Supply and Demand Trading 101 for Beginners J.R. Calcaterra, Supply and demand trading is not rocket science and no one owns it or has a patent on it. The good news is that anyone can learn it, it is a simple market principle that has been in existence since there was a market and it will always be the same principle till there is no more market which will be the end of days. The even better news is that you don't need an MBA or even a high school diploma to learn it and use it to make an unlimited income from trading. Using supply and demand is a no brainer and doesn't require years to learn it and use it. Supply and demand is the only way live markets work meaning for every buyer there has to be a seller and for every seller there has to be a buyer, it's that simple. Supply and Demand Trading 101 is written for brand new beginner traders who wish to be a self-directed investor and trading and do trading on their own. The best way to learn supply and demand trading is by actually learning it the right way from the start. There are a lot of tips and tricks in the book that can help a beginner cut down their learning curve and get them making real money right away. When you have completed the reading of this entire

book you will have an understanding of what a brand new self-directed beginner trading needs to know to make an unlimited income from trading the financial markets and how and where to get further information and even mentoring to help you to expedite your learning curve so you can begin making money right away.
