Supporting Reading in Grades 6-12 Sybil M. Farwell, Nancy L. Teger, 2012-06-11 This book presents a curricular framework for students grades 6-12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork. Supporting Reading Grades 6-12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits

as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner.

The Microeconomic Mode Jane K. Elliott,2018-06-26 From The Road to Game of Thrones, across works as seemingly different as Gone Girl and Saw, literature, film, and television have become obsessed with the intersection of survival and choice. When the trapped rock-climber hero of 127 Hours is confronted with self-amputation or death, it is only a particularly blunt example of an omnipresent set-up. In real-life settings or fantastical games, protagonists find themselves confronting extreme scenarios with life-or-death consequences, forced to make torturous either-or choices in stripped-down, brutally stark environments. Jane Elliott identifies and analyzes this new and distinctive aesthetic phenomenon, which she calls "the microeconomic mode." Through close readings of its narratives, tropes, and concepts, she traces the implicit theoretical and political claims conveyed by this combination of abstraction and extremity. In the microeconomic mode, humans isolated from any forms of social organization operate within a mini-economy of costs and benefits, gains and losses, measured in the currency of life. Elliott reads the key concepts that emerge from this aesthetic—life-interest, sovereign capture, and binary life—in relation to biopolitics and natural law theory, becoming and the control society, and primitive accumulation in racial capitalism. The microeconomic mode interrogates the destruction of the liberal political subject, but what it leaves in its place is as disturbing as it is radically new. Going beyond the question of neoliberalism in literature, *The Microeconomic Mode* combines revelatory close readings of key literary and popular texts with significant theoretical interventions to identify how an aesthetics of choice has reshaped our contemporary understanding of what it means to be human.

Turning the Page Angus Phillips,2014-02-05 This is an exciting period for the book, a time of innovation, experimentation, and change. It is also a time of considerable fear within the book industry as it adjusts to changes in how books are created and consumed. The movement to digital has been taking place for some time, but with consumer books experiencing the transition, the effects of digitization can be clearly seen to everybody. In *Turning the Page* Angus Phillips analyses the fundamental drivers of the book publishing industry - authorship, readership, and copyright - and examines the effects of

digital and other developments on the book itself. Drawing on theory and research across a range of subjects, from business and sociology to neuroscience and psychology, and from interviews with industry professionals, Phillips investigates how the fundamentals of the book industry are changing in a world of ebooks, self-publishing, and emerging business models. Useful comparisons are also made with other media industries which have undergone rapid change, such as music and newspapers. This book is an ideal companion for anyone wishing to understand the transition of the book, writing and publishing in recent years and will be particularly relevant to students studying publishing, media and communications.

The art of The Faerie Queene Richard Danson Brown,2021-01-19 The Art of The Faerie Queene is the first book centrally focused on the forms and poetic techniques employed by Spenser. It offers a sharp new perspective on Spenser by rereading The Faerie Queene as poetry which is at once absorbing, demanding and experimental. Instead of the traditional conservative model of Spenser as poet, this book presents the poem as radical, edgy and unconventional, thus proposing new ways of understanding the Elizabethan poetic Renaissance. The book moves from the individual words of the poem to metre, rhyme and stanza form onto its larger structures of canto and book. It will be of particular relevance to undergraduates studying Elizabethan poetry, graduate students and scholars of Renaissance poetry, for whom the formal aspect of the poetry has been a topic of growing relevance in recent years.

Audio Book Mikko Keskinen,2008-01-01 Audio Book deals with the ways in which the auditory-voices, sounds, noises-is represented in postphonograph narrative fiction. More specifically, it examines how the various technologies enabling the transmission or storing of sound and voice are figured in selected prose works. Drawing from contemporary American, British, French, and German literature, the author discusses these use of these technologies in Nicholson Baker's Vox, Michel Tournier's Tristan Vox, Heinrich Böll's Murke's Collected Silences, Don DeLillo's The Body Artist, Nick Hornby's High Fidelity, and Sylvia Brownrigg's The Metaphysical Touch. The texts foreground sound technologies (the telephone, radio, tape recorder, answering machine, record player, or, counterintuitively, e-mail) in their narration and manifest important aspects of audio in literature. In prior criticism, these texts have not been systematically read from media-technological perspectives. The sound technologies represented in the texts problematize the clear distinction between speech and writing, or between natural articulation and its technological reproduction. Audio Book suggests that literary writing is metaphorically conceivable as a transmitting and storing technology, as an audiobook of sorts, capable of recording (upon writing) and reproducing (upon reading) auditory information. The sound technologies proper have also bearing on the narrative structure, metaphysics, and style of each fictional work studied in Audio Book. In addition, themes such as identity, genre, the nature of literary representation, and the absence/presence problem are brought to the fore on account of the technologies depicted.

Exploring Intersemiotic Translation Models Haoxuan Zhang,2023-06-29 This volume sets out a new paradigm in

intersemiotic translation research, drawing on the films of Ang Lee to problematize the notion of films as the simple binary of transmission between the verbal and non-verbal. The book surveys existing research as a jumping-off point from which to consider the role of audiovisual dimensions, going beyond the focus on the verbal as understood in Jakobsonian intersemiotic translation. The volume outlines a methodology comprising a system of various models which draw on both translation studies and film studies frameworks, with each model illustrated with examples from Ang Lee's Crouching Tiger, Hidden Dragon; Lust, Caution; and Life of Pi. In situating the discussion within the work of a director whose own work straddles East and West and remediates between cultures and semiotic systems, Zhang argues for an understanding of intersemiotic translation in which films are not simply determined by verbal source material but through the process of intersemiotic translators mediating non-verbal, quality-determining materials into the final film. The volume looks ahead to implications for translation and film research more broadly as well as other audiovisual media. This book will appeal to scholars interested in translation studies, film studies, media studies and cultural studies in general.

Style and Reader Response Alice Bell,Sam Browne,Alison Gibbons,David Peplow,2021-02-08 Style and Reader Response: Minds, media, methods profiles the diversity of theoretical and methodological approaches in reception-oriented research in stylistics. Collectively, the chapters investigate how real readers, players, audiences, and viewers respond to, experience, and interpret texts. Contributions to the book investigate discourse types such as contemporary literature, poetry, political speeches, digital fiction, art exhibitions, and online news discourse. The volume also exemplifies the variety of empirical approaches in reception research, with contributors drawing on a range of methods including discussion groups, interviews, questionnaires, and think-aloud protocols with data analysed from both online and offline sources. Style and Reader Response makes an important contribution to an emerging paradigm within stylistics in which verifiable insights from readers are used to generate new models and new understandings of texts across media, with each essay demonstrating the centrality of empirical research for theoretical, methodological, and/or analytical advancements within and beyond stylistics.

The Life of I Anne Manne,2014-07-01 Far from being the work of a madman, Anders Breivik's murderous rampage in Norway was the action of an extreme narcissist. As the dead lay around him, he held up a finger asking for a Band-Aid. Written with the pace of a psychological thriller, *The Life of I* is a compelling account of the rise of narcissism in individuals and society. Manne examines the Lance Armstrong doping scandal and the alarming rise of sexual assaults in sport and the military, as well as the vengeful killings of Elliot Rodger in California. She looks at narcissism in the pursuit of fame and our obsession with 'making it'. She goes beyond the usual suspects of social media and celebrity culture to the deeper root of the issue: how a new narcissistic character-type is being fuelled by a cult of the self and the pursuit of wealth in a hypercompetitive consumer society. *The Life of I* also offers insights from the latest work in psychology, looking at how narcissism develops. But Manne also shows that there is an alternative: how to transcend narcissism, to be fully alive to the presence of others; how to create a world where love and care are no longer turned inward.

Culture, Media, Theory, Practice Ben Dorfman,2004 The questions of cultural and media theory and analysis are always self-reflective. That is to say that, if we accept the relatively common sense assertion that theory and analysis are the central tasks of culture and media studies, one is never exempted from the questions of what one is attempting to do and why. The book deals with the questions: What does it mean to theorize culture? What does it mean to practice cultural analysis? What does it mean to theorize media? What does it mean to practice media analysis? The Purpose of these questions is to connect research with Culture and Media Studies with global discourses in the field and provide a view of

researchers reflecting on their own methods that will be of use for students and researchers of culture media alike.
