Strategic Communications in Russia Katerina Tsetsura, Dean Kruckeberg, 2020-09-07 This book serves as a reader exploring the scholarly inquiry, professional education, and practice of Russian public relations and advertising in multiple contexts. It examines significant parts of what can be encompassed under the umbrella of strategic communications, including public relations and advertising, rather than investigating all areas of communication in Russia. Within the context of Russia's history, culture, and ideology, the book begins by tracing the development of communication as a field, as a discipline, and as a social institution in Russia. It then samples current studies in Russian strategic communications, examining this professional specialization's current state and likely future directions. The book's authors are mostly Russians who are experts in their specializations. Chapters are predicated upon the premise that this is an exciting time of great opportunity for Russian strategic communications. However, in Russia, exploiting such opportunities for strategic communications scholarship, education, and professional practice presents challenges within the context of that nation's cultural, historical, and ideological heritage that presently may be unique. The book concludes with a prognosis of the future of Russian strategic communications. The book is recommended reading for a worldwide audience of strategic communications scholars, educators, students, and practitioners. Such readers will find the book of interest and of unique

value as the book will help them to better understand, appreciate, and respect Russian strategic communications, its genesis, and present state.

Strategic Communication Theory and Practice Carl H. Botan, 2017-12-18 A guide to strategic communication that can be applied across a range of subfields at all three levels—grand strategic, strategic, and tactical communication Communication is a core function of every human organization so when you work with communication you are working with the very core of the organization. Written for students, academics, and professionals, Strategic Communication Theory and Practice: The

Cocreational Model argues for a single unified field of strategic communication based in the three large core subfields of public relations, marketing communication, and health communication, as well as strategic communicators working in many other subfields such as political communication, issues management, crisis communication, risk communication, environmental and science communication, social movements, counter terrorism communication, public diplomacy, public safety and disaster management, and others. Strategic Communication Theory and Practice is built around a cocreational model that shifts the focus from organizational needs and the messages crafted to achieve them, to a publics-centered view placing publics and their ability to cocreate new meanings squarely in the center of strategic communication theory and practice. The author—a noted expert in the field—outlines the theories, campaign strategies, common issues, and cutting edge challenges facing strategic communication, including the role of social media, ethics, and intercultural strategic communication. As the author explains, the term strategic communication properly refers only to the planned campaigns that grow out of research and understanding what publics think and want. This vital resource answers the questions of whether, and how, strategic-level skills can be used across fields, as it: Explores the role of theory and the cocreational meta-theory in strategic communication Outlines ethical practices and problems in the field Includes information on basic campaign strategies Offers the most recent information on risk communication, preparedness and terrorism communication, and employment in strategic communication Redefines major concepts, such as publics, from a cocreational perspective
