Reframing Difference in Organizational Communication Studies Dennis K. Mumby, 2011 Given the increasingly diverse terrain of 21st century organizational life, research-ers and students are exploring theoretical frameworks and analytic tools that attempt to understand organizing proc-esses in all of their richness and complexity. As such, there is widespread recognition of the need to ex-amine organizations as constructed through, and repositories of, difference; that is, as complex intersec-tions of discourses of gender, race, class, sexuality, and other markers of difference. In this sense, organi-zations are one of the principal sites where differences that make a difference (Bateson) are produced and reproduced. Communication is not something that simply occurs in organizations; rather, organizing processes are constituted and made meaningful by the mundane communication practices of its members. This book examines difference as a communicative phenomenon: The differences that make a difference are social and material constructions that can be productively understood by examining them as communica-tively accomplished. All of the scholars in this volume explore difference from a variety of per-spectives, each of which examines systematically the relationships among communication, organizing, and difference. KEY FEATURES & BENEFITS: The book explores the relationships among communication, organizing, and difference through three foci: (1) Research, (2) Pedagogy, and (3) Practice. In Section I-Researching Difference, organizational communication scholars explore a number of ways in which differ-ence can be critically examined as a communicative phenomenon, with the goal being to demonstrate the importance of difference as a construct a sensitizing device through which the complexities of

organizational communication processes can be examined and better understood. In Section II-Teaching Difference, chapters move beyond teaching diversity in the workplace and instead explore how students can learn to appreciate

Exploring Great Leadership R. Lynn Wilson, 2012-11-15 Just like you don't have to be a CEO to be a great leader, you don't have to be a great leader to achieve personal success. ... I have said that income, wealth, position, and status are not measures of great leadership. They are not measures of personal success either. Personal success is achieved through honoring and respecting those around you (including family, friends, fellow employees, and others), always being ethical at work and in your personal life, channeling your motivation and desires toward specific career and personal goals (which are compatible with your mental being), and being willing to pay the price of achieving those goals through sacrifice and hard work. Those who do that will find their niche for success and achieve it. Another significant point I want to make is the importance of enthusiasm and a positive attitude to achieve that success, especially when things are not going exactly as you envisioned or planned, which will inevitably happen. Most leadership books share ten steps for success, five things to never forget, and other such formulas. Someone who wants to become a great leader must truly understand the psychology and practice of great leadership. Leadership ability is obtained by having the necessary psychological makeup, knowing oneself, love of work, honoring others, personal sacrifice, and having fun in the workplace. Ignoring, minimizing, or mismanaging the human side of management creates suspicion, fear, and failure in the workplace. Take a practical look at leadership from the inside of an organization, and discover how to build positive and effective relationships. Whether you're a great leader striving to be better, someone wanting to be a great leader, or an individual seeking to achieve your personal and professional dreams in life, you can find the inspiration to accomplish your goals through Exploring Great Leadership.

Refugee Pathways to Freedom Janet Mancini Billson, 2007-11-09 Janet Mancini Billson provides extended interviews with Russian, Bhutanese, Rohingya, and Kurdish refugees, and the resettlement workers who smooth their transition into Canada, in order to paint a complex picture of creating a new life in a new land. Refugee Pathways to Freedom: Escaping Persecution and Statelessness shows how the agonies of losing one's home and leaving loved ones behind are coupled with the dangers of escaping into unknown territory, and that those who make the journey to freedom know that the dream of a safe and secure future is fraught with risks and disappointment. She argues that refugees and refugee agencies bring powerful ideas for revamping an overwhelmed global system that freezes victims of persecution in years of political and emotional limbo. She examines how shrinking refugee flows by addressing root causes of displacement is critical, but so is speeding up selection processes to reduce despair and lost years. She further posits that drastically limiting time in refugee camps would prevent counterproductive education and work gaps and that reducing language barriers to employment ensures well-being and successful integration.

Revolutionizing Sustainability Education Ekaterina Ivanova, Isabel Rimanoczy, 2021-12-30 There is growing awareness among leading responsible management scholars and practitioners that understanding global wicked problems is insufficient in effecting lasting engagement and changed behaviors. Research indicates that to impact behavior, the mindset has to shift, which leaves the question: How do you shift a mindset? This book guides educators and practitioners, their students and colleagues to take action on finding urgent solutions to the grand challenges stated in the 17 UN Sustainable Development Goals. A Sustainability Mindset is a way of thinking and being that results from a broad understanding of the ecosystem, from social sensitivity and an introspective focus on our personal values and higher self, which finds its expression in actions for the greater good. By promoting a mindset shift, educators in very diverse contexts are laying the foundation for a resilient future. The book presents a collection of over 150 student voices depicting a transformative experience and a shift in their mindset. Seventeen educator/student teams of contributing authors from across five continents describe the activity that prompted those students' reflections, and the conceptual frameworks that played a role in the selection of the learning goals

and activities. The book is written with academic and corporate educators, reflective practitioners, consultants, coaches, trainers and students in mind, and is invaluable in guiding the process of developing a sustainability mindset among participants in the training process.
