Entertaining from Ancient Rome to the Super Bowl Melitta Weiss Adamson, Francine Segal, 2008-10-30 From the earliest times, humans have enjoyed dining and entertainment with family and friends, from sharing a simple meal to an extravagant feast for a special celebration. In this two-volume set, entries tell the history of wedding and religious customs, holidays such as Thanksgiving and Christmas, and modern day get togethers such as block parties and Superbowl parties. Providing a worldwide perspective on celebration, entries on topics such as Dim Sum, La Quinceanera Parties, Deepavali, and Juneteenth cover many cultures. In addition, entries on Ancient Rome, Medieval entertaining, and others give an inside view as to what entertaining was like during those times, should readers want to recreate these themes for school projects or club banquets.

Let's Eat France! François-Régis Gaudry, 2018-10-16 There's never been a book about food like Let's Eat France! A book that feels literally larger than life, it is a feast for food lovers and Francophiles, combining the completist virtues of an encyclopedia and the obsessive visual pleasures of infographics with an enthusiast's unbridled joy. Here are classic recipes, including how to make a pot-au-feu, eight essential composed salads, pâté en croûte, blanquette de veau, choucroute, and the best ratatouille. Profiles of French food icons like Colette and Curnonsky, Brillat-Savarin and Bocuse, the Troigros dynasty and Victor Hugo. A region-by-region index of each area's famed cheeses, charcuterie, and recipes. Poster-size guides to the breads of France, the wines of France, the oysters of France—even the frites of France. You'll meet endive, the belle of the north; discover the croissant timeline; understand the art of tartare; find a chart of wine bottle sizes, from the tiny split to the Nebuchadnezzar (the equivalent of 20 standard bottles); and follow the family tree of French sauces. Adding to the overall delight of the book is the random arrangement of its content (a tutorial on mayonnaise is next to a list of places where Balzac ate), making each page a found treasure. It's a book you'll open anywhere—and never want to close.

The Transformation of Maritime Professions Karel Davids, Joost Schokkenbroek, 2023-04-30 This book deals with the economic impact of technological changes and the rise of passenger shipping on social relations on board and ashore in

European shipping industries between c.1850 and 2000. The changes in motive power, communication techniques and positioning technologies and the rise of passenger shipping went together with the creation of new tasks and functions and the marginalization or disappearance of traditional jobs and skills. This book presents case-studies on changes in different maritime professions between the middle of the nineteenth century and the end of the twentieth century, covering the shipping industries of a variety of seafaring countries in Europe. The subjects include changes in maritime labour at large, changes in specific groups of deck, catering or engine room personnel, such as captains, cooks, catering personnel, engineers, or radio-operators. A number of chapters employ a prosopographical or micro-historical approach, while others apply a spatial perspective, analyze business records, materials from professional associations or distil information from large sets of quantitative data. This book will be of interest to academics and students of economic history, maritime and labour history.

InterstellarNet: Origins Edward M. Lerner, 2015-07-26 When the First Call from the Stars Comes, Do We Even Dare to Answer? Life changes for everyone in general--and for physicist Dean Matthews in particular--when astronomers detect a radio signal from a nearby star. First Contact forces humanity to face hard questions, and do it fast. Every answer spawns new questions. Every solution sets in motion a new and more daunting crisis to challenge Dean, his family--and an expanding number of interstellar civilizations--for generations to come. Praise for *InterstellarNet: Origins* ...in *InterstellarNet: Origins*...Lerner proves he knows enough real-world, present-day computer science and economics to combine them into a wonderfully thought-provoking story.... Lerner's world-building and extrapolating are top notch. --SFScope Lerner mixes physics, computer science, and economics into a series of very intellectually satisfying puzzles. Some of the puzzles involve understanding the alien, and some depend on understanding ourselves ... A very satisfying read, especially for the intellectually inclined. --Mike Brotherton, author of *Spider Star* One of the most original, believable, thoroughly thought-out, and utterly fascinating visions ever of what interstellar contact might really be like. --Dr. Stanley Schmidt, Editor, *Analog Magazine* Edward Lerner takes us from a first SETI detection to full scale interstellar net economics, with thrills along the way. No one had thought through what a working interstellar net would be like. Lerner has the professional heft to make sense of it, tell a story, and make us care. Good stuff, told in clear, quick prose. A groundbreaking job! --Gregory Benford, author of *Timescape*. Bredon didn't mean to interfere with the Powers--but then they interfered with him! When the beings of myth and legend start fighting among themselves, mere mortals had best beware. Millennia ago, the survivors of a crash settled the planet of Denner's Wreck. Their descendants long ago forgot their own history. Centuries later, the planet was rediscovered by visitors who stayed--and came to be called The Powers. The descendants of the original settlers soon learned to treat the newcomers like gods. Then, one fine day, Bredon the Hunter found himself caught up in the affairs of the Powers--at just the moment one of them went mad! With a new afterword by the Author. Previously published as *Denner's Wreck*.
