La Technique, Ou L'Enjeu Du Siècle. The Technological Society ... Translated ... by John Wilkinson, Etc Jacques Ellul,John WILKINSON (of the Center for the Study of Democratic Institutions, Santa Barbara, California.),1965

**La technique ou l'enjeu du siècle** Jacques Ellul,1990 La 4e de couverture indique : La Technique ou l'enjeu du siècle a connu une destinée singulière. Refusé par deux éditeurs, il a finalement été publié dans une collection universitaire à faible tirage et a très vite été épuisé. Jamais réédité (sauf en édition pirate) il n'a cessé d'être lu et pillé, même si ceux qui l'ont utilisé ne l'ont pas toujours cité. Aux Etats-Unis, il est constamment réédité en collection de poche et est inscrit au programme des lectures obligées (text-books) de la plupart des universités. Il a également eu une grande influence chez les dissidents des pays de l'Est. Jacques Ellul n'a cessé d'approfondir sa réflexion sur la technique dans des livres devenus des classiques : Propagandes (1960), L'illusion politique (1963), Le système technicien (1977) et, tout récemment, Le bluff technologique (1987). Mais on ne peut comprendre son œuvre sans de reporter à ce livre fondateur. Prophétiques lorsqu'elles ont été écrites, ses vues sur la technique comme fait central de nos sociétés conservent plus de 35 ans après une étonnante et parfois inquiétante actualité. En 1960, Jacques Ellul avait préparé une deuxième édition revue et complétée qu'un éditeur peu avisé a renoncé à publier. C'est ce texte que les Classiques des sciences sociales offrent aujourd'hui au lecteur.

**Jacques Ellul and the Technological Society in the 21st Century** Helena M. Jerónimo,José Luís Garcia,Carl Mitcham,2013-07-08 This volume rethinks the work of Jacques Ellul (1912-1994) on the centenary of his birth, by presenting an overview of the current debates based on Ellul's insights. As one of the most significant twentieth-century thinkers about technology, Ellul was among the first thinkers to realize the importance of topics such as globalization, terrorism, communication technologies and ecology, and study them from a technological perspective. The book is divided into three sections. The first discusses Ellul's diagnosis of modern society, and addresses the reception of his work on the technological society, the notion of efficiency, the process of symbolization/de-symbolization, and ecology. The second analyzes communicational and cultural problems, as well as threats and trends in early twenty-first century societies. Many of the issues Ellul saw as crucial - such as energy, propaganda, applied life sciences and communication - continue to be so. In fact they have grown exponentially, on a global scale, producing new forms of risk. Essays in the final section examine the duality

of reason and revelation. They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge, which is to say, on the one hand, the experience of the human being as contained in the rationalist, sociological and philosophical traditions. On the other hand there are the transcendent roots of human existence, as well as "revealed knowledge," in the mystical and religious traditions. The meeting of these two traditions enables us to look at Ellul's work as a whole, but above all it opens up a space for examining religious life in the technological society.

Jacques Ellul Jacob E. Van Vleet,Jacob Marques Rollison,2020-04-13 Jacques Ellul (1912-1994) was Professor of the History and Sociology of Institutions at the University of Bordeaux. A sociologist, historian, and Protestant lay theologian, Ellul is primarily known for his writings on technology, propaganda, and Christian anarchism. He influenced a wide array of thinkers including Ivan Illich, William Stringfellow, Thomas Merton, Paul Virilio, and Neil Postman. In this book, Jacob Van Vleet and Jacob Marques Rollison guide readers through Ellul's most influential theological and sociological writings. By understanding Ellul's primary works, readers will be able to clearly grasp his social theory and theological ethics, profiting from his deep insight and prophetic wisdom.

Penser les fondements philosophiques de la conversion écologique Isabelle Priaulet,2020-10-28 Ce livre entend poser les fondements philosophiques d'une « conversion écologique » en éclairant la dimension ontologique de la crise écologique. En s'appuyant sur des auteurs tels que Heidegger, Hans Jonas, Günther Anders et Jacques Ellul, l'auteure montre, dans un premier temps, la nécessité d'une conversion face au péril métaphysique que représente la Technique comme dévoiement de notre « être-au-monde ». La seconde partie consiste à poser les fondements philosophiques et religieux du concept de conversion. De la metanoia platonicienne aux thérapies de l'âme stoïciennes et épiciennes, l'auteur explore la place de la connaissance de la physis dans le « retour à Soi » afin de faire émerger la possibilité et les modalités d'une « conversion écologique ». La dernière partie, plus spécifiquement consacrée à l'écologie, utilise les modalités de la conversion écologique esquissées avec les sagesses grecques et chrétiennes pour penser un changement de notre affect du monde et défendre l'hypothèse d'une « empathie universelle » en affinité avec la philosophie merleau-pontienne de la « chair du monde ». À travers deux grands courants de l'écologie que sont l'écologie profonde et la wilderness, l'auteure jette les bases d'une ontologie relationnelle jusqu'à penser, contre toute tentation catastrophiste, une « échologie de la Joie », une spiritualité de la résonance, en dialogue avec les traditions asiatiques

**French Encounters with the American Counterculture 1960-1980** Caroline Maniaque-Benton,2016-12-05 French-American interrelationships in the areas of design and creative thinking have been under-acknowledged. It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas. This book includes interviews

with French architects who visited the United States in the 1960s-1970s and then assumed influential positions in the press and education in France. Some of these architects found in non-mainstream America and its radical groups of architectural drop-outs a liberating force, free of the taint of American capitalism and the high-investment technology. Often living in alternative student communities, they saw highly innovative, low-cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living. Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time.

French Philosophy of Technology Sacha Loeve,Xavier Guchet,Bernadette Bensaude Vincent,2018-05-28 Offering an overall insight into the French tradition of philosophy of technology, this volume is meant to make French-speaking contributions more accessible to the international philosophical community. The first section, "Negotiating a Cultural Heritage," presents a number of leading 20th century philosophical figures (from Bergson and Canguilhem to Simondon, Dagognet or Ellul) and intellectual movements (from Personalism to French Cybernetics and political ecology) that help shape philosophy of technology in the Francophone area, and feed into contemporary debates (ecology of technology, politics of technology, game studies). The second section, "Coining and Reconfiguring Technoscience," traces the genealogy of this controversial concept and discusses its meanings and relevance. A third section, "Revisiting Anthropological Categories," focuses on the relationships of technology with the natural and the human worlds from various perspectives that include anthropotechnology, Anthropocene, technological and vital norms and temporalities. The final section, "Innovating in Ethics, Design and Aesthetics," brings together contributions that draw on various French traditions to afford fresh insights on ethics of technology, philosophy of design, techno-aesthetics and digital studies. The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions.

**A New Reading of Jacques Ellul** Jacob Marques Rollison,2020-09-10 This book presents an original and dynamic reading of the twentieth-century French sociologist and theological ethicist Jacques Ellul. Adopting Ellul's use of 'presence' as a hermeneutical key to understanding his work, it examines the origins of Ellul's approach to presence in his readings of Kierkegaard and the biblical book of Ecclesiastes, highlights the central structural role of presence in Ellul's theological ethics, and elucidates a crucial turning point in Ellul's theology following a personal crisis in Ellul's faith and life. Drawing from numerous unpublished and untranslated texts, Jacob Marques Rollison argues that this crisis involves confrontation with a critique of presence manifest in Ellul's reading of and engagement with Michel Foucault. Marques Rollison distills Ellul's sociological critiques and theological responses to this crisis, presenting Ellul's evolving theology against the background of major shifts in French intellectual life. In doing so, the author simultaneously calls for renewed engagement with Ellul's prophetic thought, critically appraises Ellul's dialectical theology and Marxist inheritances, and develops a

robustly Protestant approach to theological communication ethics for our time.

*Derrida and Technology: Life, Politics, and Religion* Björn Sjöstrand,2021-10-05 This book is the first monograph that takes a comprehensive approach to Jacques Derrida as a philosopher of technology. It refines and complements his mainstream image as a philosopher of language and deconstructionist of classical literary and philosophical texts. This volume outlines the key features of Derrida's alternative philosophy of technology, a philosophy which Sjöstrand argues, avoids the problems associated with, on the one hand, a Heideggerian orientation, which completely separates thinking and technology and, on the other, an empirically oriented "post-phenomenology" that can be said to be hegemonic within the field today. Based on a sustained interpretation of Derrida, and a robust, coherent philosophy of technology, a phenomenology of technology is developed that, in a radical way, extends the concept of technology to cover the entire field of phenomenology. This places the technological not in opposition to humanity, but rather always already in close proximity to man and, consequently, to life, ethics, politics, democracy and religion. Strikingly, this important aspect of Derrida's thinking is only rarely analyzed or discussed by his many exegetes. This text appeals to graduates and researchers working on Derrida, phenomenology, and the philosophy of technology.

**La nouvelle théologie verte** Frédéric Rognon,Christophe Monnot,2021-11-10 La question de la prise en compte de l'écologie par les Églises se pose de manière accrue dans notre société actuelle. Comment alors penser théologiquement cette prise de conscience? Comment intégrer la dimension écologique sans sacraliser la nature à outrance? Comment s'activer pour la sauvegarde de la création dans une perspective chrétienne? Des penseurs de différentes traditions chrétiennes (catholiques, protestantes et orthodoxes), de trois générations de théologiens (pionniers, consolidateurs et nouveaux penseurs) et de diverses sensibilités dans la théologie verte discutent dans ce volume de l'émergence d'une préoccupation essentielle, celle des rapports entre l'humain et son environnement et de Dieu à sa Création. Ce volume témoigne que la théologie verte est sortie des marges pour devenir une préoccupation centrale des Églises contemporaines. Jamais une réflexion de cette ampleur n'avait été disponible pour un public francophone.

Handbook of the Anthropocene Nathanaël Wallenhorst,Christoph Wulf,2023-08-21 This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene, this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things, in its biogeophysical and socio-political reality. These researchers also sought to define a historical and prospective anthropology that integrates social, economic, cultural and political issues as well as, of course, environmental ones. What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene? And what are the educational and political issues involved? Anthropocene is fast becoming a widely-used term, but thus far, there been no reference work explaining the thoughts of the greatest experts of the present day on this subject (at the intersection of

biogeophysical and socio-political knowledge). A scientific and political concept (but which is also the conceptual vehicle for conveying the scientific community's sense of concern), this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science, the social sciences and the humanities. What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene and also the identification of possible anthropological changes. This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written.

**Les philosophes et la technique** Pascal Chabot, Gilbert Hottois, 2003 Les études réunies ont été présentées au Colloque International de Bruxelles organisé sous les auspices de la FISP (Fédération Internationale des Sociétés de Philosophie) en 2002 dont le thème a été conservé comme titre du recueil. L'intention était d'illustrer la manière dont divers philosophes ont traité ou esquise la question de la technique. L'ampleur du champ, historique et contemporain, interdisait toute exhaustivité. Le dessein était plus anthologique qu'encyclopédique. Les analyses critiques qui composent le volume manifestent l'intérêt de cette approche appliquée à Aristote, Lulle, Salutati, Kant, Kapp, Bergson, Ortega, Schmitt, Jonas, Brun, Arendt, Foucault, Simondon, Heidegger, Haraway, Fukuyama. Et il serait fécond de l'étendre tant il vrai qu'en notre époque très technologique, poser aux philosophes qui nous sont les plus familiers, la question du sort qu'ils réservent à la technique s'avère riche en enseignements sur eux et pour nous.

*Jacques Ellul* Frédéric Rognon, 2007 Auteur d'une œuvre considérable (cinquante-huit livres, plus d'un millier d'articles), Jacques Ellul (1912-1994) est cependant resté dans l'ombre toute sa vie. Critique de la modernité technique à l'époque des Trente Glorieuses, réticent à l'égard des utopies séculières au temps du Tout est Politique, en dialogue exigeant avec le marxisme lorsque celui-ci, véritable idéologie dominante, ne souffrait aucune mise en question, confessant sa foi chrétienne quand on ne parlait que de fin de la religion, il ne fit preuve d'aucune complaisance à l'endroit des modes intellectuelles et culturelles. On le redécouvre aujourd'hui, plus de dix années après sa mort, en se disant qu'il avait peut-être tout simplement eu raison trop tôt, avant tout le monde. Sa critique de la société technicienne, en particulier, rencontre un écho grandissant dans les milieux écologistes et altermondialistes, mais aussi auprès de nombreux contemporains soucieux de l'avenir de la planète et des générations futures. Intellectuel protestant du XXe siècle, Jacques Ellul se révèle être un penseur du XXIe siècle : un homme de notre temps, qui nous aide à comprendre notre condition moderne, et plus particulièrement la mission des chrétiens pour aujourd'hui.

**Fifteenth-Century Carthusian Reform: The World of Nicholas Kempf** Martin, 2021-11-01 Fifteenth-Century Carthusian Reform argues that monastic theology offers a medieval Catholic paradigm distinct from the scholastic theology that has been the conventional source for medieval-oriented interpretations of Renaissance and Reformation. It is based on

thorough study of the manuscript record. Nicholas Kempf (ca. 1415-1497) taught at the University of Vienna before becoming the head of Carthusian monasteries in rural Austria and Slovenia. Faced with calls for reform in church and society, he placed his confidence in the patristic Christian idea of reform: the reform of the image of God in the human person. This contemplative monastic idea of reform depended on authoritative structures, especially the monastic rule and rational — yet divinely inspired — discernment by a spiritual director. What seemed like simpleminded submission to monastic structures was actually a way to avoid relying on human effort for salvation. By returning to one's true self (the image of God), one opened oneself up for genuine social relationships. To activist reformers, whether adherents of medieval scholasticism, Renaissance humanism, or modern Enlightenment, this monastic idea of reform has seemed escapist, backward-looking, and womanish. Monks accepted these labels but read them as signs of hidden strength. This book attempts to read through monastic lenses.

**The Thought of Jacques Ellul** Darrell J. Fasching, 1981 A study of the work of Jacques Ellul. This work argues that he is one of the most important Christian thinkers on the implications of a technological civilization with regard to religion.

Revolutionary Warfare Terrence G. Peterson, 2024-09-15 Revolutionary Warfare investigates how efforts to counter a revolution could also be revolutionary. The Algerian War fractured the French Empire, destroyed the legitimacy of colonial rule, and helped launch the Third Worldist movement for the liberation of the Global South. By tracing how French generals, officers, and civil officials sought to counter Algerian independence with their own project of radical social transformation, Terrence G. Peterson reveals that the conflict also helped to transform the nature of modern warfare. The French war effort was never defined solely by repression. As Peterson details, it also sought to fashion new forms of surveillance and social control that could capture the loyalty of Algerians and transform Algerian society. Hygiene and medical aid efforts, youth sports and education programs, and psychological warfare campaigns all attempted to remake Algerian social structures and bind them more closely to the French state. In tracing the emergence of such programs, Peterson reframes the French war effort as a project of armed social reform that sought not to preserve colonial rule unchanged, but to revolutionize it in order to preserve it against the global challenges of decolonization. Revolutionary Warfare demonstrates how French officers' efforts to transform warfare into an exercise in social engineering not only shaped how the Algerian War unfolded from its earliest months, but also helped to forge a paradigm of warfare that dominated strategic thinking during the Cold War and after: counterinsurgency.

**The Decline of Christendom in Western Europe, 1750-2000** Hugh McLeod, Werner Ustorf, 2003-07-17 Christendom lasted for over a thousand years in Western Europe, and we are still living in its shadow. For over two centuries this social and religious order has been in decline. Enforced religious unity has given way to increasing pluralism, and since 1960 this process has spectacularly accelerated. In this 2003 book, historians, sociologists and theologians from six countries answer

two central questions: what is the religious condition of Western Europe at the start of the twenty-first century, and how and why did Christendom decline? Beginning by overviewing the more recent situation, the authors then go back into the past, tracing the course of events in England, Ireland, France, Germany and the Netherlands, and showing how the fate of Christendom is reflected in changing attitudes to death and to technology, and in the evolution of religious language. They reveal a pattern more complex and ambiguous than many of the conventional narratives will admit.

**A Critical Theory for the Anthropocene** Nathanaël Wallenhorst, 2023-09-15 This volume, which is rooted in biogeophysical studies, addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post-Promethean approach. This work explores the idea of an anthropological mutation of political consolidation from a “post-Promethean togetherness”, to creating the capacity to act together. The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure. This has three dimensions: hubris, the world and coexistence referring respectively to the logic of profit of the homo oeconomicus, the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religatus. The intellectual and political attitude outlined in this book is an extension of critical theory: the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it, the ultimate goal being social transformation. The author propose an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non-human. The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for hope despite this heritage of the Anthropocene. In addition to Arendtian thinking, this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet, Hartmut Rosa, Andreas Weber, Dominique Bourg, and Christian Arnsperger. This volume is of interest to researchers in the Anthropocene.

Innovation, Between Science and Science Fiction Thomas Michaud, 2017-07-17 Fantasy and science fiction are both involved in the process of innovation in techno-scientific societies. Long regarded as a hindrance to rationality, and to science, science fiction has become the object of praise in recent decades. Innovative organizations use science fiction to stimulate the creativity of their teams, and more and more entrepreneurs are using its influence to develop innovation. Scientific practice relies in part on an imaginary dimension. The mapping of the technical imagination of science fiction has become an important strategic issue, as has its patentability. The conquest of space, the construction of cyberspace and virtual reality, biotechnologies and nanotechnologies are all at the center of futuristic fictions that participate in scientific speeches and discoveries.
