My Start-Up Life Ben Casnocha, 2015-06-02 Ben Casnocha discovered he was entrepreneur at age 12 and hasn't slowed down since. In this remarkably instructive book, Ben dissects the entrepreneurship gene, explaining that everyone has inherited it if they have an idea to make the world a better place. In Casnocha's case, he found a better way for city governments to communicate with constituents on the Web. Six years later, Comcate has dozens of municipal clients, a growing staff, and a record of excellence. This book is the story of his start-up, but also a conversation with his mentors,

clients and fellow entrepreneurs about how to make a business idea work?and how to have the time of your life trying. From Pat Lencioni to Marc Benioff of salesforce.com, Ben has won over the best and brightest of the business world?now it's your turn!

Ego Frank Schirrmacher,2015-11-30 Twenty-five years after the end of the Cold War, a new Cold War is being waged in our societies. During the Cold War a theoretical model of man was developed by economists and the military, an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends: a modern homo oeconomicus. After his career in the Cold War ended, he was not scrapped but adapted to the needs of the twenty-first century. He became the ringmaster of a new era of information capitalism. He sought to read, control and influence thoughts; to predict, price and eliminate risks. Today stock-market trading is guided by him. He uses computer algorithms and Big Data to build up detailed pictures of our preferences and then suggest and sell goods to us. The model has become a self-fulfilling prophecy. We are no longer the masters of our own fate. The Game of Life runs without us. Schirrmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock-market trading techniques that brought about the financial crash of 2008, showing how these developments were interwoven with the rise of game theory, rational choice theory and neoliberal economics. The state and politics increasingly submitted themselves to the logic of computerized game theory and an economic view of the world, evading real decision-making in the process. In this brave new world individuals, alone in front of their computers, may think they are constructing a reality of their own choosing, but in fact they are being manipulated all along by others who are setting the rules of the game. This international bestseller by one of Germany's most distinguished journalists is a powerful indictment of a way of thinking that has become pervasive and threatens to undermine not only parliaments and constitutions but also the sovereignty of the individual to be the person he or she wants to be.

Plutocrats Chrystia Freeland, 2012-10-11 A Financial Times Best Book of the Year Shortlisted for the Lionel Gelber Prize There has always been some gap between rich and poor in this country, but recently what it means to be rich has changed dramatically. Forget the 1 percent—Plutocrats proves that it is the wealthiest 0.1 percent who are outpacing the rest of us at breakneck speed. Most of these new fortunes are not inherited, amassed instead by perceptive businesspeople who see themselves as deserving victors in a cutthroat international competition. With empathy and intelligence, Plutocrats reveals the consequences of concentrating the world's wealth into fewer and fewer hands. Propelled by fascinating original interviews with the plutocrats themselves, Plutocrats is a tour de force of social and economic history, the definitive examination of inequality in our time.

Living Intelligence or the Art of Becoming Rimaletta Ray Ph.D., Yolanta Lenski, 2015-03-06 Living Intelligence or the Art of Becoming By Dr. Rimaletta Ray and Xenia Gazarkh The highest system of learning is how we live our lives, and the hardest Job in the world is to create oneself! (Dalai Lama) The work on self-formation is the art of making each life have more sense in terms of intellectual self-realization that each and every one of us is striving hard to accomplish. Revolutionizing our knowledge in the coming more electronically-charged years is the first stage of the process of rationalization of our lives. There is only one good - knowledge and one evil ignorance (Socrates) The book Living Intelligence or the Art of Becoming is an attempt to pinpoint the Modus Operandi of a personal evolution through expanding ones intelligence and raising the consciousness. Unfortunately, it is downright impossible unless we uplift ourselves in all the five main dimensions of life: physical, emotional, mental, spiritual, and universal holistically by practicing what we preach, by developing intuition that is our adult barometer, and by turning our bad life habits into transformative Living Intelligence skills. At the new electronically-advanced times holistic, integral, and conscious self-development becomes a priority At the time of rapid evolution of Electronic Intelligence, we need people that are well-rounded holistically, on all the above mentioned levels. And if our education system does not provide that, the mission of every intelligent person is to obtain the education that makes ones unique personality shine against all odds. We need to help it happen so any one could become his own cheer-leader in life, cut his mechanical living, and start living consciously The book is an attempt to present a simple blueprint of self-development and self-realization as our main mission in life. Thesis 9) If you are not headed to a destination with a map to guide you, then your intelligence and ambition are going to waste. (Dr. Phil) We are mapping out the ten stages of Living Intelligence (Introduction, Thesis 9) that, in our understanding, are to be followed as our intellectual quest on the basis of the specifically developed talents and the intelligence that we might be granted by God. It is a holistic picture of the most critical intelligences that comprise living intelligence and sculpture a person on his way to attaining spiritualized intelligence

(John Baines) and Living Consciousness. It is a new, much more reasoned out self-awareness, guided by rational thinking, speaking and acting that a human mind needs to master on five philosophical levels: Mini, Meta, Mezzo, Macro, and Super, and in five main dimensions: physical, emotional, mental spiritual, and universal. We are developing the super conscious mind on these levels holistically. This being said, self- modification and self-regulation need to be consciously practiced in the following direction: Unconscious Conscious Superconscious Mini Level - (Physical dimension) - General Intelligence (Physical Intelligence +, Cognitive Intelligence + Digital Intelligence) + Language Intelligence - We personalize ourselves mentally, verbally, and psychologically. Meta Level (Emotional dimension) - Emotional Intelligence + Psychological Intelligence - We intellectualize our emotions and become better masters of ourselves psychologically Mezzo Level (Mental dimension) - Professional Intelligence (Creative Intelligence +, Financial Intelligence) - We individualize and self-realize ourselves professionally! Macro -Level (Mental Dimension)- Cultural and Social Intelligences We acculturate and socialize yourself! Super Level (Spiritual and Universal Dimensions), Spiritual and Universal Intelligences We spiritualize ourselves by transcending our religious differences, committing to the Universal Intelligence that we all call God holistically, servicing God and life at large on the interpersonal level and extra-terrestrial levels. Each of the intelligences, outlined above, makes up a strategic plan of action for self- creation. They are all interrelated by the principle of the Russian dolls, when the top doll encompasses all the rest into one dependable structure.(Introduction, Thesis 9) The outline of the direction for the self-quest that we present in this book as the know-how of a self-training program had been verified by the author for the life time of academic teaching young people from all over the world.. They have all learned to defy the gravity of common thought and fly in their mind, no matter what! Finally, the book is also promoting self- suggestive psychology based on the premises that if you want to be inspired, you need to be self-inspiring! We believe that besides obtaining a more rationalized attitude to life, the mind of each person on earth needs to be inspired and enthused for such a holistic mission statement willfully. Inspiring oneself is the process of forcing ones resisting mental, emotional, and psychological make-ups to do the self-transformation of the whole body system. The book is disarmingly simple to grasp for everyone, an adult or a teenager, just stepping on the path of self-formation. Simplicity, as the primary component of the book, prompted that its extremely broad topic be presented in small, very digestible Chunks of information that can always be enriched through numerous sources on the Internet With a clear-cut idea about what they are seeking and where they are channeling themselves with the book as a compass in self-quest and self-realization, readers can get oriented in the intelligence that they need to develop. It will also inspire them to stay on the path of self- creation with the help of suggestive inspirational boosters that preview every stage of intelligence , on the one hand , and a wide choice of auto-suggestive mind-sets that rhyme to boost the will-power, on the other.. In sum, the aim of the book Living Intelligence or the Art of Becoming is to expand on the circumference of being to becoming, systematizing the living skills, or rather the mix of living skills to attain basic intelligences for self-regeneration

and self-creation to a better full- realization in life. Its the first book on the market of this overwhelmingly holistic value, and it has undoubtedly a great potential to be read and studied by everyone who feels a void inside for self- realization to finally accomplish the excessive happiness that everyone is striving for. Living intelligence becomes consciousness in action, the consciousness that cultivates a new culture of thinking and living. We must make sense with our lives, each and every one of us!(Leo Vygotsky) Someday is Now!

Understanding the Purpose and Power of Men Myles Munroe,2017-06-06 The male is in crisis. Traditional roles once gave men stability and continuity from generation to generation. Today, the world is sending out conflicting signals about what it means to be a man. Many men are questioning who they are and what roles they fulfill in life—as a male, a husband, and a father—leaving them frustrated and causing them to live far below their potential. Best-selling author Dr. Myles Munroe examines cultural attitudes toward men and addresses critical issues such as: How can men gain their footing in the ever-shifting environment of cultural expectations? What does it mean to be male? What definition of masculinity should men adopt? What roles should men fulfill-in the workplace and in the home? What do gender roles have to do with the male's purpose? What are the differences between males and females? How are men and women meant to relate to one another? How can a man build a better life for himself, his family, and the world? When men understand the purpose God has given them and the true design of their relationship with women, they will be free to fulfill their destiny and potential. Expanded edition with study guide material included.
