**Shasha Hu**

El fin del mundo es solo el comienzo Peter Zeihan, 2023-07-10 Durante generaciones, todo se ha vuelto más rápido, mejor y más barato. Hemos llegado al punto en el que, desde que decides que la deseas, casi cualquier cosa que desees puede ser enviada a tu casa en cuestión de días, e incluso horas. Un pequeño grupo de países hizo que esto fuera posible; pero ahora han perdido interés en mantenerlo en funcionamiento. Todo esto fue artificial. Todo esto fue temporal. Todo esto ha llegado a su fin. En su libro *El fin del mundo es solo el comienzo*, el autor y estratega geopolítico Peter Zeihan traza el mapa del próximo mundo: un mundo en el que los países o regiones no tendrán más opción que fabricar sus propios bienes, cultivar sus propios alimentos, asegurar su propia energía, librarse de las propias batallas y además hacerlo con poblaciones que están menguando y envejeciendo. La lista de países que hacen que todo funcione es más pequeña de lo que creemos. Esto significa que todo lo relacionado con nuestro mundo interconectado, desde cómo fabricamos los productos hasta cómo cultivamos los alimentos, pasando por cómo mantenemos la luz encendida, cómo transportamos las cosas y cómo pagamos por todo ello, está a punto de cambiar. Siguiendo su estilo habitual, en lugar de gritar «¡fuego!» en el teatro geoeconómico mundial, Zeihan señala la acumulación de fósforos, gasolina y dinamita en las manos de una audiencia ignorante, sugiriendo que tal vez queramos avisar a los bomberos antes de que sea demasiado tarde. Un fin del mundo y, a la vez, un mundo que comienza. Zeihan lleva a los lectores en un viaje esclarecedor (y un poco aterrador), lleno de previsión, ingenio y con su irreverencia característica. «Nunca he sido tan optimista sobre el fin del mundo. Profundamente investigado, poderosamente argumentado y bien escrito. Zeihan hilvana conocimientos de geografía económica, demografía e historia para ofrecernos una visión original y a la vez intuitiva de la geopolítica mundial». Ian Bremmer, presidente del Grupo Eurasia. «Peter Zeihan proyecta un futuro que desafiará sus premisas sobre cómo funciona el mundo, qué naciones están mejor posicionadas para prosperar y cuáles son más frágiles. El mundo que imagina está plagado de peligros, pero no exento de oportunidades. Una lectura que vale la pena para dar cuerpo a su visión del mundo». General de División Patrick Donahoe, Comandante General, Centro de Excelencia de Maniobras del Ejército de EE.UU. «Zeihan es el Nostradamus del siglo xxi. En ningún lugar encontrará un examen más objetivo y certero de las tendencias geopolíticas mundiales. Una mezcla magistral de economía, demografía, medioambiente, movimientos culturales y realpolitik. Si su pasión es la política, la inversión, la energía, la tecnología, las relaciones internacionales o simplemente parecer más inteligente e interesante en las fiestas, lea el libro de

Peter». Jesse Watters, autor del superventas How I Saved the World.

**Metrum** Andrew Robinson,2007-11-05 Desde los albores de la civilización, las medidas han definido la sociedad, el

gobierno y el progreso. Delimitar tierras, sembrar cosechas, erigir palacios, comerciar, gravar con impuestos, establecer registros y celebrar festividades son actividades que exigían que la longitud, el área, el volumen, el ángulo, el peso, el valor monetario, la lengua y el tiempo fuesen cuantificados y sistematizados. Nos guste o no, nuestras vidas están reguladas en casi todos los aspectos por medio de exámenes, tipos de interés, prescripciones de fármacos y encuestas de opinión. Metrum ofrece por primera vez una perspectiva de conjunto plenamente ilustrada sobre el tema. Este libro amplio y cada vez más necesario explica las ideas que subyacen tras las unidades de medida y los instrumentos de medición, y muestra cómo unas y otros se aplican tanto al universo físico (los electrones, la Tierra, las estrellas...) como al cuerpo humano y la mente. En parte una historia fascinante y en parte ciencia de vanguardia, la presente obra explora todo lo mensurable, desde la temperatura, los terremotos y la radioactividad hasta la música, la sangre y los comportamientos sociales, así como los orígenes del sistema métrico en la Revolución Francesa. A través de sus páginas el lector se verá transportado desde las imágenes de galaxias en el límite del universo conocido obtenidas con el telescopio espacial Hubble hasta las pruebas de inteligencia que nos aproximan a los espacios más ocultos de la mente. Andrew Robinson es autor del best seller Historia de la escritura y de muchos otros libros, entre los que se incluyen The Shape of the World, Earthshock y elogiadas biografías de Albert Einstein, Thomas Young y Satyajit Ray. El autor, que fue editor literario para The Times Higher Education Supplement, en la actualidad es profesor visitante del Wolfson College de la Universidad de Cambridge.

**Minería y desarrollo. Tomo 3** Christian Bruszies, 2016-04-01 Los lectores encontrarán aquí una aproximación al comportamiento del sector en términos de variables empresariales, las cuales son analizadas desde diferentes perspectivas. En concordancia con el espíritu interdisciplinar del proyecto, en este tomo participan investigadores de las Facultades de Administración de Empresas, Finanzas, Gobierno y Relaciones Internacionales, Comunicación Social, así como de varios departamentos de la Facultad de Derecho, en particular, los departamentos de Derecho Minero y Energético, Propiedad Intelectual, Comercial, Laboral, de los Negocios, Financiero y Bursátil. Se abordan las diferentes dimensiones empresariales del sector que requieren atención en el corto y mediano plazo. A lo largo de los capítulos el lector encontrará diversos análisis que abarcan las condiciones del entorno económico y regulatorio que están afectando la competitividad, y elementos institucionales que presentan un gran potencial para estimular el crecimiento, pero que al mismo tiempo pueden convertirse en obstáculos para su desempeño en el largo plazo; además, podrá comprender la forma como el desempeño del mercado mundial y las tendencias de futuro pueden condicionar variables empresariales concretas del mercado local, tales como la rentabilidad, la productividad y la inversión. Además, el tomo presenta una abundante información recolectada en fuentes secundarias, incluyendo testimonios de fuentes primarias, tales como empresarios, funcionarios de organizaciones e instituciones, y especialistas en el tema. Todo ello da cuenta de la complejidad de los escenarios que las empresas del sector deben enfrentar en la actualidad, y las estrategias que sus líderes deben ejecutar para responder a ellos.

**El virus (otro) en los días del virus** Jesús Ángel Sánchez Moreno,2021-06-22 Una vez más, ¿cuántas van?, escuchamos la expresión “ver la luz al final del túnel”. Buenafuente comentaba no hace mucho que cuando oye esto siempre piensa en si esa luz no será la de los faros de un camión que viene hacia nosotros. No habría que tomar a broma este comentario. Este libro quiere abordar el significado de esa expresión desde una óptica distinta. Un pensar que se quiere desconfinado. La luz al final del túnel entendida como la urgencia imperiosa por plantearnos, en un diálogo que busca tejer redes de complicidades, esa otra crisis que venimos arrastrando desde el siglo pasado. Ese túnel que alguien construyó para ser un túnel que nos conduzca a las tinieblas de un mundo de democracia demolida sustituida por un capitalismo totalitario posdemocrático. La única luz al final del túnel debiera ser aquella que ilumina tres preguntas esenciales: ¿estamos dispuestos a defender el modelo democrático? ¿Y si es así, qué tipo de democracia queremos para que el futuro siga siendo nuestro hogar? ¿Seremos capaces?
