Math-a-Logic Dianne Drazee,2021-09-03 If you thought math was all numbers, you're in for a surprise. The ability to reason logically is both a prerequisite for learning mathematics and a desired outcome of mathematics instruction. Mathematics provides an excellent context in which to make students aware of the logical structures they need to function successfully in any setting. Math-A-Logic is an award-winning text that successfully merges logical thinking with mathematical concepts and calculations. Eight areas of logic are introduced: patterns and sequences, analogies, deduction, inference, sets and Venn diagram, propositions and logical notation, syllogisms, and logical problem solving. Attractive, reproducible worksheets lead students through each topic, providing explanations, examples, and exercises to test their understanding. With mathematics as the vehicle for presenting and practicing the logical concept, students get practice in mathematical concepts and computations while building thinking skills. The end result is clearer thinking and enhanced problem-solving abilities. This unique approach is sure to be a favorite supplement to your regular math program. The attractive illustrations, clear instructions, solid content, and ease of use make this book a winner. This book is the winner of Learning Magazine's Teacher Choice award. Grades 4-8

Interlinguicity, Internationality, and Shakespeare Michael Saenger,2014-12-01 Languages have become more mobile than ever before, producing translations, transplantations, and cohabitations of all kinds. The early modern period

also witnessed profound linguistic transformation, but in very different ways. Interlinguicity, Internationality, and Shakespeare undoes the illusion that Shakespeare wrote in what we now think of as English. In a series of essays approaching Shakespeare from unique and thought-provoking perspectives, contributors from history, performance criticism, and comparative literature look at interlinguicity, the condition of being between languages, and internationality, the condition of being between countries. Each essay focuses on local issues, such as community identification in the Netherlands of Shakespeare's time and the appropriation of Shakespeare in German literature in the nineteenth century, to suggest that Shakespeare never wrote in English because English was not then, nor is it now, an intact, knowable system. Many languages existed in sixteenth-century London, and English did not have clear limits. Interlinguicity, Internationality, and Shakespeare helps to explain the hybridity that Shakespeare embraced in all his writing. Contributors include Paula Blank (College of William and Mary), Lauren Coker (Saint Louis University), Brian Gingrich (Princeton University), Alexa Huang (George Washington University), James Loehlin (University of Texas at Austin), Scott Newstok (Rhodes College), Patricia Parker (Stanford University), Elizabeth Pentland (York University), Philip Schwyzer (University of Exeter), Gary Waite (University of New Brunswick), and Robert N. Watson (University of California, Los Angeles)

On the Uses of the Fantastic in Modern Theatre I. Eynat-Confino,2008-11-24 The book reveals how the fantastic is used in modern theatre as a manipulative device to encode the unspeakable and control audience response, challenging conventional readings of all authors who use the fantastic.

Oral History of Germans Taken To The USSR With Their Obsolete DFS 346-Part 4 David Myhra PhD,2013-09-28 This is an oral history of several dozens of German aviation designers and engineers that were taken to the Soviet Union in October 1946 along with their DFS 346. The information contained here-in has never been made public until now. Dr Myhra traveled to all the places mentioned and with the assistance of language interpreters Margarita Reck of Salem-Neufrach, West Germany and Gerhard Hopf of Naples, FL, was able to communicate with the German-speaking engineers and designers. These are the unedited transcriptions of the actual conversations. Very interesting material! Enjoy all 5 parts of this rare and informative conversation collection!

The Present Word. Culture, Society and the Site of Literature John Walker,2017-12-02 This book addresses three key areas of intellectual enquiry: literary criticism, cultural critique, and philosophical theology. Once closely related, especially in the Catholic tradition, they often appear to be separate and unconnected domains in the modern university. The work of Nicholas Boyle is one of the most significant recent attempts to reconnect them. Responding to that initiative, *The Present Word* challenges this fragmentation of knowledge. Several of the essays reflect a major change of emphasis in literary studies

over the last two decades: the reconnection of an idea of literary criticism closely related to the experience of reading, and the wider societal and political concerns addressed by Cultural Studies. Contributors also debate, from both perspectives, whether theological concepts can illuminate the secular culture in which literature is written and read. John Walker is Senior Lecturer in German at Birkbeck College, London, where he served as Head of the School of Languages, Linguistics and Culture from 2006-2009.

Theatre Under the Nazis John London, 2000 Were those who worked in the theatres of the Third Reich willing participants in the Nazi propaganda machine or artists independent of official ideology? To what extent did composers such as Richard Strauss and Carl Orff follow Nazi dogma? How did famous directors such as Gustaf Gründgens and Jürgen Fehling react to the new regime? Why were Shakespeare and George Bernard Shaw among the most performed dramatists of the time? And why did the Nazis sanction Jewish theatre? This is the first book in English about theater in the entire Nazi period. The book is based on contemporary press reports, research in German archives, and interviews with surviving playwrights, actors, and musicians.

Functional Descriptions Ruqaiya Hasan, Carmel Cloran, David G. Butt, 1996-06-28 This volume focuses on the relation between theory and description by examining aspects of transitivity in different languages. Transitivity — or case grammar, to use the popular term — has always occupied a centre-stage position in linguistics, not least because of its supposedly privileged relation to states of affairs in the real world. Using a systemic functional perspective, the ten papers in this volume make a contribution to this scholarship by focusing on the transitivity patterns in language as the expression of the experiential metafunction. Through a study of different languages — English, Dutch, German, Finnish, Chinese and Pitjantjatjara — the contributors provide functional descriptions of the various categories of process, their participants and circumstances, including phenomena such as di-transitivity, causativity, the get-passive, etc. With the relation between theories and descriptions running through the ten chapters of this volume as sometimes an overt and sometimes a covert theme, the chapters point to the nature of the linguistic fact which is linked ineluctably on the one hand to the nature of the theory and on the other to the speakers' experience of the world in which they live. The majority of papers included in the

volume derive from the 19th International Systemic Functional Congress at Macquarie University.
