

Terry Riley In C Score

James E. Perone

Terry Riley's In C Robert Carl, 2009-08-05 Setting the stage for a most intriguing journey into the world of minimalism, Robert Carl's Terry Riley's In C argues that the work holds its place in the canon because of the very challenges it presents to classical music. Carl examines In C in the context of its era, its grounding in aesthetic practices and assumptions, its process of composition, presentation, recording, and dissemination.

Teaching and Evaluating Music Performance at University John Encarnacao, Diana Blom, 2020-04-28 Fresh perspectives on teaching and evaluating music performance in higher education are offered in this book. One-to-one pedagogy and Western art music, once default positions of instrumental teaching, are giving way to a range of approaches that seek to engage with the challenges of the music industry and higher education sector funding models of the twenty-first century. Many of these approaches – formal, informal, semi-autonomous, notated, using improvisation or aleatory principles, incorporating new technology – are discussed here. Chapters also consider the evolution of the student, play as a medium for learning, reflective essay writing, multimodal performance, interactivity and assessment criteria. The contributors to this edited volume are lecturer-practitioners – choristers, instrumentalists, producers and technologists who ground their research in real-life situations. The perspectives extend to the challenges of professional development programs and in several chapters incorporate the experiences of students. Grounded in the latest music education research, the book surveys a contemporary landscape where all types of musical expression are valued; not just those of the conservatory model of decades past. This volume will provide ideas and spark debate for anyone teaching and evaluating music performance in higher education.

The Oxford Handbook of Computer Music Roger T. Dean, 2009-09-16 *The Oxford Handbook of Computer Music* offers a state-of-the-art cross-section of the most field-defining topics and debates in computer music today. A unique contribution to the field, it situates computer music in the broad context of its creation and performance across the range of issues - from music cognition to pedagogy to sociocultural topics - that shape contemporary discourse in the field. Fifty years after musical tones were produced on a computer for the first time, developments in laptop computing have brought computer music within reach of all listeners and composers. Production and distribution of computer music have grown tremendously as a result, and the time is right for this survey of computer music in its cultural contexts. An impressive and international array of music creators and academics discuss computer music's history, present, and future with a wide perspective, including composition, improvisation, interactive performance, spatialization, sound synthesis, sonification, and modeling. Throughout, they merge practice with theory to offer a fascinating look into computer music's possibilities and enduring appeal.

Mind, Body, World Michael R. W. Dawson, 2013 Cognitive science arose in the 1950s when it became apparent that a number of disciplines, including psychology, computer science, linguistics, and philosophy, were fragmenting. Perhaps owing to the field's immediate origins in cybernetics, as well as to the foundational assumption that cognition is information processing, cognitive science initially seemed more unified than psychology. However, as a result of differing interpretations of the foundational assumption and dramatically divergent views of the meaning of the term information processing, three separate schools emerged: classical cognitive science, connectionist cognitive science, and embodied cognitive science. Examples, cases, and research findings taken from the wide range of phenomena studied by cognitive scientists effectively

explain and explore the relationship among the three perspectives. Intended to introduce both graduate and senior undergraduate students to the foundations of cognitive science, *Mind, Body, World* addresses a number of questions currently being asked by those practicing in the field: What are the core assumptions of the three different schools? What are the relationships between these different sets of core assumptions? Is there only one cognitive science, or are there many different cognitive sciences? Giving the schools equal treatment and displaying a broad and deep understanding of the field, Dawson highlights the fundamental tensions and lines of fragmentation that exist among the schools and provides a refreshing and unifying framework for students of cognitive science.

Postmodernity's Musical Pasts Tina Frühauf, 2020 *Postmodernity's Musical Pasts* covers topics from classical to popular and neo-traditional musics to concerns of the disciplines of musicology. Such varied topics mirror the eclectic and diverse nature of the postwar era itself.

The Hyperorchestra Sergi Casanelles, 2024-12-19 This book studies the “hyperorchestra” as used in music for the screen and draws from the intersection of practice and theory. The term hyperorchestra derives from hyperreality, a postmodern philosophical concept coined by Jean Baudrillard. The hyperorchestra is a virtual ensemble that inhabits hyperreality. It approaches music spectrally with the aim of becoming a more effective vessel for meaning generation. The book is informed by concepts from postmodern philosophy, such as hyperreality and Marshall McLuhan's theory of media. The book is also

informed by the author's own compositional practice; it describes contemporary processes, current software tools, orchestration and instrumentation principles, and contemporary approaches to music composition (such as spectral music). In doing so, the book proposes a new perspective for analyzing contemporary film music that pinpoints the importance of the relationship between timbre, meaning, and the different narrative levels within an audiovisual piece.

A History of Music in Western Culture Mark Evan Bonds, 2010 A History of Music in Western Culture 3/e is based on the premise that the best way to convey the history of Western music is to focus squarely on the music. Organized around a carefully selected repertory of works, this text integrates the requisite names, dates, and concepts around specific compositions. Once familiar with a representative body of music, students can better grasp the evolution of musical style and music's changing uses within the Western tradition. Even more importantly, they will have a sound basis from which to explore other musical works and repertories. This text builds its narrative around the core repertory represented in the Anthology of Scores and the corresponding sets of compact discs.

Settling Scores Joseph Franklin, 2006 SETTLING SCORES: A Life in the Margins of American Music details one life lived in the margins of America's musical consciousness. From a working-class background in gritty North Philadelphia to the sanctity of European concert stages, from imagined dangers lurking along the waterfronts in mysterious Asian cities to the real dangers lurking in the narrow minds of those who uphold the status quo in American music, this book reveals the life of one who embraced change, and, in the process, gained political leverage and intellectual freedom. It is the story of Joseph Franklin and a legion of collaborators, and it is a snapshot view of a slice of America's musical landscape in the final quarter of the 20th century, including a history of Relâche and The Relâche Ensemble. Born in Philadelphia, Joseph Franklin is a graduate of the Philadelphia Musical Academy and Temple University's Graduate School of Music. He has composed works for mixed instrumental/vocal ensembles, film, video, theater and dance. In 1977 he co-founded The Relâche Ensemble, which evolved into Relâche, Inc. a presenting and producing organization in support of the Relâche Ensemble. He served as founding executive and artistic director of Relâche until 1998. Independently, and as Director of Relâche, he has been a producer of concerts, festivals, recordings, radio programs, residency programs, international tours and other related music events, including the NEW MUSIC AMERICA 1987 Festival, NEW MUSIC AT ANNENBERG at The University of Pennsylvania and MUSIC IN MOTION, a nationwide audience development project. He formerly served as Artistic Director for Helena Presents--The Myrna Loy Center, a performing arts and film center located in Helena, Montana. He has published criticism and book reviews in the Philadelphia Inquirer and Philadelphia City Paper. While living in Louisiana he developed and taught courses in arts administration and an overview of 20th century music at the University of New Orleans while serving as an independent consultant to arts organizations. He currently serves as executive director for Chamber Music Albuquerque, a presenting organization dedicated to presenting world-class chamber music ensembles in concert.

This Life of Sounds Renee Levine Packer,2010-07-23 This book is an invaluable chronicle of an exuberant time of artistic exploration and experimentation populated by now legendary figures such as John Cage, Morton Feldman, Cornelius Cardew, Terry Riley, Julius Eastman, David Tudor, and many others who were part of this under-known chapter of late 20th century music history. Levine Packer brings it to life once again.

The Ashgate Research Companion to Minimalist and Postminimalist Music Keith Potter,Kyle Gann,2016-03-23 In recent years the music of minimalist composers such as La Monte Young, Terry Riley, Steve Reich and Philip Glass has, increasingly, become the subject of important musicological reflection, research and debate. Scholars have also been turning their attention to the work of lesser-known contemporaries such as Phill Niblock and Eliane Radigue, or to second and third generation minimalists such as John Adams, Louis Andriessen, Michael Nyman and William Duckworth, whose range of styles may undermine any sense of shared aesthetic approach but whose output is still to a large extent informed by the innovative work of their minimalist predecessors. Attempts have also been made by a number of academics to contextualise the work of composers who have moved in parallel with these developments while remaining resolutely outside its immediate environment, including such diverse figures as Karel Goeyvaerts, Robert Ashley, Arvo Pärt and Brian Eno. Theory has reflected practice in many respects, with the multimedia works of Reich and Glass encouraging interdisciplinary approaches, associations and interconnections. Minimalism's role in culture and society has also become the subject of recent interest and debate, complementing existing scholarship, which addressed the subject from the perspective of historiography, analysis, aesthetics and philosophy. The Ashgate Research Companion to Minimalist and Postminimalist Music provides an authoritative overview of established research in this area, while also offering new and innovative approaches to the subject.

A Theory of Music Analysis Dora A. Hanninen,2012 This book introduces a theory of music analysis that one can use to explore aspects of segmentation and associative organization in a wide range of repertoire including Western classical music from the Baroque to the present, with potential applications to jazz and popular music, and some non-Western musics. Rather than a methodology, the theory provides analysts with precise language and a broad, flexible conceptual framework through which they can formulate and investigate questions of interest and develop their own interpretations of individual pieces and passages. The theory begins with a basic distinction among three domains of musical experience and discourse about it: the sonic (psychoacoustic); the contextual (or associative, sparked by varying degrees of repetition); and the structural (guided by a specific theory of musical structure or syntax invoked by the analyst). A comprehensive presentation of the theory, with copious musical illustrations, is balanced with close analyses of works by Beethoven, Debussy, Nancarrow, Riley, Feldman, and Morris. Dora A. Hanninen is professor of music theory at the University of Maryland. She received the 2010 Outstanding Publication Award from the Society for Music Theory.

Switched on Albert Glinsky,2022 The Moog synthesizer bent the course of music forever, Rolling Stone declared. Bob

Moog walked into history in 1964 when his homemade contraption unexpectedly became a sensation that heavily influenced the sounds of the 1960's and 1970's. In *Switched On*, Albert Glinsky draws on his exclusive access to Bob Moog's personal archives and his probing interviews with Bob's family and a multitude of associates, for this first complete biography of the man and his work.

Crisis Style Michael Dango, 2021-11-16 In this expansive and provocative new work, Michael Dango theorizes how aesthetic style manages crisis—and why taking crisis seriously means taking aesthetics seriously. Detoxing, filtering, bingeing, and ghosting: these are four actions that have come to define how people deal with the stress of living in a world that seems in permanent crisis. As Dango argues, they can also be used to describe contemporary art and literature. Employing what he calls promiscuous archives, Dango traverses media and re-shuffles literary and art historical genealogies to make his case. The book discusses social media filters alongside the minimalism of Donald Judd and La Monte Young and the television shows *The West Wing* and *True Detective*. It reflects on the modernist cuisine of Ferran Adrià and the fashion design of Issey Miyake. And, it dissects writing by Barbara Browning, William S. Burroughs, Raymond Carver, Mark Danielewski, Jennifer Egan, Tao Lin, David Mitchell, Joyce Carol Oates, Mary Robison, and Zadie Smith. Unpacking how the styles of these works detox, filter, binge, or ghost their worlds, *Crisis Style* is at once a taxonomy of contemporary cultural production and a theorization of action in a world always in need of repair. Ultimately, Dango presents a compelling argument for why we need aesthetic theory to understand what we're doing in our world today.

Repeating Ourselves Robert Fink, 2005-09-13 Where did musical minimalism come from—and what does it mean? In this significant revisionist account of minimalist music, Robert Fink connects repetitive music to the postwar evolution of an American mass consumer society. Abandoning the ingrained formalism of minimalist aesthetics, *Repeating Ourselves* considers the cultural significance of American repetitive music exemplified by composers such as Terry Riley, Steve Reich, and Philip Glass. Fink juxtaposes repetitive minimal music with 1970s disco; assesses it in relation to the selling structure of mass-media advertising campaigns; traces it back to the innovations in hi-fi technology that turned baroque concertos into ambient easy listening; and appraises its meditative kinship to the spiritual path of musical mastery offered by Japan's Suzuki Method of Talent Education.

Brian Eno Sean Albiez, David Pattie, 2016-08-11 Examines Eno's work as a musician, theoretician, and collaborator.

Guide to the Contemporary Harp Mathilde Aubat-Andrieu, Laurence Bancaud, Aurélie Barbé, Hélène Breschand, 2019-02-11 Harps and harp music have enjoyed a renaissance over the past century and today can be heard in a broad array of musical contexts. *Guide to the Contemporary Harp* is a comprehensive resource that examines the vibrant present-day landscape of the harp. The authors explore the instrument from all angles, beginning with organology; moving through composition, notation, and playing techniques; and concluding with the contemporary repertoire for the harp. The

rapid diversification in these areas of harp performance is the result of both technological innovations in harp making, which have produced the electric harp and MIDI harp, and innovative composers and players. These new instruments and techniques have broadened the concept of what is possible and what constitutes harp music for today. Guide to the Contemporary Harp is an essential guide for any harpist looking to push the instrument and its music to new heights.
