-up demand for housing and housing finance. More than 14 percent of low-income South Asians have no home. In response, South Asia s dynamic housing and housing finance markets have grown at rates of around 30%, but are still limited to upper-income groups. The contribution of

housing and real-estate sector to overall economic growth, social uplift and employment is considerable. Housing and housing finance services have the clear potential to expand to middle- and even lower- income families. This requires an improved land administration, strengthened legal framework for land titling, registration, and foreclosure, better market data provision, and promotion of long-term funding for mortgage lenders and developers. Innovative traditional mortgage products and Islamic finance could match demand in underserved market segments. This report, a first regional effort on the topic, examines housing shortages in South Asia, as well as outlines shortcomings of the market for home mortgages. Information on good practice and country-specific examples are presented on enabling builder/developers, mortgage lenders, land administration, as well as foreclosure and other relevant regulations, to strengthen home ownership in South Asia. Special emphasis is accorded to low-income housing solutions.

**Small Savings Mobilization and Asian Economic Development** Mark J. Scher,Naoyuki Yoshino,2015-06-11 Postal savings systems in Asian developing countries play a significant role in social and economic development. In many of these countries, and others around the world, postal savings and giro remittances are the only means of providing financial services to all segments of the population, particularly women, rural communities, and the urban poor. Postal savings in many countries also hold the largest share of individual and household savings among competing institutions. This book examines the postal financial systems of some twenty countries visited by the author, and also includes case studies by expert authors from different developing nations. Among the topics covered are savings product development, investing mobilized funds, receiving overseas remittances, and utilizing financial technology.

Delve into the emotional tapestry woven by in **Hatton National Bank Online Banking** .
