Tracking Classical Monsters in Popular Culture Liz Gloyn, 2019-10-31 What is it about ancient monsters that popular culture still finds so enthralling? Why do the monsters of antiquity continue to stride across the modern world? In this book, the first in-depth study of how post-classical societies use the creatures from ancient myth, Liz Gloyn reveals the trends behind how we have used monsters since the 1950s to the present day, and considers why they have remained such a powerful presence in our shared cultural imagination. She presents a new model for interpreting the extraordinary vitality that classical monsters have shown, and their enormous adaptability in finding places to dwell in popular culture without sacrificing their connection to the ancient world. Her argument takes her readers through a comprehensive tour of monsters on film and television, from the much-loved creations of Ray Harryhausen in *Clash of the Titans* to the monster of the week in *Hercules: The Legendary Journeys*, before looking in detail at the afterlives of the Medusa and the Minotaur. She develops a broad theory of the ancient monster and its life after antiquity, investigating its relation to gender, genre and space to offer a bold and novel exploration of what keeps drawing us back to these mythical beasts. From the siren to the centaur, all monster lovers will find something to enjoy in this stimulating and accessible book.

Holmes and the Ripper Lucyna Krawczyk-Żywko, 2024-03-22 In versus narratives Sherlock Holmes is fighting or otherwise engaging Jack the Ripper. These texts pit the archetypal detective against the archetypal serial killer using established formulas as well as new narrative and generic features, a combination that results in their mass appeal among authors and audiences alike. The list of primary sources includes 120 titles – novels, short stories, plays, fanfiction, ‘Grand Game’ studies, movies, TV shows, video and board games – which are treated as a dialogic network of transfictional and transmedial texts. This study unpacks the versus corpus in its media dispersal by analysing Sherlock Holmes and Jack the Ripper as serial figures and culture-texts emphasising the increasing palimpsestousness of the former and the multidirectional polymorphousness of the latter, and tracing the overlapping Doylean culture-text. It also addresses the way character constellations are represented, negotiated, and fed back into the versus network, contextualising them within the coalescence of fact and fiction, Gothic and crime fiction frames, cultural memory, neo-Victorianism, and biofiction.

Collaborative Worldbuilding for Video Games Kaitlin Tremblay, 2023-03-08 This book is a theoretical and practical deep dive into the craft of worldbuilding for video games, with an explicit focus on how different job disciplines contribute to

worldbuilding. In addition to providing lenses for recognizing the various components in creating fictional and digital worlds, the author positions worldbuilding as a reciprocal and dynamic process, a process which acknowledges that worldbuilding is both created by and instrumental in the design of narrative, gameplay, art, audio, and more. Collaborative Worldbuilding for Video Games encourages mutual respect and collaboration among teams and provides game writers and narrative designers tools for effectively incorporating other job roles into their own worldbuilding practice and vice versa. Features: Provides in-depth exploration of worldbuilding via respective job disciplines Deep dives and case studies into a variety of games, both AAA and indie Includes boxed articles for deeper interrogation and exploration of key ideas Contains templates and checklists for practical tips on worldbuilding

Loving Vampires Tom Pollard, 2016-03-14 Vampire characters are ubiquitous in popular culture, serving as metaphors for society's most sensitive subjects--sexuality, gender roles, race, ethnicity, class--and often channeling widespread fears of immigration, crime, terrorism and addiction. This book explores pop culture's vampires variously as sexual seducers, savage monsters, noble protectors and drainers of human power. The author discusses three real-life role models for vampire characters.

Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post-pandemic recovery In 1969, as all students of New York City history think they have learned, master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway. The ten-lane elevated expressway would have sliced across SoHo and Little Italy, demolishing historic buildings, and displacing thousands of families and businesses. Jacobs and her neighbors defeated Moses, and as a result, New York became the only major American city with no interstate highway running through its core. Like many global cities, though, New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile. New York has now spent more than fifty years trying to undo those mistakes, wresting back city space for people, not cars. Movement: New York's Long War to Take Back Its Streets from the Car chronicles the earlier, less-known battles that preceded the cancellation of the Lower Manhattan Expressway: Jacobs became an example for generations of urban planners, but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park? Moses may serve handily as New York's uber-villain now, but who, before him, was responsible for destroying a critical part of New York's transit system? A well respected urban writer who has focused on New York's transportation system for more than a decade, author Nicole Gelinas resumes the story where Robert Caro's landmark The Power Broker ended. Movement explores how, in the half-century leading up to the COVID-19 pandemic, New York's re-embrace of its mass-transit system and a livable streetscape helped save the city. Gelinas tackles the 1970s environmental movement, the 1980s rebuilding of the subways, and more contemporary battles, from Mayor Bloomberg's

push for more pedestrian plazas and bike lanes in the early 2000s, to transportation advocates' protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s, to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery. Introducing a cast of transportation heroes to rival Jane Jacobs (Shirley Hayes, Hazel Henderson, Richard Ravitch, Nilka Martell) and puncturing the myth of Moses as New York's anti-hero, *Movement* explores how New York City has helped redefine what it means to be a global city: not a place that is easy to drive through, but a place where people can take transit, walk, and bike to work, to school, or just for fun.

Music, Sound, and Silence in *Buffy the Vampire Slayer* Janet K. Halfyard, Paul Attinello, Vanessa Knights, 2017-07-05
The intense and continuing popularity of the long-running television show *Buffy the Vampire Slayer* (1997-2003) has long been matched by the range and depth of the academic critical response. This volume, the first devoted to the show's imaginative and widely varied use of music, sound, and silence, helps to develop an increasingly important and inadequately covered area of research - the many roles of music in contemporary television. In addressing this significant gap, this book provides an exemplary overview of the functions of music and sound in the interpretation of a television show. This is done through analyses that focus on scoring and source music, the title theme, the music production process, the critically acclaimed musical episode (voted number 13 in Channel Four's *One Hundred Greatest Musicals*), the symbolic and dramatic use of silence, and the popular reception of the show by its international fan base. In keeping with contemporary trends in the study of popular musics, a variety of critical approaches are taken from musicology, cultural studies, and media and communication studies, specifically employing critique, musical analysis, industry studies, and hermeneutics.

Why the West Can't Win Fadi Lama, 2023-05-01
Geopolitical upheaval has gripped the world since collapse of the Soviet Union. During the 1990s the West focused on eliminating the resurgence of Russia as a great power. This led to the assimilation of Warsaw Pact countries into NATO, two Chechen wars, and political systems in the Central Asian republics aligned with the West. Russia's economic destruction was managed by the Harvard boys' shock therapy, which left Russian resources in the control of a few oligarchs aligned with the West. By the end of the 1990s Russia was a weak, bankrupt country of marginalized influence in the world. Then the West's focus turned to China as a potential challenger to western global hegemony. It was thought to suffice to control global energy resources and sea-lanes to China to prevent China from challenging western global hegemony. Hence the first two decades of the millennium were focused on controlling West Asia and North Africa's energy resources. For most, the collapse of the Soviet Union in 1991 signaled the victory of the self-denominated Free World. *Why the West Can't Win*, however, addresses how events in the three following decades signal the end of a millennium of West European expansionism, a plundering and oppression initially labeled Crusades when the popes embodied political power, morphing into colonialism, then to the Free World when colonialism went out of fashion post-World War II, and at last to the "International Community" after the collapse of the Soviet Union. This book's geopolitical analysis

includes a historical overview, an understanding of the financial systems established at the Bretton Woods conference that continue dominating the global economy, how they are used as a powerful geopolitical instrument, an economic analysis based on real goods production, global energy dynamics, alliances and strategies of key global players. It addresses the emerging division of the world into two geopolitical groups: Western Europe, North America, Australia, New Zealand and Africa, Asia and Latin America. The current global geopolitical clash is in essence a struggle between the colonial powers wishing to preserve the Bretton Woods system that allows siphoning wealth of nations, and sovereign nations striving for independence and an end to a millennium of oppression. This work compares the geopolitical forces since the turn of the millennium with a view to providing insight into their relative strengths and the likely outcome of this struggle

Mysterious Creatures George M. Eberhart, 2002-12-17 A comprehensive guide to cryptozoology—the quest to identify animals that have not been officially catalogued by science and to place these unknown animals into their proper zoological categories. In this fascinating two-volume encyclopedia, author George M. Eberhart provides a comprehensive catalog of nearly 1,000 cryptids—unknown animals usually reported through eyewitness accounts and not yet described by science. Cryptids are the stuff of folklore, hoaxes, and genuine scientific breakthroughs. There are 400 now-classified cryptids once considered either extinct or pure fantasy. The cryptozoologist's job is to strip away the myth, misidentification, and mystery—and separate fact from fiction. *Mysterious Creatures* covers everything from dinosaurs and the emala-ntouka, an elephant-killing dinosaur-like animal of central Africa, to searches for the Loch Ness monster, Bigfoot, and other cryptozoological hoaxes. Entries about specific animals include the derivation or meaning of each cryptid's name, its scientific name, variant names, a physical description, behavior, description of tracks, habitat, significant sightings, present status, and possible explanations. Illustrations and photographs accompany many entries. The book also includes resources and references for further information.

Generation Share Matofska, Benita, Sheinwald, Sophie, 2020-05-26 Generation Share takes readers on a journey around the globe to meet the people who are changing and saving lives by building a Sharing Economy. Through stunning photography, social commentary and interviews with 200 change-makers, Generation Share showcases extraordinary stories demonstrating the power of Sharing. From the woman transforming the lives of slum girls in India, to the UK entrepreneur who has started a food sharing revolution; you'll discover the creators of a life-saving human milk bank, a trust cafe and a fashion library who are changing the world. A collaboration between speaker, social innovator and global Sharing Economy expert Benita Matofska and photographer Sophie Sheinwald, Generation Share brings to life the phenomenon causing the most significant shift in society since the Industrial Revolution.

Home Truths Liam Halligan, 2021-01-13 The UK's chronic housing shortage is lowering the quality of life for millions, turning the British dream of home ownership into a cruel nightmare – not least for 'generation rent'. Countless vulnerable

families are meanwhile being deprived of access to decent social housing, causing homelessness to spiral. In this searing polemic, Liam Halligan offers radical solutions to the most urgent political issue of our times. Fully updated, with a foreword from former Chancellor Sajid Javid and drawing on extensive interviews with Cabinet ministers, civil servants, leading developers and struggling homebuyers across the country, *Home Truths* is a no-holds-barred critique of the UK's housing crisis.

Bigfoot to Mothman Margo DeMello, 2024-01-25 This one-volume encyclopedia introduces readers to the world's cryptids--those hidden or secret animals believed to exist at the margins of human society--including Bigfoot, Yeti, the Loch Ness Monster, and the Mothman. Comprehensive in its scope, this book is a valuable resource for anyone who wants to know more about well-known creatures of myth and legend, such as the Chupacabra and the Jersey Devil, and discover lesser-known animals, such as the Bunyip of Australia and the Mamlambo of South Africa. Rather than purport to prove or deny the existence of these creatures, however, this volume classifies them within their respective cultural, historical, and social contexts, allowing readers to appreciate cryptids as cultural artifacts important to societies around the globe. Finally, this book goes beyond the study of the unknown to investigate who believes in cryptids, why they do, and why the study of cryptozoology is as much about understanding cryptids as it is about understanding ourselves.

ISLA, 1989-09 Clippings of Latin American political, social and economic news from various English language newspapers.

The American Popular Novel After World War II David Willbern, 2013-03-29 Through the perspectives of selected best-selling novels from the end of World War II to the end of the 20th century--including *The Catcher in the Rye*, *To Kill a Mockingbird*, *The Godfather*, *Jaws*, *Beloved*, *The Silence of the Lambs*, and *Jurassic Park*--this book examines the crucial issues the U.S. was experiencing during those decades. These novels represent the voices of popular conversations, as Americans considered issues of family, class, racism and sexism, feminism, economic ambition, sexual violence, war, law, religion and science. Through the windows of fiction, the book surveys the Cold War and anti-communism, the prefeminist era of the 1950s and the sexual revolution of the 1970s, forms of corporate power in the 1960s and 1980s, the traumatic legacies of slavery and Vietnam, the American fascination with lawyers, cops and criminals, alternate styles of romance in the era of late capitalism, our abiding distrust of science, and our steadfast wonder about the Great Mysteries.

Harboring Data Andrea M. Matwyshyn, 2009-10-06 As identity theft and corporate data vulnerability continue to escalate, corporations must protect both the valuable consumer data they collect and their own intangible assets. Both Congress and the states have passed laws to improve practices, but the rate of data loss persists unabated and companies remain slow to invest in information security. Engaged in a bottom-up investigation, *Harboring Data* reveals the emergent

nature of data leakage and vulnerability, as well as some of the areas where our current regulatory frameworks fall short. With insights from leading academics, information security professionals, and other area experts, this original work explores the business, legal, and social dynamics behind corporate information leakage and data breaches. The authors reveal common mistakes companies make, which breaches go unreported despite notification statutes, and surprising weaknesses in the federal laws that regulate financial data privacy, children's data collection, and health data privacy. This forward-looking book will be vital to meeting the increasing information security concerns that new data-intensive business models will have.

UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D. Callahan, 2017-08-02 A wide-ranging survey offers “entertainment as well as wisdom for everyone who’s ever wondered what’s behind so many conspiracy theories and paranormal phenomena” (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

Landscape, Association, Empire Philip Hutch, Elaine Stratford, 2023-12-02 This book tells a compelling story about invasion, settler colonialism, and an emergent sense of identity in place, as seen through topographical and landscape images by seven fascinating artists. Their ways of imagining the Vandemonian landscape are part of a much larger story about how aesthetic forces shaped empire and colony, place and migration, and people's lives. They remain intriguing through-lines of global significance and local meaning.

180 Days of Writing for Fifth Grade: Practice, Assess, Diagnose Maloof, Torrey, 2017-03-01 180 Days of Writing is an easy-to-use resource that provides fifth-grade students with practice in writing argument/opinion, informative/explanatory, and narratives pieces while also strengthening their language and grammar skills. Centered on high-interest themes, each two-week unit is aligned to one writing standard. Students interact with mentor texts during the first week and then apply their learning the next week by practicing the steps of the writing process: prewriting, drafting, revising, editing, and publishing. Daily practice pages make activities easy to prepare and implement as part of a classroom morning routine, at the beginning of each writing lesson, or as homework. Genre-specific rubrics and data-analysis tools provide authentic assessments that help teachers differentiate instruction. Develop enthusiastic and efficient writers through these standards-based activities correlated to College and Career Readiness and other state standards.

Mobile Learning John Traxler, Agnes Kukulska-Hulme, 2015-11-06 Mobile Learning: The Next Generation documents the most innovative projects in context-aware mobile learning in order to develop a richer theoretical understanding of learning in modern mobile-connected societies. Context-aware mobile learning takes advantage of cell phone, mobile, and pervasive personal technologies to design learning experiences that exploit the richness of both indoor and outdoor environments. These technologies detect a learner's presence in a particular place, the learner's history in that place or in relation to other people and objects nearby, and adapt learning experiences accordingly, enabling and encouraging learners to use personal and social technologies to capture aspects of the environment as learning resources, and to share their reactions to them.
