*LIFE AS IS* Dr. Michael Kleenoff,2014-05 Puzzled and disturbed by the religious discord exhibited among disparate yet deeply devoted believers--the unfading urge of many to find guilt concerning the Jews; the lack of desire to understand the yearning of blacks; the ability and the need of most men to hate, to rebuke, and to discard, if not enjoy the sufferings of, a stranger--all these imperfections of humankind led M. Kleenoff to write this book. Question after question began to accumulate, forcing the author to relentlessly seek answers. Not satisfied with half-truths and encountering many dismissals

in a game of zeitgeist interlaced with politically correct answers, M. Kleenoff confronts these questions with his eyes and heart wide open in the pursuit of the main task--to finally get to the bottom of human misdeeds. The author does not blame anyone; he simply attempts, through a thorough analysis, to understand why such behavior happens. He then shows the reader how to be more tolerant, understanding, and humane. Whether it comes through education, high standards of morality, or simply through relying on a higher power, the author demonstrates the way to use any of these roads, if not all, to achieve unity and happiness for all, regardless of societal dissimilarities.

**Ecoflourishing and Virtue** Steven Bouma-Prediger, Nathan Carson, 2023-11-10 This book brings together the interdisciplinary reflections of Christian scholars and poets, to explore how ecological virtues can foster the flourishing of our home planet in the face of unprecedented environmental change and devastation. Its central questions are: What virtues are needed for us to be better caretakers of our home planet? What vices must we extinguish if we are to flourish on the earth? What is the connection between such virtues and vices and the flourishing of all creatures? Each contribution offers insight on ecological virtue ethical questions through disciplinary lenses ranging from biology, geology, and economics, to literature, theology, and philosophy. The chapters feature the legacy and lessons of senior scholars reflecting on a lifetime of earthkeeping work, highlight global concerns and perspectives, and include compelling poetic reflections. Focusing on the way in which human vices and virtues drive so many of our ecological problems and solutions, the volume engages timely issues of environmental importance - such as environmental racism, interfaith dialogue, ecological philosophies of work and economics, marine pollution, ecological despair, hope and humility - encouraging fresh reflection and action. It will be of interest to those working in theology and religious studies, philosophy, ethics, and environmental studies.

**Back to Earth** Nicole Stott, 2021-10-12 Inspired by insights gained in spaceflight, a NASA astronaut offers key lessons to empower Earthbound readers to fight climate change When Nicole Stott first saw Earth from space, she realized how interconnected we are and knew she had to help protect our planetary home. In *Back to Earth*, Stott imparts essential lessons in problem-solving, survival, and crisis response that each of us can practice to make change. She knows we can overcome differences to address global issues, because she saw this every day on the International Space Station. Stott shares stories from her spaceflight and insights from scientists, activists, and changemakers working to solve our greatest environmental challenges. She learns about the complexities of Earth's biodiversity from NASA engineers working to enable life in space and from scientists protecting life on Earth for future generations. Ultimately, Stott reveals how we each have the power to respect our planetary home and one another by living our lives like crewmates, not passengers, on an inspiring shared mission

**Planet Hunter** Vicki O. Wittenstein, 2010 He has discovered more planets than anyone in history. In this inspiring true story, winner of the American Institute of Physics Award, Geoff Marcy's love of space helped him overcome struggles in his studies until finally he became an astronomer. But he was not on track to make major discoveries. Eventually, he went back to the questions that thrilled him as a boy: Are we alone? Do Earth-like planets orbit the stars in the night sky? It would not be easy to find a planet outside our solarsystem. Others had tried and failed. But Marcy never gave up. Since 1995, he and his colleagues have discovered nearly half of the 380 known extrasolar planets. Stunning paintings transport the reader to the exotic worlds that he and others have found.

*Science Encyclopedia* National Geographic Kids, 2016 Offers an illustrated encyclopedia of general science, with informative and fun facts on a broad array of scientific topics.

**Space Exploration (eBook)** Karen Hales Mecham, 1995-09-01 The information and activities in this Space Exploration Resource Guide are organized in roughly three sections: the Space Travel Simulation; Our Solar System and Beyond; and Energy, Force, and Motion in Space. Learning opportunities in each section are planned to engage children and teachers in experiences that allow for free exploration, concept development, and application of concepts. A classroom space shuttle simulation provides the focus for child exploration throughout the unit of study. The activities in the resource guide are not organized in a sequential, lock-step way, but rather are structured so teachers can choose from activities as if they were selecting from a menu—planning learning opportunities based on children's interests and levels of understanding. Four transparencies (print books) or PowerPoint slides (eBooks) are included to engage students in discussion and reinforce the concepts presented in the book.

**The Enchanted Wood and Other Tales from Finland** Norma J. Livo, George Livo, 1999-04-15 Some of the world's oldest and richest folk traditions come from a country that most Americans know very little about-Finland (or Suomi). The fifth largest country in Europe (in land size), Finland is home to the third true folk epic, The Kalevala (The Land of Heroes). It is a country of lush forests and sparkling clear lakes where, in the northern regions, reindeer still roam. This collection introduces readers to the fascinating culture, history, geology, and folk literature of Finland. After a historical and cultural overview, the authors present 20 representative stories-including ancient tales from The Kalevala, humorous and moral tales

(e.g., The Selfish Housewife and The Magic Wish)-and a fictionalized account of a witch trial in the 1600s. Holiday traditions, proverbs and sayings, and traditional recipes embellish this collection and will tantalize and intrigue readers. Color plates illustrate the land, the people, and artistic traditions of this wondrous people.
