Young Adult Science Fiction C. W. Sullivan III,1999-03-30 At the close of the nineteenth century, American youths developed a growing interest in electricity and its applications, machines, and gadgetry. When authors and publishers recognized the extent of this interest in technology, they sought to create reading materials that would meet this market need. The result was science fiction written especially for young adults. While critics tended to neglect young adult science

fiction for decades, they gradually came to recognize its practical and cultural value. Science fiction inspired many young adults to study science and engineering and helped foster technological innovation. At the same time, these works also explored cultural and social concerns more commonly associated with serious literature. Nor was young adult science fiction a peculiarly American phenomenon: authors in other countries likewise wrote science fiction for young adult readers. This book examines young adult science fiction in the U.S. and several other countries and explores issues central to the genre. The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development. Included are discussions of science fiction for young adults in the U.S. and in Canada, Great Britain, Germany, and Australia. These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present. The second section of the book considers topics of special interest to young adult science fiction. Some of the chapters look at particular forms and expressions of science fiction, such as films and comic books. Others treat particular topics, such as the portrayal of women in Robert Heinlein's works and representations of war in young adult science fiction. Yet another chapter studies the young adult science fiction novel as a coming-of-age story and thus helps distinguish the genre from science fiction written for adult readers. All chapters reflect current research, and the volume concludes with extensive bibliographies.

Young Adult Literature and Culture Harry Eiss, 2009-03-26 This book offers a multifaceted approach to the world of young adults, everything from Ray Schrock's use of Walter Dean Myers' sports stories to discuss race relations and cultural politics to Joyce Litton's analysis of the highly popular Sisterhood of the Traveling Pants Quartet. The cover illustration is done by Joel Rudinger based on his experiences with the Inuit where he learned many of their legends and myths, resulting in his own excellent work on Sedna, the creation goddess, a story filled with deep tragedy, mystery and the world of the spirits. This mythic world slides into the discussion of Harry Eiss, one that focuses on The Isis Trilogy, best known of Monica Hughes many works, who writes, "Science fiction and fantasy in particular are valid carriers of myth for the 20th century, and most especially for young people." Margaret Best and Susann deVries also give us literature that uses science. They begin, "The science fair project is the central metaphor and the reality in Paul Zindel's The Effect of Gamma Rays on Man-in-the-Moon Marigolds (1970), Christopher Paul Curtis's Bucking the Sarge (2004), and Joyce Maynard's The Cloud Chamber (2005). After providing an overview science fiction, Sally Sugarman offers a study of the entire genre. "For this study two hundred and thirty-nine high school students from two schools in Vermont and Massachusetts were surveyed." Alethea K. Helbig provides an overview of her important activities promoting literature for the young. She was a seminal scholar and educator when colleges and universities were just beginning to take the study of such literature seriously, when English departments were initiating serious undergraduate and graduate classes in what previously had been seen as inferior literature. Her life itself provides us with an entertaining and historically valuable autobiographical account of a person at

the center of the change that has taken and continues to take place. Jerry Loving expands the horizons of the entire collection of essays, providing a firsthand account of how the young are educated in China, including a detailed history. It begins: "I have been traveling to mainland China at least 4 to 6 times a year as a teacher or education evaluator since 2002. As the visits and years passed, I watched the education system of China slowly improve to the level my schools were like when I went to school in the 50's and 60's

In the dusty ruins of the world, three groups exist: the Sovereign, the Fortis, and the Outliers. Indra is an Outlier. Living on land that has not healed from the poison of the past, the Outliers have adapted - but to the Sovereign and the Fortis, they are nothing. For centuries the Fortis have made their abuse of Outliers a sport, but when Asa comes to Indra's rescue, she sees something different in him. Something that marks him as so much more than just a Fortis guard. But when Indra's world begins to unravel, even the quiet alliance she and Asa have formed cannot save her from the wrath of the Sovereign. In one life-altering moment, everything Indra has ever known is ripped away, forcing her to face a world even more harsh and unforgiving. Broken and scarred, Indra finds herself on a journey that will challenge everything she's ever been taught, learning along the way that she's stronger than she ever imagined. Maybe even strong enough to free her people forever. An emotional first book in an exciting dystopian series, perfect for fans of The Hunger Games and The Handmaid's Tale.

The Peculiar Case of the Missing Mondrian K.J. Heritage, 2022-05-03 Imagine if your life was spent at the mercy of coincidence... A missing multi-million-pound painting, an insistent ex who won't take no for an answer, and a ruthless media Baron who always gets his way. What could possibly go right? Serial life avoider and semi-professional layabout, Jim Riven, is not particularly good at anything, unless lying in bed all day, ignoring his front door and his phone, and then going down the pub every evening, could be described as a life skill. But Jim Riven did have one particular talent—or what he referred to as 'his curse'—that involved unnecessary and unwanted coincidences, or 'not so serendipitous happenchances' as he also liked to call them. Happenchances that had dogged his life ever since he could remember. When Jim Riven's ex-girlfriend, a rather spoilt society girl and daughter of all round international media rogue, Roo Osbourne, turns up unexpectedly one morning to elicit his help in finding a stolen painting by the grandfather of modern art, Piet Mondrian, Jim Riven's life is turned upside

down. And, for Jim Riven, upside down was not the right way up at all. And so started a series of the most startling coincidences, placing him at the centre of a fascinating and complex mystery.

But when I gave her another looksee, I knew she was also Devil, for she comes from the Blackash and was broken. Her flesh is white, stuck inside twisted glass that bends and curls--one arm reachin' out to me, the other at her side, her fingers clenched in an angry fist. And if I look into her black eyes? I see fings. Twistin', turnin' fings. She tells of dark, doomy worlds, of peoples and places, and of shadows where horrors lurk. Stories that play out in front of me as if I was there. But hark! Her lips begins to dance! Serpents that whisper and hiss. Words that spin and curl, twistin' and swirlin' and I can do nothin' but watch, watch, watch...

Ethics and Children's Literature Claudia Mills, 2016-05-13 Exploring the ethical questions posed by, in, and about children's literature, this collection examines the way texts intended for children raise questions of value, depict the moral development of their characters, and call into attention shared moral presuppositions. The essays in Part I look at various past attempts at conveying moral messages to children and interrogate their underlying assumptions. What visions of childhood were conveyed by explicit attempts to cultivate specific virtues in children? What unstated cultural assumptions

were expressed by growing resistance to didacticism? How should we prepare children to respond to racism in their books and in their society? Part II takes up the ethical orientations of various classic and contemporary texts, including 'prosaic ethics' in the Hundred Acre Wood, moral discernment in Narnia, ethical recognition in the distant worlds traversed by L'Engle, and virtuous transgression in recent Anglo-American children's literature and in the emerging children's literature of 1960s Taiwan. Part III's essays engage in ethical criticism of arguably problematic messages about our relationship to nonhuman animals, about war, and about prejudice. The final section considers how we respond to children's literature with ethically focused essays exploring a range of ways in which child readers and adult authorities react to children's literature. Even as children's literature has evolved in opposition to its origins in didactic Sunday school tracts and moralizing fables, authors, parents, librarians, and scholars remain sensitive to the values conveyed to children through the texts they choose to share with them.
