**Fahrenheit 451** Ray Bradbury, 2003-09-23 Set in the future when firemen burn books forbidden by the totalitarian brave new world regime.

*Fahrenheit 451* Ray Bradbury, 2011-11-29 Nearly seventy years after its original publication, Ray Bradbury's internationally acclaimed novel Fahrenheit 451 stands as a classic of world literature set in a bleak, dystopian future. Today its message has grown more relevant than ever before. Guy Montag is a fireman. His job is to destroy the most illegal of commodities, the printed book, along with the houses in which they are hidden. Montag never questions the destruction and ruin his actions produce, returning each day to his bland life and wife, Mildred, who spends all day with her television "family." But when he meets an eccentric young neighbor, Clarisse, who introduces him to a past where people didn't live in fear and to a present where one sees the world through the ideas in books instead of the mindless chatter of television, Montag begins to question everything he has ever known.

*The Archive Incarnate* Joseph Hurtgen, 2018-10-10 We live in an information economy, a vast archive of data ever at our fingertips. In the pages of science fiction, powerful entities--governments and corporations--attempt to use this archive to control society, enforce conformity or turn citizens into passive consumers. Opposing them are protagonists fighting to liberate the collective mind from those who would enforce top-down control. Archival technology and its depictions in science fiction have developed dramatically since the 1950s. Ray Bradbury discusses archives in terms of books and television media, and Margaret Atwood in terms of magazines and journaling. William Gibson focused on technofuturistic cyberspace and brain-to-computer prosthetics, Bruce Sterling on genetics and society as an archive of social practices. Neal Stephenson has imagined post-cyberpunk matrix space and interactive primers. As the archive is altered, so are the humans that interact with ever-advancing technology.

**The New Enlightenment and the Fight to Free Knowledge** Peter B. Kaufman, 2021-02-23 How do we create a universe of truthful and verifiable information, available to everyone? In *The New Enlightenment and the Fight to Free Knowledge*, MIT Open Learning's Peter B. Kaufman describes the powerful forces that have purposely crippled our efforts to share knowledge widely and freely. Popes and their inquisitors, emperors and their hangmen, commissars and their secret police—throughout history, all have sought to stanch the free flow of information. Kaufman writes of times when the Bible could not be translated—you'd be burned for trying; when dictionaries and encyclopedias were forbidden; when literature and science and history books were trashed and pulped—sometimes along with their authors; and when efforts to develop public television and radio networks were quashed by private industry. In the 21st century, the enemies of free thought have taken on new and different guises—giant corporate behemoths, sprawling national security agencies, gutted regulatory

commissions. Bereft of any real moral compass or sense of social responsibility, their work to surveil and control us are no less nefarious than their 16th- and 18th- and 20th- century predecessors. They are all part of what Kaufman calls the Monsterverse. *The New Enlightenment and the Fight to Free Knowledge* maps out the opportunities to mobilize for the fight ahead of us. With the Internet and other means of media production and distribution—video especially—at hand, knowledge institutions like universities, libraries, museums, and archives have a special responsibility now to counter misinformation, disinformation, and fake news—and especially efforts to control the free flow of information. A film and video producer and former book publisher, Kaufman begins to draft a new social contract for our networked video age. He draws his inspiration from those who fought tooth and nail against earlier incarnations of the Monsterverse—including William Tyndale in the 16th century; Denis Diderot in the 18th; untold numbers of Soviet and Central and East European dissidents in the 20th—many of whom paid the ultimate price. Their successors? Advocates of free knowledge like Aaron Swartz, of free software like Richard Stallman, of an enlightened public television and radio network like James Killian, of a freer Internet like Tim Berners-Lee, of fuller rights and freedoms like Edward Snowden. All have been striving to secure for us a better world, marked by the right balance between state, society, and private gain. The concluding section of the book, its largest piece, builds on their work, drawing up a progressive agenda for how today's free thinkers can band together now to fight and win. With everything shut and everyone going online, *The New Enlightenment and the Fight to Free Knowledge* is a rousing call to action that expands the definition of what it means to be a citizen in the 21st century.

**Fahrenheit 451** Ray Bradbury, 2004 Guy Montag es un bombero, y el trabajo de un bombero es quemar libros, que están prohibidos porque son cause de discordia y sufrimiento.

*Overclocked* Cory Doctorow, 2016-10-25 Now available for the first time with two additional stories! Have you ever wondered what it's like to be bitten by a zombie or live through a bioweapon attack? In Cory Doctorow's collection of novellas, he wields his formidable experience in technology and computing to give us mind-bending sci-fi tales that explore the possibilities of information technology—and its various uses—run amok. *Anda's Game* is a spin on the bizarre new phenomenon of cyber sweatshops, in which people are paid very low wages to play online games all day in order to generate in-game wealth, which can be converted into actual money. Another tale tells of the heroic exploits of sysadmins—systems administrators—as they defend the cyberworld, and hence the world at large, from worms and bioweapons. And yes, there is a story about zombies too. Plus, for the first time, this collection includes *Petard* and *The Man Who Sold the Moon*.

*Free Your Mind!* Simon Matthews, 2023-05-02 Between 1967 and 1970 Italian auteur Giovanni Tinto Brass directed four feature films in London, each starring a woman as the main character. Exploring the political, cultural and sexual ideas of their time, often in a deliberate pop-art style, they contain much priceless footage of now forgotten neighborhoods, galleries, clubs and events as well as an abundance of contemporary music. A fascinating blend of social history, pop culture, cinema,

music and TV, *Free Your Mind!* examines the films, their stars and how they were made. Based on interviews with many of the surviving participants, Matthews argues that at this stage of his career, before *Caligula*, Brass was as significant a figure in cinema as Antonioni, Godard and many other better-known directors.

**The Free World** Louis Menand, 2021-04-20 An engrossing and impossibly wide-ranging project . . . In *The Free World*, every seat is a good one. —Carlos Lozada, *The Washington Post* *The Free World* sparkles. Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The bar is set very high. —David Oshinsky, *The New York Times Book Review* | Editors' Choice One of *The New York Times's* 100 best books of 2021 | One of *The Washington Post's* 50 best nonfiction books of 2021 | A *Mother Jones* best book of 2021 In his follow-up to the Pulitzer Prize-winning *The Metaphysical Club*, Louis Menand offers a new intellectual and cultural history of the postwar years The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer Prize-winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of “freedom” applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt’s Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage’s residencies at North Carolina’s Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg’s friendship with Lionel Trilling, James Baldwin’s transformation into a Civil Right spokesman, Susan Sontag’s challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America’s once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

*Defying Dystopia* Ed Ayres, 2016-06-30 To most, the collapse of modern civilization is the stuff of fiction. Yet, science confirms that misuse of technology and environmental abuse places our world in grave danger of ruin. *The World Scientists’ Warning to Humanity* places our civilization on a collision course. *Defying Dystopia* analyzes how we have come to this, and what options remain for far-seeing people to take control of their own destiny and survive the future. Ed Ayres, who has worked with some iconic environmental scientists of the past half-century, argues that technology was originally used to

augment the natural strengths of humans, but has been increasingly used in ways that weaken us—shifting from useful work to the industries of distraction, entertainment, convenience, pain-relief, and sedation. Ayres advises on how at least some of us can avoid that collision. The most critical task, for those of us who want humanity to survive and thrive, is to disengage from our tech thralldom, and shift to a conscious management of our evolution in which we use technology to enhance our skills and strengths rather than erode or supplant them. Ayres provides insightful, actionable suggestions we can use to increase our odds of survival. He asks far-seeing individuals to take on a mission that the dominant governments and institutions demonstrably cannot: the epic task of shepherding a low-profile, resilient transition to a new kind of human future.

*Free Speech* Nigel Warburton, 2009-02-26 'I disapprove of what you say, but I will defend to the death your right to say it' This slogan, attributed to Voltaire, is frequently quoted by defenders of free speech. Yet it is rare to find anyone prepared to defend all expression in every circumstance, especially if the views expressed incite violence. So where do the limits lie? What is the real value of free speech? Here, Nigel Warburton offers a concise guide to important questions facing modern society about the value and limits of free speech: Where should a civilized society draw the line? Should we be free to offend other people's religion? Are there good grounds for censoring pornography? Has the Internet changed everything? This Very Short Introduction is a thought-provoking, accessible, and up-to-date examination of the liberal assumption that free speech is worth preserving at any cost. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
