web nov 3 2015 with optical sensor arrays tiny lens systems serve to focus

and concentrate the light onto the photodiode surface instead of allowing it to fall on non photosensitive areas of the pixel device fill factor area occupied by the microlens arrays mostly the lens shape is cylindrical or spherical array

size strongly depends on the applications

web oct 16 2021 help me please to model the lens array in sequential mode i mean some lens no microlens in

the same plane on the circle radius icon  
best answer by ray the sequential dll is quite easy to modify non sequential are more complex there are more array types available in this forum post
