Does "nothing", as a linguistic term, carry within it an implied essence - one of inherent absence - one that makes what seems like negation in the above statement, actually a positive statement? And would substituting "nothing" with "no-thing" avoid this at all? **logic - If the universe came from "nothing", why is it assumed that ...** In your question, given that the universe came from nothing "is it not possible that we can live once again from nothing?" a similar argument can be applied. Taking the fact that the universe "came from nothing" as a given, we can ask what that means. The universe took a while to
